Requirements and Solutions for a More Knowledgeable User-Model Dialogue in Applied Simulation	1
Gaby Neumann and Juri Tolujew	
1 Introduction and Motivation	1
2 Knowledge and Knowledge Management in Simulation Projects	3
3 Case Study on the Human Impact in Simulation Projects	6
4 Needs and Challenges in Model-User Interaction	9
4.1 Model-User Interaction for Model-Building	9
4.2 Model-User Interaction for Deriving Simulation Results	11
4.3 Needs for Supporting Model-User Interaction	13
5 Approaches for Mediating between User and Model in a Simulation Project	13
5.1 Methods and Tools for Accessing Simulation Knowledge	14
5.2 Structured Documentation for Formalising Simulation Knowledge	15
5.3 Approaches for Benefiting from Users' Intuition and Experience in Simulation Experimentation	18
6 Conclusions	22
References	24
Simulating Entrepreneurial Opportunity Recognition Processes: An Agent-Based and Knowledge-Driven Approach	27
Martin Ihrig	
1 Introduction	27
2 Conceptual Background	28
3 The Simulation Software <i>SimISpace2</i>	29
3.1 Basics	30
3.2 Agents' Actions	31

4	The Simulation Model <i>SimOpp</i>	33
4.1	Agents	33
4.2	Knowledge	35
5	Putting <i>SimOpp</i> to Use: Two Virtual Experiments	38
5.1	Virtual Experiment 1: No Knowledge-Spillovers	38
5.2	Virtual Experiment 2: Knowledge-Spillovers	40
5.3	Opportunity Construction, Acquisition, and Amplification	42
6	Extending <i>SimOpp</i> : Simulating <i>International Opportunity</i> Recognition and Knowledge Spillovers	46
6.1	Modeling the International Scenario	47
6.2	The Base-Line Scenario	48
6.3	Exploring Entrepreneurial Strategies in an International Environment	49
7	Conclusion	52
