

TABLE OF CONTENTS

1. General Considerations

B.S. Pavlov: Zero-Range Interactions with an Internal Structure	3
H. Neidhardt: Evolution Equations and Self-Adjoint Extensions	12
K.A. Makarov: Energy-Dependent Interactions and the Extension Theory	28
M. Demuth: On Perturbations for Self-Adjoint Generators of Feller Processes	40
V.D. Koshmanenko: Singular Perturbations Defined by Forms	55

2. Quantum Field Theory

R. Høegh-Krohn, S. Albeverio, K. Iwata: Covariant Markovian Random Fields in Four Space-Time Dimensions with Non-Linear Electromagnetic Interaction	69
---	----

3. Random Point Defects

S. Albeverio, R. Høegh-Krohn, R. Figari, F. Gesztesy, H. Holden, W. Kirsch: Point Interaction Hamiltonians for Crystals with Random Defects	87
B.S. Pavlov, A.E. Ryshkov: Scattering on a Random Point Potential	100

4. Few-Body Problems

Yu.A. Kuperin: Faddeev Equations for Three Composite Particles	117
R.A. Minlos: On the Point Interaction of Three Particles	138

VIII

Yu.A. Kuperin, K.A. Makarov, Yu.B. Melnikov: A Resonating-Group Model with Extended Channel Spaces	146
A.I. Mogilner: The Problem of a Few Quasi-Particles in Solid-State Physics	160

5. Contact and Surface Phenomena

B.S. Pavlov, P.B. Kurasov: Surfaces with an Internal Structure	177
M. Schröder: Spectral Properties of the Laplacian with Attractive Boundary Conditions	194
P. Exner, P. Šeba: Quantum Junctions and the Self-Adjoint Extensions Theory	203
I.Yu. Popov: The Extension Theory and Diffraction Problems	218
W. Karwowski: Hamiltonians with Additional Kinetic Energy Terms on Hypersurfaces	230

6. Waveguides and Crystals

B.S. Pavlov: Thin Lattices as Waveguides	241
P. Exner, P. Šeba, P. Šťovíček: Quantum Waveguides	257
Yu.A. Kuperin, K.A. Makarov, B.P. Pavlov: An Exactly Solvable Model of a Crystal with Non-Point Atoms	267
