

CONTENTS

CHAPTER 1	INTRODUCTION.....	1
1.1	Statement of the problem.....	1
1.2	Limit equilibrium methods	3
1.3	Finite element method.....	5
1.4	Boundary element method.....	9
CHAPTER 2	BASIC THEORY AND TECHNIQUES OF BOUNDARY ELEMENT METHOD.....	11
2.1	Governing equations.....	11
2.2	Integral equations.....	13
2.3	Fundamental solutions.....	14
2.3.1	Kelvin's solution(2D).....	15
2.3.2	Melan's solution.....	16
2.4	Implementation of the boundary element method.....	19
2.4.1	Boundary integral equations.....	19
2.4.2	Numerical implementation.....	20
2.4.3	Subregions.....	23
CHAPTER 3	GALERKIN TENSOR AND TRANSFORMATION OF BODY FORCE INTEGRAL.....	24
3.1	Transformation of body force integral.....	24
3.2	Galerkin tensor.....	36
3.3	Gravitational force integral for the half plane.....	27
3.4	Examples.....	33
3.4.1	Shallow tunnel.....	34
3.4.2	Vertical slope.....	41
CHAPTER 4	DIRECT BOUNDARY ELEMENT APPROACHES FOR SLOPE STABILITY ANALYSIS.....	47
4.1	Formulations of the plastic ratio method.....	47
4.2	Calculations of the excess stresses.....	51
4.3	Implementation.....	54
4.4	Plastic ratio.....	55
4.5	Examples.....	59
4.5.1	Slope in homogeneous cohesive soil.....	59
4.5.2	Vertical slope in soil with friction.....	68
4.6	Slope analysis using the joint elements.....	71
4.7	Elastoplastic analysis of slope stability.....	74
CHAPTER 5	INDIRECT BOUNDARY ELEMENT ALGORITHM FOR SLOPE STABILITY ANALYSIS.....	82
5.1	Introduction.....	82
5.2	Constant quadrupole element.....	83
5.3	Indirect boundary element algorithm.....	87
5.4	About redistributions of excess stresses.....	89

5.5	Slope stability analysis.....	93
	Example 5-1.....	95
	Example 5-2.....	95
	Example 5-3.....	97
CHAPTER 6	GENERAL CONCLUSIONS.....	98
REFERENCES.....		100
APPENDIX A	DISPLACEMENTS OF MELAN'S SOLUTION DEDUCED FROM THE CORRESPONDING AIRY'S FUNCTIONS.....	107
APPENDIX B	DEVELOPMENTS OF GALERKIN TENSOR CORRESPONDING TO MELAN'S SOLUTION.....	143
