1	General Aspects of Fractures in Child Abuse	1
1.1	Introduction	1
1.2	Incidence of Fractures in Children	2
1.3	Difference Between Fractures in Children and Adults	3
1.3.1	Fracture Type and Location	3
1.3.2	The Healing and Remodelling of Fractures	4
1.4	Fractures: Differential Diagnosis	4
1.4.1	Spontaneous Fractures: Pathological Fractures?	6
1.4.2	Cause of Fractures in Relation to Age and Level of Development	7
1.5	Fractures in Child Abuse	7
1.5.1	Specificity of Fractures in Child Abuse	9
1.5.2	The Value of Haematomas in Differential Diagnosis	9
1.5.3	Characteristics of the Anamnesis	10
1.5.4	Perpetrators and Victims	11
1.6	The Role of the Radiologist When Child Abuse Is Suspected	11
1.7	Ethical Dilemmas in Suspicion of Child Abuse	12

2.1	Introduction	15
2.2	Signs, Symptoms and Complications	15
2.3	Biomechanical Aspects of Fractures of the Cranium	15
2.3.1	Static Loading	15
2.3.2	Dynamic Loading	16
2.3.3	Possible Injuries from Dynamic Impact Loading	16
2.4	Types of Skull Fracture	18
2.4.1	Linear Fractures	18
2.4.2	Complex Fractures	20
2.4.3	Depression Fractures and Ping-Pong Deformation	20
2.5	Skull Fractures and Intracranial Injury	22
2.6	Skull Fractures: Differential Diagnosis	25
2.6.1	Skull Fractures and Child Abuse	25
2.6.2	Type of Skull Fracture and Child Abuse	25
2.6.3	Differential Diagnosis Between Non-accidental and Accidental Fractures	25

2.7	Growing Fractures of the Skull	36
2.7.1	Epidemiology	37
2.7.2	Etiology	37
2.7.3	Growing Skull Fractures and Child Abuse	37
2.7.4	Pathogenesis	38
2.7.5	Clinical Symptoms	38
2.7.6	Complications	39
2.7.7	Diagnostics and Treatment	39
2.8	The Dating of Skull Fractures	39
2.9	Basilar Fractures	40
2.9.1	'Battle's Sign'	40
2.9.2	'Raccoon's Eyes'	40
2.10	Facial Fractures and Dental Damage	40
2.10.1	Dental Trauma	41
2.10.2	Orbit and Zygomatic Arch Fractures	42
2.10.3	Fractures of the Nasal Septum	43
