Endogenous Opioids and Cardiovascular Regulation: Introduction	
A. I. FADEN, K. KRAFT, and K. O. STUMPE	1

Anatomy

Distribution of Opioid Peptides Functionally Related to the Cardiovascular System	
W. KUMMER, M. REINECKE, C. HEYM, and W. G. FORSSMANN	5
Studies on Enkephalinergic Mechanisms in Cardiovascular Centers of the Medulla Oblongata of the Rat and their Interactions with Centrally Administered Neuropeptide Y	
A. HÄRFSTRAND, K. FUXE, L. F. AGNATI, A. CINTRA, M. KALIA, and L. TERENIUS	13
Multiplicity of Opioidergic Pathways Related to Cardiovascular Innervation: Differential Contribution of All Three Opioid Precursors	
E. WEIHE, D. NOHR, W. HARTSCHUH, B. GAUWEILER, and T. FINK	27

Physiology

Opioids, Opiate Receptors, and Central Cardiovascular Regulation	
A. I. FADEN	53
Adrenergic Opioid Interaction in the Brain Stem: Role in Cardiovascular Regulation	
G. KUNOS, and R. MOSQUEDA-GARCIA	62
Influence of the Opioid System on Sympathetic Activity and the Renin-Aldosterone System in Healthy Males	
M. BRAMNERT, and B. HÖKFELT	71

Role of Leu-morphin, an Opioid Peptide, in the Central Regulation of Fluid Balance and Blood Pressure in Rats H. IMURA, K. NAKAO, T. YAMADA, H. ITOH, S. SHIONO, M. SAKAMOTO, N. MORII, A. SUGAWARA, Y. SAITO, and M. MUKOYAMA	83
Endogenous Opioids in the Dorsal Vagal Complex and Resting Cardiovascular Function in the Anesthetized Rat A. H. HASSEN, and E. P. BROUDY	90
Influence of Opiate Peptides on Blood Pressure Regulation and on Hypothalamic Blood Flow W. DE JONG, J. COX VAN PUT, and P. SÁNDOR	98
Opioid Peptides in Human Adrenal Medulla: Their Role in the Modulation of Catecholamine Secretion E. BALDI, M. MAGGI, M. L. DE FEO, C. PUPILLI, C. SELLI, R. ZIMLICHMAN, E. FORSBERG, V. CARLA, and M. MANNELLI	103
Cardiovascular Effects of Neuropeptide Y in the Caudal Ventrolateral Medulla I. M. MACRAE, and J. L. REID	112
Plasma Met-enkephalin and Cardiovascular Responses to Stress G. R. VAN LOON, K. PIERZCHALA, L. V. BROWN, and D. R. BROWN	117
<i>Pharmacology</i>	
Opioid Receptors in the Sympathetic Supply to Blood Vessels and the Heart B. SZABO, D. RAMME, and K. STARKE	129
Interactions of Opioid Peptides and Adrenergic Agents in the Regulation of Blood Pressure H. M. RHEE	141
Effect of Opiate Receptor Blockade on the Cardiovascular and Plasma Noradrenaline Response to Intravenous Tyramine in Man P. M. G. BOULOUX, A. GROSSMAN, and G. M. BESSER	150
Effects of Mu- and Delta-Opiate Receptor Agonists on Systemic and Regional Hemodynamics in Conscious Rats O. S. MEDVEDEV, E. R. MARTYNOVA, and A. HOQUE	159
Retardment of Development of Hypertension in the Spontaneously Hypertensive Rat by Long-Term Kappa-Opioid Receptor Antagonism J. DIEHL, K. KRAFT, and K. O. STUMPE	168

Naltrexone Inhibits Alpha-Methyldopa-Induced Hypotension in a Dose-Dependent Manner	
P. L. M. VAN GIESSBERGEN, G. A. HEAD, and W. DE JONG	174
Effects of 17-alpha-estradiol, a Possible Endogenous Opiate Antagonist, on Cardiovascular Responses in Conscious Unrestrained Rats	
W. R. DIXON, and A. CHANDRA	183
Opioid Receptor Types at Noradrenergic Neurons and their Roles in Blood Pressure Regulation	
P. ILLES, and B. BUCHER	190
Effect of Opioids on Plasma Levels of Immunoreactive Atrial Natriuretic Factor	
J. GUTKOWSKA, B. BARANOWSKA, K. RACZ, R. GARCIA, G. THIBAUT, M. CANTIN, and J. GENEST	206
Production by Systemic Enkephalin of Hemodynamic Effects by Afferent Modulation of Autonomic Nervous System Tone	
T. D. GILES, and G. E. SANDER	212

Pathophysiology and Clinical Aspects

Endogenous Opioids in the Pathophysiology of Shock: Sites of Action, Autonomic Involvement, and Receptor Interactions	
J. W. HOLADAY, D. S. MALCOLM, and J. B. LONG	221
Endogenous Opioids and Blood Pressure in Man	
P. C. RUBIN	233
Effects of Hemorrhagic Shock on Plasma Met-enkephalin, Vasopressin, Catecholamines, and Cardiovascular Functions in Intact and Adrenalectomized Dogs	
T. KIMURA, M. INOUE, K. MATSUI, K. OTA, M. SHOJI, and K. YOSHINAGA	236
Effect of Hypertension on the Response of Plasma Beta-Endorphin to the Cold Pressor Test	
R. FUKUNAGA, N. HANDA, S. YONEDA, K. KIMURA, and T. KAMADA	247
Normalization by Clonidine of Reduced Plasma Beta-endorphin and Leu-enkephalin Concentrations and Elevated Blood Pressure in Young Patients with Mild Essential Hypertension	
K. KRAFT, R. THEOBALD, R. KOLLOCH, and K. O. STUMPE	253

Role of Opioids in the Pathophysiology of Hypertension	
C. FARSANG	260
Effect of Low Dosage of Naloxone on Clonidine-Induced Changes in Blood Pressure, Catecholamines, Renin, and Aldosterone in Essential Hypertension	
M. BRAMNERT, and B. HÖKFELT	275
Effect of Lisinopril on Circulating Neuropeptides in Essential Hypertensive Patients	
S. BRANDMAN, W. T. WISEMAN, J. D. STEPHENS, C. LONG, D. R. GLOVER, and M. J. VANDENBURG	282
Endogenous Opioids and Reversal of Renovascular Hypertension	
M. E. EDMUNDS, G. I. RUSSELL, R. F. BING, H. THURSTON, and J. D. SWALES . .	287
Comparison of Pain Threshold as Assessed by Tooth Pulp Stimulation in Normotensives with Different Hypertensive Hereditary Backgrounds and in Borderline and Established Hypertensives	
S. GHIONE, C. ROSA, L. MEZZASALMA, and E. PANATTONI	294
Subject Index	299
