

CONTENTS

Preface	vii
Antosik, P.: On iterated and double limits	1
Arhangel'skij, A.V.: Some results and problems in C _p (X)-theory	11
Bandt, Ch.: Estimates for the Hausdorff dimension of hyperspaces	33
Bella, A.: Some remarks on the Novak number	43
Burzyk, J.: Independence of sequences in convergence linear spaces	49
Butzmann, H.-P.: Sequentially determined convergence spaces ..	61
Cain, G.L.: Countable compactifications	69
Chaber, J.: On the class MOBI	77
Charatonik, J.J.: On retractible continua	83
Charatonik, W.J.: An open Whitney map for the hyperspace of a circle	91
Comfort, W.W.: Some progress and problems in topological groups	95
Császár, A.: Multiplicative semigroups of continuous mappings into topological semigroups	109
Curtis, D.W.; Mill, J. van: The compact extension property	115
Czuba, S.T.: A new class of non-contractible continua	121
Dikranjan, D.: Non-completeness measure of convergence abelian groups and completeness of the coarse abelian groups ...	125
Douwen, E.K. van: Countable homogeneous spaces and countable groups	135
Dow, A.: Two applications of reflection and forcing to topology	155
Duda, E.: Continuum covering mappings	173
Ewert, J.; Lipinski, J.S.: On relations between continuity, quasi-continuity and cliquishness of maps	177
Frič, R.; Koutník, V.: Completions of convergence groups	187
Gähler, S.: Discrete convergence and applications to integral equations on the half line	203
Gerlits, J.; Nagy, Z.; Szentmiklóssy, Z.: Some convergence properties in function space	211
Gruenhage, G.: On the existence of metrizable or Sorgenfrey subspaces	223
Hattori, Y.: Characterizations of metrizable spaces having transfinite dimension	231
Hejman, J.: Topological vector group topologies for the real line	241
Herrlich, H.: Hereditary topological constructs	249
Holá, L.: Hausdorff metric convergence of continuous functions	263
Husch, L.S.: ε -maps and embeddings	273
Iliadis, S.D.: Continua that are almost locally a bundle of arcs and the property of universality	281
Juhász, I.: On spaces in which large subspaces are separable .	291
Juonila, H.J.K.: Eberlein compact spaces and continuous semilattices	297
Katětov, M.: On universal metric spaces	323

Kent, D.C.; Vainio, R.: The category of ordered Cauchy spaces is cartesian closed	331
Kočinac, L.D.: On radiality of function spaces	337
Michael, E.: Continuous selections: A guide for avoiding obstacles	345
Neubrunn, T.: Strongly quasi-continuous multivalued mappings ..	351
Nikiel, J.: A continuous partial ordering for images of arcs ..	361
Nogura, T.: Products of Fréchet spaces	371
Nyikos, P.: Progress on countably compact spaces	379
Pietsch, A.: A historical survey of the theory of infinite determinants	411
Pol, R.: Selected topics related to countable dimensional metrizable spaces	421
Porst, H.-E.: Free algebras over cartesian closed topological categories	437
Pultr, A.: Some recent topological results in locale theory ..	451
Purisch, S.: Orderability of GO spaces whose pseudogaps are few or scattered about	469
Remus, D.: Topological groups without non-trivial characters ..	477
Riečan, B.: On some modifications of topological entropy	485
Rogers, J.T., Jr.: Applications of the hyperbolic plane to continua theory and to shape theory	491
Salbany, S.: Unique quasi-uniformities	497
Singal, M.K.; Arya, S.P.: The open cover sum theorem	509
Sostak, A.P.: On compactness and connectedness degrees of fuzzy sets in fuzzy topological spaces	519
Stegall, Ch.: Dunford-Pettis sets	533
Tall, F.D.: Topological applications of supercompact and huge cardinals	545
Tholen, W.: Diagonal theorems in topology and elsewhere	559
Tironi, G.: On pseudo-radial and almost radial spaces	567
Todorćević, S.: On the Lindelöf property of Aronszajn trees ..	577
Torunczyk, H.: Finite-to-one restrictions of continuous functions, 2	589
Uspenskii, V.V.: Why compact groups are dyadic	601
Vaughan, J.E.: On the cardinalities of prime closed filters ..	611
Vojtáš, P.: The strength of the comparison test versus gaps between convergent and divergent series	617
Waszak, A.: Remarks on convergence in some modular spaces	623
Williams, S.W.: Special points arising from self maps	629
Wong, R.Y.: The structure of d-spaces and application ANR's ..	639
Abstracts submitted for the Proceedings	651
Abstracts submitted at the Symposium	683
List of participants	715
List of communications	719
