ABBREVIATIONS AND SYMBOLS	XVI
TECHNICAL TERMS AS USED IN THIS INVESTIGATION	XVIII
FUNDAMENTAL FREQUENCY PATTERNS (FoPs)	XXI
1 A SHORT SURVEY OF SLOVENE TONEMATICS UP TO THE PRESENT	1-9
1.1 The territory of tonematic Slovene	
1.2 L. Svetec	
1.3 S. Škrabec	
1.4 M. Valjavec	
1.5 O. Broch	
1.6 F. Ramovš	
1.7 A. Isačenko	
1.8 F. Bezljaj	
1.9 B. Vodusek	
1.10 H. Jaksche	
1.11 J. Toporišič	
1.12 M. Pleteršnik	
1.13 J. Rigler	
1.14 Word accent can be studied in sentences or in neutral (sentence intonation) position	
1.15 Difficulties in describing SS word accent phonetically	
1.16 Present opinion on SS word accent	
2 INTRODUCTION	11-17
2.1 Study objectives	
2.2 Segmental phonemes of Slovene	
2.3 Informants	
2.4 Corpus	
2.5 Some data on the sensitivity of the human ear	
2.6 Spectrographic analysis	
2.7 The basics of Slovene accent	
2.8 Slovene is a pitch accent language	
3 NONSENSE WORDS - VOWEL DURATION AND FREQUENCY	19-54
3.1 Measurements on vowel duration and frequency in other languages	
3.2 The influence of adjacent consonants	
3.3 The traditional view of stress and vowel duration in SS	
3.4 The structure of the nonsense words	
3.5 On the frequency measurements	
3.6 Some general principles (GP) of vowel duration in Slovene	
3.7 Vowel durations	23-32
3.7.1 Speaker Ju	

VIII

3.7.1.1	Stressed vowels	
3.7.1.2	Unstressed vowels	
3.7.1.3	Comparison between stressed and unstressed vowels	
3.7.2	Speaker Ka	
3.7.2.1	Stressed vowels	
3.7.2.2	Unstressed vowels	
3.7.2.3	Comparison between stressed and unstressed vowels	
3.7.3	Speaker Pi	
3.7.3.1	Stressed vowels	
3.7.3.2	Unstressed vowels	
3.7.3.3	Comparison between stressed and unstressed vowels	
3.7.4	Summary	
3.8	Vowel frequency	33-39
3.8.1	Speaker Ju	
3.8.1.1	Stressed vowels	
3.8.1.1	Unstressed vowels	
3.8.2	Speaker Ka	
3.8.2.1	Stressed vowels	
3.8.2.2	Unstressed vowels	
3.8.3	Speaker Pi	
3.8.3.1	Stressed and unstressed vowels	
3.8.4	Summary	
4	ACCENT IN SINGLE WORDS IN NEUTRAL SENTENCE INTONATION POSITION	55-132
4.1	Introduction	
4.1.1	The makeup of the list of single words	
4.1.2	The breakdown of the tone curves	
4.1.3	The duration measurements	
4.1.4	The intensity measurements	
4.1.5	Pitch modifications within the domain of accent	
4.1.6	Fundamental frequency patterns (FoPs)	
4.1.6	Fundamental frequency contours (FoCs)	
4.1.7	Typical/non-typical word accent	
4.2	Speaker Ju	58-65
4.2.1	Barytones	
4.2.2	Commentary to Summary Tables 5, 6, 7 Ju	
4.2.3	Oxytones	
4.3	Speaker Ka	65-70
4.3.1	Barytones	
4.3.2	Oxytones	
4.4	Speaker Pi	70-74
4.4.1	Barytones	
4.4.2	Oxytones	
4.5	Commentary to Tables	74-79
4.5.1	Agreement between expected accent, FoP and interpreted accent on barytones (Summary Tables 6 Ju, 6 Ka, 6 Pi)	

IX

- 4.5.2 Some general observations on barytones (Table 10 Ju, Ka, Pi) . . .
- 4.5.3 Vowel duration in oxytones. Agreement between expected accent and interpreted accent on oxytones. The role of the FoC (Summary Tables 5 Ju, 5 Ka, 5 Pi, 8 Ju, 8 Ka, 8 Pi).

5 WORD ACCENT IN SENTENCES 133-185

5.1	Introduction	
5.2	Speaker Ju	133-140
5.2.1	In initial position	
5.2.2	In mid-position	
5.2.3	In final position	
5.2.3.1	On a R-nucleus	
5.2.3.2	On a F-nucleus	
5.2.4	Summary	
5.3	Speaker Ka	140-146
5.3.1	In initial position	
5.3.2	In mid-position	
5.3.3	In final position	
5.3.3.1	On a R-nucleus	
5.3.3.2	On a F-nucleus	
5.3.4	Summary	
5.4	Speaker Pi	146-151
5.4.1	In initial position	
5.4.2	In mid-position	
5.4.3	In final position	
5.4.3.1	On a R-nucleus	
5.4.3.2	On a F-nucleus	
5.4.4	Summary	
5.5	Summary	151-154
5.5.1	Barytones	
5.5.2	Oxytones	

6 WORD ACCENT CONTINUED 187-210

6.1	Accent on emphatically (and contrastively) stressed words in a sentence	187-191
6.1.1	Speaker Ju	
6.1.2	Speaker Ka	
6.1.3	Speaker Pi	
6.2	Accusative and instrumental sg. of feminine nouns ending in -a	195-199
6.2.1	Speaker Ju	
6.2.1.1	Expected acutes, contrastively stressed	
6.2.1.2	Expected circumflexes, normally stressed	
6.2.2	Speaker Ka	
6.2.2.1	Expected acutes, contrastively stressed	
6.2.2.2	Expected circumflexes, normally stressed	
6.2.3	Speaker Pi	
6.2.3.1	Expected minimal pairs contrastively stressed	

6.2.4	Summary	
6.3	Five expected minimal pairs	206-207
6.3.1	Speaker Ju	
6.3.2	Speaker Ka	
6.3.3	Speaker Pi	
7	VOWEL DURATION CONTINUED	211-227
7.1	Introduction	211-215
7.1.1	The phonological function of length in traditional grammar of SS	
7.1.2	Length is not phonologically relevant with Ju, Ka, Pi	
7.1.3	The role of intrinsic duration	
7.1.4	Other factors influencing vowel duration	
7.1.5	The vowel system of SS as spoken in Ljubljana	
7.1.6	The non-existence of short accented vowels with Ju, Ka, Pi	
7.1.7	A survey of aspects of vowel duration in the present investigation	
7.2	Vowel duration in oxytones	215
7.3	The duration of the vowel /a/	218-219
7.3.1	In some actual Slovene words	
7.3.2	The problems of Slovene phoneticians with the length of /a/ . . .	
7.4	The duration relationship stressed : prestressed vowel in some Slovene words	219-221
7.4.1	Description of the Corpus	
7.4.2	Speaker Ju	
7.4.3	Speaker Ka	
7.4.4	Speaker Pi	
7.5	Instances where unstressed vowels are longer than stressed. The role of vowel duration and frequency in the perception of stress .	223-224
7.6	The influence of nucleus type on vowel duration	226
8	WORD ACCENT - SUMMARY	229-237
8.1	Stress in SS entails a rise	
8.2	The different timing of the tonal peak	
8.3	Its influence on the contour of the accented vowel	
8.4	The jump and a typical acute	
8.5	A typical circumflex	
8.6	Formalized circumflexes/acutes	
8.7	Haugen and Joos' formula of tonematic accent	
8.8	Non-typical word accents	
8.9	Borderline cases of word accent	
8.10	Their role in accent studies	
8.11	The psychological influence of expected word accent	
8.12	The timing of the tonal peaks with Ju and Ka	
8.13	Word accent in its "pure" form, and under the influence of sentence intonation	
8.14	The phonetic/phonological interpretation of word accent	
8.15	How deep rooted word accent is with an individual speaker	
8.16	The influence of sentence intonation on word accent	

XI

8.17	Ju's, Ka's and Pi's FoPs	
8.18	The differing domain of word accent in barytones and oxytones and the consequences of this	
8.19	Ease of perception of the 2 accents	
8.20	The contour of oxytones	
8.21	The acute is the marked accent	
8.22	Word accent and SSKJ	
8.23	Circumflex – a falling accent, acute – a rising accent
