Contents

I. Separability in Many-Electron Problem: Size Extensivity and Size-Consistency 1

Separability Problem in General Many-Electron Systems (*R. Chowdhuri, D. Mukherjee and M.D. Prasad*) 3

Quantum Chemistry in Fock Space (*W. Kutzelnigg*) 35

Size Extensivity Correction for CI Energies Based on Complete Active Space Reverence Functions (*J. Simons*) 69

II. Many-Body Perturbation Theory and Coupled-Cluster Theory of Atomic and Molecular Electronic Structure 77

Dynamic Variational Principles and Extended Coupled Cluster Techniques (*R.F. Bishop, J. Arponen and E. Pajanne*) . . 79

SAC-CI Calculations of the Excited and Ionized States of Conjugated Molecules (*H. Nakatsuji, O. Kitao and M. Komori*) 101

Atomic and Molecular Application of Effective Hamiltonian Formalism in Complete and Incomplete Model Spaces (*S. Koch*) 123

Applications of Multi-Reference Coupled-Cluster Theory (*R. Mattie, M. Rittby, R.J. Bartlett and S. Pal*) 143

Applications of the Open-Shell Coupled-Cluster Method (*U. Kaldor*) 155

An Explicitly Connected MBPT for Incomplete Model Space (*R. Chowdhuri, D. Mukhopadhyay and D. Mukherjee*) . . . 165

III. Propagators in Bound States and Resonances 185

Propagators for Molecular Electronic Spectra (*Y. Öhrn*) 187

Transition Moments in RPA-like Approximations (*J. Oddershede and P.W. Sengeløv*) 207

Application of One Electron Propagator Method in the Treatment of Resonances (*M. Mishra*) 223

IV. Condensed Matter and Related Topics 239

Quantum Fluid Dynamics: An Extended Coupled-Cluster Treatment (*R.F. Bishop, N.I. Robinson, J. Arponen and E. Pajanne*) 241

Quasiparticles in Extended Systems – A Coupled-Cluster Approach (*L.Z. Stolarczyk and H.J. Monkhorst*) 261

Electronic Structure and Spectra of Polyenes (*S. Ramasesha*) 281

Proton Transfer in Water and Ice: Solitonic Models for Structural Defects in the Hydrogen-Bonded Network (*E.S. Kryachko*) 301

V. Many-Body Methods in Dynamical Processes 319

On the Development of Time Dependent Cluster Expansion Techniques for Molecular Dynamics (*M.D. Prasad*) 321

Electrochemical Electron Transfer: Accounting for Non-Adiabaticity Using a Bosonised Hamiltonian (*K.L. Sebastian*) 333

VI. Relativistic Methods with Applications 351

Generalization of Kato's Cusp Conditions to the Relativistic Case (*W. Kutzelnigg*) 353

Relativistic and Non-Relativistic Many-Body Procedure, Applied to Atomic Systems (*I. Lindgren*) 367

Relativistic Equations of Motion Method (*S.N. Datta*) 393

Relativistic Many-Body Theory of Electric Dipole Moment of Atoms due to Parity and Time-Reversal Violation (*B.P. Das*) 411

VII. Group-Theoretic Techniques 417

Spinor Basis in Electron Correlation Studies (*C.R. Sarma*) 419

On the Unitary Group and Associated Operators (*A. Mukhopadhyay*) 425

VIII. Few-Body Methods, Large-N Expansion and Other Mathematical Topics 443

Hyperspherical Harmonics Methods for Few- and Many-Body Problems (*T.K. Das*) 445

Large-N Expansions (*A. Chatterjee*) 463

Application of Catastrophe Theory to Molecules (*F.V. Kusmartsev*) 483

IX. Densities and Density-Functionals 501

Modern Developments in the Energy Density Functional Theory of Many-Electron Systems (*E.S. Kryachko*) 503

Interconnections between Electron Densities in Position and Momentum Spaces (*S.R. Gadre and R.K. Pathak*) 523

Aspects of Density Functional Approach to Many-Electron Systems (*S.K. Ghosh*) 541
