

Intrapartum Biochemical Monitoring of the Fetus

Proceedings of the First International Symposium
Atlantic City, USA, June 1987

Guest Editor

Molly S. Chatterjee, M.D.
Chief, Maternal Fetal Medicine
Our Lady of Mercy Medical Center
600 East 233rd Street
Bronx, N.Y. 10466
USA

Contents

Erich Saling Preface	5
Molly S. Chatterjee Guest editorial.....	7
Abraham M. Rudolph, Harriett S. Iwamoto, David F. Teitel Circulatory Changes at Birth.....	9
Erich Saling Introduction and Clinical Aspects of Biochemical Monitoring of the Fetus.....	23
Molly S. Chatterjee Biochemical Monitoring of Intrapartum Fetus	49
Molly E. Towell The Rationale for Biochemical Monitoring of the Fetus	55
Howard M. Hochberg, Paul V. Roby, Hattie M. Snell, W. Dean Smith, Molly S. Chatterjee Continuous Intrapartum Fetal Scalp Tissue pH and ECG Monitoring by a Fiberoptic Probe	71
S. Schmidt Animal Studies for Intrapartum Biochemical Monitoring – Artificial Umbilical Circulation	87

S. Schmidt	
Methodology and Clinical Value of Transcutaneous Blood Gas Measurements in the Fetus	95
C. Nickelsen, T. Weber	
Continuous Transcutaneous Carbon Dioxide Monitoring during Human Labour	107
M. Katz, E. Lunenfeld, I. Meizner, M. Mazor, B. Piura	
Lactate in the Human Fetus	113
S. Schmidt	
Human Research on Lactate	131
Molly E. Towell	
The Relationship between Arterial and Tissue PO_2 in the Fetal Lamb	139
T. Weber, C. Nickelsen	
Tissue pH/ pCO_2 and Continuous Base Excess Monitoring in the Human Fetus	151
