|------------------------------------------------|-----------|
| <b>Preface</b> .....                           | <b>XI</b> |
| <br>                                           |           |
| <b>1 Aetiology</b> .....                       | <b>1</b>  |
| Pathology .....                                | <b>1</b>  |
| Cause of Displacement .....                    | <b>2</b>  |
| Acetabular Dysplasia .....                     | <b>2</b>  |
| Capsular Laxity .....                          | <b>2</b>  |
| Position .....                                 | <b>3</b>  |
| Intrauterine Compression .....                 | <b>4</b>  |
| Time of Displacement .....                     | <b>4</b>  |
| Direction of Displacement .....                | <b>4</b>  |
| Posterior .....                                | <b>4</b>  |
| Inferior .....                                 | <b>5</b>  |
| Anterior .....                                 | <b>6</b>  |
| Mechanism of Displacement .....                | <b>8</b>  |
| References .....                               | <b>11</b> |
| <br>                                           |           |
| <b>2 Age 0–9 Months</b> .....                  | <b>13</b> |
| Early Diagnosis .....                          | <b>13</b> |
| Examination .....                              | <b>14</b> |
| Treatment .....                                | <b>16</b> |
| Complications .....                            | <b>17</b> |
| Tightness of the Adductor Muscles .....        | <b>17</b> |
| The Unreduced Hip .....                        | <b>18</b> |
| Redisplacement .....                           | <b>19</b> |
| Results of Early Diagnosis and Treatment ..... | <b>23</b> |
| Results of Later Treatment .....               | <b>25</b> |
| References .....                               | <b>27</b> |
| <br>                                           |           |
| <b>3 The Secondary Changes</b> .....           | <b>29</b> |
| Ossification .....                             | <b>29</b> |
| Soft Tissues .....                             | <b>32</b> |
| Deformity of the Acetabulum .....              | <b>33</b> |

|                                                          |                |
|----------------------------------------------------------|----------------|
| Upper End of the Femur .....                             | 38             |
| References .....                                         | 39             |
