|                                                             |    |
|-------------------------------------------------------------|----|
| Vor-Wort und Gebrauchsanweisung .....                       | 5  |
| 1. Liste der Begriffe                                       |    |
| Ablösung im Jugendalter/Trennung der Generationen .....     | 23 |
| Abstraktion .....                                           | 24 |
| Affektlogik .....                                           | 26 |
| Akkommodation/Assimilation .....                            | 28 |
| Allparteilichkeit .....                                     | 29 |
| analoge/digitale Kommunikation .....                        | 30 |
| Anpassung/Anpassungsfähigkeit .....                         | 32 |
| Äquifinalität/Äquipotentialität .....                       | 33 |
| Auftrag .....                                               | 33 |
| Ausstoßung .....                                            | 34 |
| Autonomie .....                                             | 35 |
| Autopoiese .....                                            | 38 |
| Beavers' System-Modell .....                                | 40 |
| Begegnungsmodell der Therapie/Heilung durch Begegnung ..... | 42 |
| Beobachtung .....                                           | 43 |
| Beziehungsethik .....                                       | 44 |
| Beziehungsgleichgewichte .....                              | 47 |
| Beziehungsmodi/Transaktionsmodi/Interaktionsmodi .....      | 47 |
| Beziehungsrealität .....                                    | 48 |
| Beziehungsstagnation .....                                  | 50 |
| bifokale Familientherapie .....                             | 51 |
| Bindung .....                                               | 52 |
| binokulare Theorie des Wandels .....                        | 55 |
| Chaostheorie/Komplexitätstheorie .....                      | 55 |
| Circumplex-Modell .....                                     | 57 |
| Code/Codierung .....                                        | 59 |
| Definition der Beziehung/Beziehungsdefinition .....         | 60 |
| Delegation .....                                            | 62 |
| diachron/synchron .....                                     | 65 |
| dialektische Methode .....                                  | 67 |
| dominant/inferior .....                                     | 68 |
| Doppelbindung/Beziehungsfalle/Zwickmühle .....              | 69 |
| Eigenwert/Eigenstruktur/Eigenverhalten/Attraktor .....      | 72 |

|                                                                |     |
|----------------------------------------------------------------|-----|
| Emergenz/emergente Eigenschaften .....                         | 74  |
| emotionale Scheidung .....                                     | 75  |
| emotionale Trennung .....                                      | 75  |
| enactment .....                                                | 76  |
| Entropie/Negentropie .....                                     | 77  |
| Entwertung .....                                               | 78  |
| Epistemologie .....                                            | 80  |
| Erstinterview .....                                            | 82  |
| Ethnomethodologie .....                                        | 82  |
| Expressed Emotions/Psychoedukation .....                       | 83  |
| Externalisierung .....                                         | 86  |
| familiärer Lebenszyklus .....                                  | 87  |
| Familiengeheimnisse .....                                      | 88  |
| Familienkonstellation/Positionen in der Geschwisterreihe ..... | 89  |
| Familienmythen .....                                           | 90  |
| Familienskulptur .....                                         | 92  |
| Familiensomatik/Familienmedizin .....                          | 93  |
| Familiensoziologie .....                                       | 96  |
| Familien-Stellen .....                                         | 100 |
| Familientests .....                                            | 101 |
| Familientypologien .....                                       | 106 |
| Familienunternehmen .....                                      | 110 |
| family lunch .....                                             | 113 |
| Feld/Feldtheorie .....                                         | 114 |
| Fluktuation/dissipative Strukturen .....                       | 115 |
| Fragen .....                                                   | 117 |
| Gegenseitigkeit, positive und negative .....                   | 118 |
| Generationsgrenzen .....                                       | 120 |
| Genogramm .....                                                | 121 |
| Gerechtigkeit .....                                            | 121 |
| Geschichten-Erzählen .....                                     | 124 |
| Gestalt/Gestalttheorie .....                                   | 125 |
| »gesunde«/funktionale Familien .....                           | 126 |
| Gleichgewicht .....                                            | 129 |
| Grenzen .....                                                  | 130 |
| Gummizaun .....                                                | 133 |
| härtere/weichere Realität .....                                | 134 |
| Harmonisierung .....                                           | 136 |
| Hierarchie .....                                               | 137 |
| Holismus .....                                                 | 138 |
| Homöostase .....                                               | 139 |

|                                                                       |     |
|-----------------------------------------------------------------------|-----|
| Hypnotherapie .....                                                   | 140 |
| Hypothesenbildung/Hypothesisieren .....                               | 142 |
| Ich-Psychologie/Ich-Funktion/Ich-Organisation .....                   | 142 |
| Identität/Selbst-Definition .....                                     | 144 |
| Indexpatient/identifizierter Patient/Symptomträger .....              | 146 |
| Individuation/bezogene Individuation/Ko-Individuation .....           | 147 |
| Information .....                                                     | 149 |
| Inhalts- und Beziehungsaspekt der Kommunikation .....                 | 151 |
| innere Familienkonferenz/inneres Familiensystem .....                 | 152 |
| innere Objekte .....                                                  | 153 |
| instruktive Interaktion .....                                         | 155 |
| Interpunktion .....                                                   | 155 |
| intersubjektive Fusion/Verschmelzung .....                            | 156 |
| invariante Verschreibung .....                                        | 157 |
| Isomorphie .....                                                      | 157 |
| Joining/therapeutisches System .....                                  | 158 |
| Kategorienbildung .....                                               | 159 |
| Koalition/Allianz .....                                               | 161 |
| Ko-Evolution .....                                                    | 162 |
| Kohärenz .....                                                        | 164 |
| Kohäsion .....                                                        | 165 |
| kollektives kognitives Chaos .....                                    | 166 |
| Kollusion .....                                                       | 167 |
| Kommunikation/Kommunikationstheorie .....                             | 170 |
| Kommunikationsabweichung .....                                        | 174 |
| Kommunikationstherapie .....                                          | 176 |
| komplementär/symmetrisch .....                                        | 177 |
| Komplexität .....                                                     | 179 |
| Konfliktorganisation/Tetralemma .....                                 | 180 |
| Konfliktumleitung .....                                               | 183 |
| Konsensus-Sensitivität/Distanz-Sensitivität/Milieu-Sensitivität ..... | 183 |
| Konstruktivismus/sozialer Konstruktivismus .....                      | 185 |
| Kontext .....                                                         | 187 |
| Kontextmarkierung .....                                               | 189 |
| kontextuelle Therapie .....                                           | 190 |
| Kontingenz .....                                                      | 191 |
| Krise .....                                                           | 192 |
| Krisen-Familientherapie .....                                         | 193 |
| Kundenorientierung .....                                              | 194 |
| Kurztherapie .....                                                    | 195 |
| Kybernetik 1. und 2. Ordnung .....                                    | 196 |

|                                                        |     |
|--------------------------------------------------------|-----|
| Lernen/Stufen des Lernens/Proto-Lernen/Deutero-Lernen/ |     |
| Lernen 0, I, II, III, IV .....                         | 198 |
| Linearität/Linealität/geradlinige Kausalität .....     | 201 |
| logische Typen .....                                   | 204 |

| isomorphism . . . . .                                         | 157 |
| joining/therapeutic system . . . . .                          | 158 |

## 2. Englische Entsprechungen zur Liste der Begriffe

|                                                                        |     |
|------------------------------------------------------------------------|-----|
| abstraction .....                                                      | 24  |
| accommodation/assimilation .....                                       | 28  |
| adaptability .....                                                     | 32  |
| affect logic .....                                                     | 26  |
| amelioration questions .....                                           | 339 |
| analogue/digital communication .....                                   | 30  |
| attribution, labelling, delineation .....                              | 356 |
| autonomy .....                                                         | 35  |
| autopoiesis .....                                                      | 38  |
| Beavers systems model .....                                            | 40  |
| behavioral marital therapy .....                                       | 340 |
| bifocal family therapy .....                                           | 51  |
| binding .....                                                          | 52  |
| binocular theory of change .....                                       | 55  |
| boundaries .....                                                       | 130 |
| brief therapy .....                                                    | 195 |
| category formation .....                                               | 159 |
| centripetal/centrifugal patterns .....                                 | 352 |
| change, first and second order .....                                   | 348 |
| chaos theory/complexity theory .....                                   | 55  |
| circular questioning .....                                             | 353 |
| circularity/recursiveness/circular causality .....                     | 355 |
| circumplex model .....                                                 | 57  |
| client orientation .....                                               | 194 |
| closeness/distance .....                                               | 230 |
| coalition/alliance/alignment .....                                     | 161 |
| code/coding .....                                                      | 59  |
| coevolution .....                                                      | 162 |
| coherence .....                                                        | 164 |
| cohesion .....                                                         | 165 |
| collective cognitive chaos .....                                       | 166 |
| collusion .....                                                        | 167 |
| communication deviance .....                                           | 174 |
| communication therapy .....                                            | 176 |
| communication, content and relational aspects .....                    | 151 |
| communication/communication theory .....                               | 170 |
| complementary/symmetrical .....                                        | 177 |
| complexity .....                                                       | 179 |
| consensus sensitivity/distance sensitivity/environment sensitivity ... | 183 |
| constructivism/social constructionism .....                            | 185 |

|                                                                                      |         |
|--------------------------------------------------------------------------------------|---------|
| justice .....                                                                        | 121     |
| learning/stages of learning/proto-learning/deutero-learning .....                    | 198     |
| ledger of merits .....                                                               | 339     |
| linearity/lineality/lineal causality .....                                           | 201     |
| liquifying .....                                                                     | 340     |
| logical types .....                                                                  | 204     |
| loyalty .....                                                                        | 207     |
| <br>malign clinch .....                                                              | <br>213 |
| mandate .....                                                                        | 33      |
| marital skew/marital schism .....                                                    | 214     |
| metacommunication .....                                                              | 219     |
| metaphor .....                                                                       | 220     |
| miracle question .....                                                               | 352     |
| models of family therapy .....                                                       | 221     |
| morphogenesis/morphostasis .....                                                     | 224     |
| mourning/operational mourning .....                                                  | 331     |
| multidirectional partiality .....                                                    | 29      |
| multigenerational perspective/families of origin/<br>multigenerational therapy ..... | <br>218 |
| multiple family therapy .....                                                        | 226     |
| multiple impact therapy .....                                                        | 227     |
| mutuality .....                                                                      | 118     |
| mystification .....                                                                  | 229     |
| <br>narrative approach .....                                                         | <br>232 |
| negation, active and passive .....                                                   | 233     |
| network therapy .....                                                                | 236     |
| networks .....                                                                       | 234     |
| neurolinguistic programming .....                                                    | 238     |
| niche (personal, dyadic, familiar) .....                                             | 242     |
| neutrality .....                                                                     | 240     |
| nonlinearity/step function .....                                                     | 241     |
| <br>object relations theory .....                                                    | <br>243 |
| observation .....                                                                    | 43      |
| operational closure .....                                                            | 246     |
| organization of conflicts/tetralemma .....                                           | 180     |
| organization/function/structure/process .....                                        | 247     |
| <br>paradigm/internal map/model .....                                                | <br>252 |
| paradoxical intervention .....                                                       | 253     |
| parentification .....                                                                | 255     |

|                                                                         |     |
|-------------------------------------------------------------------------|-----|
| pattern . . . . .                                                       | 228 |
| perturbation . . . . .                                                  | 256 |
| perverse triangle . . . . .                                             | 257 |
| positive connotation/positive interpretation/noble ascription . . . . . | 258 |
| power . . . . .                                                         | 208 |
| pragmatics . . . . .                                                    | 259 |
| prescription . . . . .                                                  | 344 |
| problem system . . . . .                                                | 259 |
| projective identification . . . . .                                     | 260 |
| pseudomutuality/pseudohostility . . . . .                               | 262 |
| psychoanalytically oriented family therapy . . . . .                    | 263 |
| psychohistory . . . . .                                                 | 266 |
| psycholinguistics/representational systems . . . . .                    | 268 |
| punctuation . . . . .                                                   | 155 |
| questions . . . . .                                                     | 117 |
| redundancy . . . . .                                                    | 271 |
| reflecting team . . . . .                                               | 271 |
| reflection . . . . .                                                    | 272 |
| reframing . . . . .                                                     | 337 |
| relational balances . . . . .                                           | 47  |
| relational ethics . . . . .                                             | 44  |
| relational modes/transactional modes/interactional modes . . . . .      | 47  |
| relational reality . . . . .                                            | 48  |
| relational stagnation . . . . .                                         | 50  |
| resistance . . . . .                                                    | 350 |
| resonance . . . . .                                                     | 278 |
| resource . . . . .                                                      | 279 |
| rigid triad . . . . .                                                   | 310 |
| ritual . . . . .                                                        | 280 |
| role . . . . .                                                          | 282 |
| rubber fence . . . . .                                                  | 133 |
| rule/family rule . . . . .                                              | 273 |
| salutogenesis . . . . .                                                 | 284 |
| scapegoat . . . . .                                                     | 318 |
| schismogenesis . . . . .                                                | 287 |
| »schizophrenogenic mother« . . . . .                                    | 289 |
| script . . . . .                                                        | 304 |
| self organization . . . . .                                             | 293 |
| self/object differentiation . . . . .                                   | 291 |
| self-esteem . . . . .                                                   | 297 |
| self-reference . . . . .                                                | 295 |

|                                                                     |     |
|---------------------------------------------------------------------|-----|
