State of the Art

Matrix Porin: a Periodically Arranged Pore Protein in the Outer Membrane of <i>Escherichia coli</i> J.P. Rosenbusch, A.C. Steven, M. Alkan, and M. Regenass. With 3 Figures.	1
Structure of the HPI-Layer of <i>Micrococcus radiodurans</i> O. Kübler, A. Engel, H.P. Zingsheim, B. Emde, M. Hahn, W. Heiße, and W. Baumeister. With 6 Figures.	11
Morphological Model of the Surface-Layer Array in <i>Spirillum serpens</i> R.M. Glaeser, W. Chiu, D. Grano, and K. Taylor. With 3 Figures. .	22
The 2-d Crystalline Cell Wall of <i>Sulfolobus acidolarius</i> : Structure, Solubilization, and Reassembly H. Michel, D.-Ch. Neugebauer, and D. Oesterhelt. With 6 Figures	27
The Dynamic Process of Assembly of Two-Dimensional Arrays of Macromolecules on Bacterial Cell Walls U.B. Sleytr and R. Plohberger. With 11 Figures.	36
The Two-Dimensional Lattice of the Photosynthetic Membrane of <i>Rhodopseudomonas viridis</i> E. Wehrli and O. Kübler. With 4 Figures.	48
Diffraction Studies of Modified Purple Membrane B.A. Wallace and R. Henderson. With 1 Figure.	57
Formation of a New 2-D-Crystalline Form of Purple Membrane with Orthorhombic Lattice. H. Michel, D. Oesterhelt, and R. Henderson. With 8 Figures. . . .	61

Ultrahigh Vacuum Freeze-Fracturing at -196°C and Decoration of Specific Sites of Paracrystalline Membranes. H. Gross. With 3 Figures.	71
The Structure of Cytochrome c Oxidase: Immuno-Electron Microscopy and Image Analysis of Two-Dimensional Crystals T.G. Frey and S.H.P. Chan. With 6 Figures.	81
Structure of Cytochrome Oxidase Vesicle Crystals J.F. Deatherage, R. Henderson, and R.A. Capaldi. With 6 Figures.	91
Membrane Crystals of Ubiquinone: Cytochrome C. Reductase from <i>Neurospora</i> Mitochondria K. Leonard, P. Wingfield, T. Arad, and H. Weiss. With 7 Figures.	101
Structural Analysis of Stained und Unstained Two-Dimen- sional Ribosome Crystals W. Kühlbrandt and P.N.T. Unwin. With 6 Figures.	108
Subunit Structure and Conformations of Tubulin Protofila- ments E.M. Mandelkow and E. Mandelkow. With 4 Figures.	117
The Role of a Scaffolding Core in the Assembly of the Bac- teriophage T4 Head Shell Lattice R. van Driel. With 3 Figures.	129
Electron Diffraction Study of Crotoxin Complex at 1,6 Å W. Chiu and T.W. Jeng. With 3 Figures.	137
High Resolution Electron Microscopy on Peptidoglycan H. Formanek. With 10 Figures.	143
Low-Dose Electron Microscopy of Individual Biological Macromolecules M. Kessel, J. Frank, and W. Goldfarb. With 3 Figures.	154
Image Averaging of Membrane-Bound Acetylcholine Receptor from <i>Torpedo marmorata</i> H.P. Zingsheim, D.-Ch. Neugebauer, F.J. Barrantes, and J. Frank. With 3 Figures.	161

Image Recording

Current State of Biological Scanning Transmission Electron Microscopy A. Engel. With 4 Figures.	170
The Electron Utilization Efficiency in STEM R.M. Glaeser and B.K. Jap. With 4 Figures.	179
Low-Dose Image Recording by TV Techniques K.-H. Herrmann, D. Krahel, and H.-P. Rust. With 11 Figures.	186
Evaluation of Photographic Emulsions for Low-Exposure Imaging W. Chiu and R.M. Glaeser. With 1 Figure.	194
Properties of Commercial Films for Electron Microscopy M. Hahn. With 3 Figures.	200

Low Temperature Microscopy

Electron Microscopy at Liquid Helium Temperature G.M. Parkinson, W. Jones, and J.M. Thomas. With 11 Figures.	208
Use of Low Temperatures for Electron Diffraction and Imaging of Biological Macromolecular Arrays S.B. Hayward and R.M. Glaeser. With 5 Figures.	226
Reduction of Radiation Damage by Imaging with a Superconducting Lens System I. Dietrich, F. Fox, E. Knappek, R. Weyl, and J. Dubochet. With 8 Figures.	234

Image Processing

Matching and Averaging over Fragmented Lattices W.O. Saxton. With 7 Figures.	245
On the Stretching of Distorted Images of Two-Dimensional Crystals M. Heel and J. Hollenberg. With 3 Figures.	256
Methods for Averaging of Single Molecules and Lattice Fragments J. Frank and W. Goldfarb. With 4 Figures.	261

The Reconstruction of Structure from Electron Micrographs of Randomly Oriented Particles	
Z. Kam.	270
Comments on Three-Dimensional Reconstructions and Averaging	
W. Hoppe. With 3 Figures.	278
Some Unsolved Problems and Promising Methods in Electron Image Processing	
P.W. Hawkes.	288
Chairman's Account of the Discussion During the Session on Image Processing	
P.W. Hawkes.	300
Artificial Assembly of 2-D Arrays	
Crystallization Processes of Biological Macromolecules	
Z. Kam, A. Shaikevitch, H.B. Shore, and G. Feher. With 2 Figures.	302
Self-Assembly and Nucleation of a Two-Dimensional Array of Protein Subunits	
H.P. Erickson. With 3 Figures.	309
A. Simple Way of Making a 2-D Array	
W. Keegstra and E.F.J. van Bruggen. With 9 Figures.	318
The Principles of Governing Particles Aggregation in Membranes	
A.J. Verkleij. With 5 Figures.	328
Assembling of Proteins at Lipid-Monolayers	
P. Fromherz. With 11 Figures.	338
Subject Index	351
