

Contents

1	Introduction	1
	References	4
2	Theory	5
	2.1 Setting the Scene	5
	2.2 The Self-Correlation Function	6
	2.3 The Pair-Correlation Function	13
	References	18
3	Linking Theory to Experiments	21
	3.1 Methods for Measuring Atomic Diffusion	21
	3.2 Theory of Scattering	22
	3.3 From Particles on a Lattice to Solid Matter	25
	3.4 Coherent and Incoherent Scattering	27
	3.5 Correlated Jumps	28
	3.6 Theory of XPCS	29
	References	32
4	Characteristics of Diffusion in Selected Systems	33
	4.1 An Open System: $\text{Si}_x\text{Ge}_{1-x}$ with the Diamond Lattice	33
	4.2 A Triple Defect System: Ni-Rich B2 NiAl	36
	4.3 A Short-Range Ordered System: $\text{Cu}_{90}\text{Au}_{10}$	43
	4.4 A Model of an Amorphous System	46
	References	48
5	Data Evaluation	51
	5.1 Raw Data Files	51
	5.2 Subtracting the Dark Current	53
	5.3 Histogram of the Droplet Charges	56
	5.4 Detecting Photon Events	58

5.5	Computing the Auto-Correlation Function	59
5.6	Fitting the Auto-Correlation Functions	63
	References	64
6	Considerations Concerning the Experiment.	65
6.1	Counting Noise	65
6.2	Optics and Contrast	68
	References	74
7	Experimental Results	75
7.1	$\text{Cu}_{90}\text{Au}_{10}$	75
7.2	$\text{Fe}_{65}\text{Al}_{35}$	79
7.3	$\text{Si}_{89}\text{Ge}_{11}$	81
7.4	The Metallic Glass $\text{Zr}_{65}\text{Cu}_{17.5}\text{Ni}_{10}\text{Al}_{7.5}$	83
	References	85
8	Outlook	87
	Appendix	89
	Curriculum Vitae	95
