

Contents

1. The Mechanism of Continence (John Malvern)	1
A. Embryological Development of the Lower Urinary Tract.	1
B. Anatomy of the Bladder and Urethra	2
I. The Bladder	2
II. The Urethra	2
III. The Vesicourethral Musculature	3
IV. The Pubourethral Ligaments	3
C. Neurophysiology of the Lower Urinary Tract.	4
I. Parasympathetic Innervation	4
II. Sympathetic Innervation	4
D. Physiology of the Lower Urinary Tract	4
E. Factors Influencing Bladder Behaviour	5
I. Sensory Impulses	5
II. Central Nervous System	6
III. Motor Pathway	6
F. Micturition and Continence Control.	6
I. The Act of Micturition	6
II. Continence Control	7
G. Conclusion	7
 2. Investigation of Incontinence (Stuart L. Stanton)	 9
A. Pre-operative Assessment	9
I. Classification of Incontinence	9
II. Adverse Factors	10
B. Clinical Assessment	10
I. History	10
II. Examination	11
C. Investigations	14
I. Urethrocystoscopy	15
II. Uroflowmetry	15
III. Urethral Pressure Measurements	17
IV. Cystometry	18
V. Radiology	21
VI. Electromyography (EMG)	26
VII. Urilos Test	28
D. Conclusion	28

3. Vaginal Repair (Thomas H. Green, Jr.)	31
A. Introduction	31
I. Abnormal Urethrovesical Anatomy in Stress Incontinence	31
II. Patient Assessment and Selection	33
B. Operative Technique	35
I. Anterior Colporrhaphy	35
II. Posterior Colporrhaphy and Perineorrhaphy	40
C. Post-operative Management	43
I. Care and Complications	43
II. Follow-up Assessment	43
III. Results	43
 4. The Marshall-Marchetti-Krantz Procedure (Kermit E. Krantz)	47
A. Introduction	47
I. Mechanism of Continence	47
II. Indications and Contraindications	48
III. Pre-operative Evaluation	49
B. Operative Technique	49
C. Post-operative Management	53
I. Complications	54
II. Follow-up Assessment	54
III. Results	54
IV. Summary	54
 5. Retropubic Urethropexy or Colposuspension (C. Paul Hodgkinson and Stuart L. Stanton)	55
A. Introduction	55
I. Terminology	57
II. Indications and Contraindications	57
III. Pre-operative Evaluation	57
IV. Pre-operative Preparation	60
B. Operative Technique	61
C. Post-operative Management	66
I. Complications	66
II. Follow-up Assessment	67
III. Results	67
 6. Sling Procedures (Rudolf Hohenfellner and Eckhard Petri)	69
A. Introduction	69
I. Indications	69
II. Classification	70
III. Pre-operative Evaluation	70

B. Operative Technique	70
I. Inguinovaginal Fascial Sling	70
II. Dural and Alloplastic Sling	73
C. Post-operative Management	74
I. Complications.	74
II. Follow-up Assessment	74
III. Results	74
IV. Summary	75
 7. Endoscopic Suspension of the Vesical Neck (Thomas A. Stamey)	 77
A. Introduction	77
I. Indications and Contraindications	78
II. Pre-operative Evaluation	78
B. Operative Technique	82
I. Abdominal Incision	82
II. Vaginal Incision	82
III. Stamey Needles	83
IV. Use of Endoscopy	84
C. Post-operative Management	87
I. Care	87
II. Complications.	88
III. Follow-up Assessment	88
IV. Results	89
V. Summary	90
 8. Denervation of the Bladder (Axel Ingelman-Sundberg)	 93
A. Introduction	93
I. Indications	93
II. Pre-operative Evaluation and Differential Diagnosis	93
B. Operative Technique	95
C. Post-operative Management	96
I. Complications.	96
II. Follow-up Assessment	97
III. Results	97
IV. Summary	97
 9. Cystodistension (Joseph C. Smith and Roger H. Higson)	 99
A. Detrusor Instability	99
I. Assessment	100
II. Treatment	100
B. Cystodistension.	101
I. Physiology	101
II. Selection of Patients	101
III. Contraindications	102
IV. Technique	102
V. Complications.	103

VI. Bladder Rupture 103

VII. Results 105

VIII. Results of Repeat Cystodistension 107

IX. Cystodistension for Instability Secondary to Neurological Disease. 107

C. Conclusion. 108

10. Neourethra: Rationale, Surgical Technique, and Indications
(Emil A. Tanagho) 111

A. Introduction 111

 I. Anatomical Considerations and Rationale for Operation 111

 II. Indications 112

 III. Pre-operative Evaluation 113

B. Operative Technique 113

 I. Tanagho Technique (Anterior Bladder Flap) 113

 II. Leadbetter Technique (Trigonal Tube) 114

C. Post-operative Management 114

 I. Complications 114

 II. Case Examples 115

 III. Summary 117

11. Artificial Sphincter (William L. Furlow) 119

A. Introduction 119

 I. Developmental History 120

 II. Indications 124

 III. Pre-operative Evaluation 124

 IV. Selection of Model. 125

B. Operative Technique 125

 I. Aseptic Technique 125

 II. Patient Position 127

 III. Instrumentation 127

 IV. Surgical Procedure. 127

 V. Selection of Cuff Size 128

 VI. Implantation of the Anatomic Reflation Sphincter . . . 130

C. Post-operative Management 131

 I. Results and Discussion 131

 II. Summary 133

12. Urinary Diversion (Peter R. Riddle) 135

A. Introduction 135

 I. Classification of Patients 135

 II. Choice of Diversion 136

B. Ileal Loop 136

 I. Pre-operative Management 136

 II. Technique 136

 III. Post-operative. 140

C. Ureterocolic Anastomosis	141
I. Pre-operative Management	141
II. Technique	141
III. Post-operative	143
13. Urethrotomy (Peter H.L. Worth)	145
A. Introduction	145
Methods of Investigation	145
B. Techniques.	146
I. Urethral Dilatation	146
II. Internal Urethrotomy	147
III. Bladder Neck Procedures	148
IV. Alternative Techniques	149
C. Bladder Drainage	150
D. Conclusions	151
14. The Management of Vesicovaginal and Urethral Fistulae (John B. Lawson and Christopher N. Hudson)	153
A. Aetiological Groups.	153
I. Obstetric	153
II. Surgical Trauma.	153
III. Pelvic Malignancy	153
B. Clinical Presentation	154
C. Pre-operative Care	154
I. Early Management	154
II. Associated Conditions	155
III. Local Assessment	156
D. Surgical Repair.	157
I. General	157
II. Vaginal Route	158
III. Abdominal Route	162
E. Post-operative Management	165
I. Complications.	166
II. Results	166
F. Management of Failure	167
15. Ureterovaginal Fistulae (W. Keith Yeates)	169
A. Introduction	170
I. Operative Injuries	170
II. Obstetric Laceration	171
III. Invasion of Growth	171
B. Time of Occurrence of Fistula	171
I. Early	171
II. Intermediate	171
III. Late	171

XIV Contents

C. Recognition of Fistula	171
I. Confirmation of Urinary Leakage	171
II. Confirmation of Ureteric Fistula	171
D. Spontaneous Closure of Fistula	172
E. Timing of Operative Intervention	172
F. Pre-operative Investigation and Preparation	173
I. Identification of the Side of the Fistula	173
II. Recognition of Level	174
G. Operative Procedures	175
I. Objectives	175
II. Exploratory Laparotomy	175
III. Selection of Procedure	176
IV. Reimplantation	176
V. Primary Nephrectomy	182
VI. Urinary Diversion	182
H. Post-operative Complications.	182
I. Leakage	182
II. Stenosis	182
III. Urinary Infection	182
IV. Reflux	182
V. Late Recurrence of Ureterovaginal Fistula	183
J. Summary	183
 16. Pharmacology of the Bladder and Urethra (Alan J. Wein) . . .	185
A. Introduction	185
B. Pharmacology of the Lower Urinary Tract	185
C. Principles and Pharmacological Therapy	188
D. Specific Methods of Pharmacological Treatment	188
I. Therapy to Facilitate Bladder Emptying	188
II. Therapy to Facilitate Urine Storage	192
E. Effects of Various Other Pharmacological Agents on Urine. .	
Storage and Emptying	195
