

Contents

Part I	Dynamics of Macro- and Microphase Separation	
Phase Transitions of Block Copolymer/Homopolymer Mixtures By T. Hashimoto, H. Tanaka, and N. Iizuka (With 6 Figures)		2
Microphase Separation in Block Copolymers: Recent Developments By G.H. Fredrickson, E. Helfand, F.S. Bates, and L. Leibler		13
Some Dynamical Aspects of Phase-Separating Polymer Blends and Block Copolymers By K. Kawasaki and K. Sekimoto		20
Phase Separation and Microdomain Formation in Block Copolymer Blends By M.D. Whitmore (With 3 Figures)		30
Time Evolution of the Structure Function in the Late Stage of the Phase Separation Process in Polymer Mixtures By T. Nose (With 6 Figures)		40
Scaled Correlation Function in the Late Stage of Spinodal Decomposition By T. Ohta and H. Nozaki (With 6 Figures)		51
Field Theoretic Approach to Spinodal Decomposition By T. Ohtsuki and T. Keyes		58
Part II	Structure Formation in Gels	
Dynamic Scaling for Polymer Gelation By M. Rubinstein, R.H. Colby, and J.R. Gillmor (With 3 Figures) . . .		66
Theory of Thermoreversible Gelation By F. Tanaka and A. Matsuyama (With 3 Figures)		75
Ion Complexation and Phase Separation in Aqueous Polymer Solutions By L. Leibler and E. Pezron (With 3 Figures)		85

On Some New Problems in Gels near the Volume Phase Transition By A. Onuki (With 3 Figures)	94
Pattern Formation in Bulk Gels By K. Sekimoto and K. Kawasaki (With 3 Figures)	105

Part III Dynamics of Entangled Polymers

Theory of the Dynamics of Entangled Wormlike Surfactant Micelles By M.E. Cates	116
Reptation Theory of Gel Electrophoresis By M. Doi (With 4 Figures)	124
Molecular Theory of the Entanglement Effect of Rodlike Polymers: Two Alternative Approaches By I. Teraoka and R. Hayakawa (With 3 Figures)	132
Polymers in Disordered Porous Solids By A. Baumgärtner (With 4 Figures)	141

Part IV Polymer Adsorption

Copolymer Adsorption By J.F. Joanny and C.M. Marques (With 2 Figures)	152
Competitive and Displacement Adsorption of Polymer Chains at Solid- Liquid Interfaces By M. Kawaguchi (With 8 Figures)	162
Polymer Statics and Solvable Lattice Models By J. Suzuki (With 5 Figures)	170

Part V Chain Conformation in Stiff-Polymer Solutions

Stiff-Chain Polymers and Excluded-Volume Effects in Dilute Solution By T. Norisuye (With 6 Figures)	178
Structure of Polyelectrolyte Solutions By P. Pincus	187

Coherent-Anomaly Method in Cooperative Phenomena: Some Applications to Polymer Physics	
By Xiao Hu and M. Suzuki (With 6 Figures)	188
Disclinations in Nematics in Cylindrical Geometry	
By H. Tsuru (With 2 Figures)	198
Index of Contributors	207
