

TABLE OF CONTENTS

OPERATING SYSTEMS AND DATA ORGANIZATION

ITOSS : an integrated toolkit for operating systems security M. Rabin, J.D. Tygar	2
Heuristic reorganization of clustered files P. Scheuermann, Y.C. Park, E. Omiecinski	16
Cluster mechanisms supporting the dynamic construction of complex objects H. Schöning, A. Sikeler	31

DATA ORGANIZATIONS FOR EXTENDED DBMSs

Query optimization in an extended DBMS B.C. Ooi, R. Sacks-Davis	48
An algorithm for insertion into a lattice: application to type classification M. Missikoff, M. Scholl	64
Duplicate detection and deletion in the extended NF ² data model K. Küspert, G. Saake, L. Wegner	83

EFFICIENCY OF DATA ORGANIZATIONS

Fast exchange sorts N. Dershowitz, H.W. Leong	102
Efficient organization of semantic databases N. Rishe	114
The path length of binary trees R. Klein, D. Wood	128

NEW TECHNOLOGIES

Efficient multiresolution image processing on hypercube connected SIMD machines L.S. Davis, P.J. Narayanan	138
A heuristic for channel routing E. Lodi, F.P. Preparata	155

BASIC DATA STRUCTURES

A language for the P-ary trees - Application to the dynamic virtual hashing methods G. Levy	172
Dynamic external hashing with guaranteed single access retrieval M.V. Ramakrishna, W.R. Tout	187
Partial-match retrieval for dynamic files using linear hashing with partial expansions K. Ramamohanarao, J. Sheperd, R. Sacks-Davis	202

SHORT PRESENTATIONS

An analytical model of a deferred and incremental update strategy for secondary indexes E. Omiecinski, W. Liu, I. Akyildiz	218
A compact multiway merge sorter using VLSI linear-array comparators T. Satoh, H. Takeda, N. Tsuda	223
Using logarithmic code-expansion to speedup index access and maintenance M.L. Kersten	228
Concurrency in multidimensional linear hashing M. Ouksel, J. Abdul-Ghaffar	233
Retrieving of parts with geometric similarity R. Schneider, H.-P. Kriegel, B. Seeger, S. Heep	241
Search for multi-component objects in large spatial databases S. Menon, T.R. Smith	246
Optimization at a high level of abstraction I. Richard, E. Milgron	252
A spatial database shell for relational database management systems D.J. Abel	257

DATA ORGANIZATIONS FOR LOGIC PROGRAMMING

Une introduction à Prolog III	
A. Colmerauer	264
Prolog programs and standard data bases	
A. Caloini, S. Mainetti, P. Paolini	289
A distributed locking algorithm for a transactions system in flat concurrent prolog	
E. Reches, E. Gudes, E. Shapiro	304

MULTIDIMENSIONAL DATA

Advances in the design of the BANG file	
M.W. Freeston	322
Manipulating three-dimensional triangulations	
E. Bruzzone, L. de Floriani, E. Puppo	339
The arc tree: an approximation scheme to represent arbitrary curved shapes	
O. Günther, E. Wong	354

ENGINEERING THE OBJECT ORIENTED DBMSs

Behavior analysis of object-oriented databases : method structure, execution trees and reachability	
R. Hull, K. Tanaka, M. Yoshikawa	372
Engineering the object-relation database model in O-raid	
P. Dewan, A. Vikram, B. Bhargava	389
ROOST : A relational object oriented system	
N. Roussopoulos, H.S. Kim	404

INTERFACES AND FORMAL MODELS

Complex-statistical-table structure and operators for macro statistical databases	
L. Lakhal, R. Cicchetti, S. Miranda	422
A domain theoretic approach to incomplete information in nested relational databases	
M. Levene, G. Loizou	439
A formal definition of binary topological relationships	
M.J. Egenhofer	457

NEW APPLICATIONS

Applying neural computing to expert system design: coping with complex sensory data and attribute selection	
H. Tirri	474

DATA SHARING

A concurrency control algorithm for memory-resident database systems	
T.J. Lehman, M.J. Carey	490
Timestamp ordering concurrency control mechanisms for transactions of various length	
X. Zhong, Y. Kambayashi	505
Shared VS separate inverted files	
E. Grazzini, F. Pippolini	517
