Glossary	XV
1 Introduction	1
2 Characterization of Substituents by Patterns and Recognition of ALTERNATIVE PRINCIPLES	9
2.1 Correlation with the Parameter Sets $\Theta$ and $\chi$ by Tolman	13
2.2 Systematic Variations at Tetrahedral Centers: A New Parameter Set $\Delta$	14
2.3 The Importance of the Representative Substituents -OMe/-SMe and -CMe <sub>3</sub> /-SiMe <sub>3</sub>	18
2.4 The Importance of P- and $\Delta$ -parameter Sets for Pattern Comparison	24
2.5 The Importance of Compensation Phenomena	24
2.6 Further Characterization of Substituents by Pattern Comparison	28
2.7 Conformational Changes in Phenyl Systems	32
3 Examples of Absolute, Alternative Orders in Chemical Systems by Pairs and Alternating Classes of ALTERNATIVE PRINCIPLES	37
3.1 Examples for the Absolute, Alternative Effects by ACC/DO Heteroatoms	37
3.2 Separation of Main Group and Transition Metal Elements in Four Sectors (PSE-sectors)	40
3.3 Errors of Logical Typing in DO/ACC Alternatives	47
3.4 The Alternative Principles EVEN/ODD	47
3.5 Aspects of Coupling Chemical Subsystems: The Alternative Principles OPEN/CYCLIC	52
3.6 The Metala-Logy Principle	55
3.7 The Principle of Alternative Positions	60
3.8 The Alternative Principles IONIC/COVALENT	61

4	Representation of Differentiation and Compensation of ALTERNATIVE PRINCIPLES	67
4.1	On the Definition of Paritetic and Complementary ALTERNATIVE PRINCIPLES and their Effects	67
4.2	Differentiation and Compensation of Two Pairs of ALTERNATIVE PRINCIPLES	70
4.3	Alternative Patterns by Classes of ALTERNATIVE PRINCIPLES	73
4.4	Symmetric/Antisymmetric Coupling of Two Pairs of ALTERNATIVE PRINCIPLES	76
4.5	Representation in Hierarchically Ordered, Multi-dual Decision-trees	80
5	Representative Examples of Multi-dual Decision – Trees: A Generalization of Phase Relation Rules	83
5.1	The Control of Elimination Reactions by ALTERNATIVE PRINCIPLES	83
5.2	The Alternative Control of Knoevenagel Versus Michael Reaction of Mesityloxide	87
5.3	Control of Asymmetric Synthesis in a Metal-induced Ketone Synthesis	92
5.4	Influence on Structures and Processes in Transition Metal Complexes	103
5.5	A Comparison of the Catalytic Oligomerizations of Propanal	107
6	The Discontinuous Method of INVERSE TITRATION	109
6.1	Evidence in Support of Concentration Effects: A Summary	109
6.2	Examples for the Application of INVERSE TITRATION	117
6.2.1	Application of INVERSE TITRATION in Metal Catalysis	117
6.2.2	Application of the INVERSE TITRATION in Organic Syntheses	122
6.2.3	Application of INVERSE TITRATION in SYSTEM ENLARGEMENT	127
6.2.4	Application of INVERSE TITRATION for the Proof of the Influence of Catalyst Poisons	130
6.2.5	Aspects in Application of INVERSE TITRATION for the Ni-ligand Modified Catalytic Propene Dimerization	132
6.3	Outlook and Unsettled Problems	134

7	Molecular Architecture: Some Definitions	136
7.1	Structure of the Whole System	136
7.2	Intermolecular SYSTEM ENLARGEMENT	138
7.3	Intramolecular SYSTEM ENLARGEMENT and VARIATION: Substitution of Hydrogen by Substituents and Carbon by Heteroatoms	142
7.4	Coupling of Subsystems	144
7.5	Symmetry Aspects in the Coupling of Chemical Subsystems	147
8	Models and Methods for the Understanding of Self-organization and Synergetics in Chemical Systems	149
8.1	The Ordering CONCEPT OF ALTERNATIVE PRINCIPLES in a Comprehensive Form	149
8.2	Some Statements to the Application of the CONCEPT OF ALTERNATIVE PRINCIPLES	153
8.3	Application of the CONCEPT OF ALTERNATIVE PRINCIPLES as Compensation Strategy	156
9	Information from Alternatives in Biochemistry	165
9.1	Alternative Information on Nucleic Acids and $\alpha$ -Amino-Carboxylic Acids	165
9.2	Alternative Information at Bio-membranes	169
9.3	Chirality, an Error in Logical Typing	172
9.4	Restriction of the Number of Realizations in Evolved Systems	172
10	Acknowledgements and Petition	175
11	Appendix	181
12	References	186
13	Epilogue	195
	Subject Index	211
