1. Magnetic Superconductors. By M.B. Maple and Ø. Fischer	1
1.1 Introduction	1
1.2 How The Problem of Magnetic Superconductors Originated	1
1.3 Pairbreaking Effects—Impurities and External Fields	2
1.4 Impact of Ternary Rare Earth Compounds	3
1.5 Antiferromagnetic Superconductors	4
1.6 Ferromagnetism and Superconductivity	5
1.7 Superconductivity and Competing Magnetic Interactions	7
1.8 Concluding Remarks	8
References	8
 2. Systematics of Superconductivity in Ternary Compounds	
By D.C. Johnston and H.F. Braun (With 20 Figures)	11
2.1 Review of Superconductivity in Ternary Compounds by Structure Class	12
2.1.1 Compounds with MT_4B_4 Stoichiometry	12
a) Primitive Tetragonal $CeCo_4B_4$ Structure	12
b) Body-Centered-Tetragonal $LuRu_4B_4$ Structure	16
c) Orthorhombic $LuRh_4B_4$ Structure	22
d) Other MT_4B_4 Structure Types	23
2.1.2 Orthorhombic $LuRuB_2$ Structure	23
2.1.3 $CeCo_3B_2$ and Related Structures	25
a) Hexagonal $CeCo_3B_2$ Structure	25
b) Monoclinic $ErIr_3B_2$ Structure	27
c) Hexagonal $Ba_{2/3}Pt_3B_2$ and $LaRu_3Si_2$ Structures	27
d) Other MT_3B_2 Variants	29
e) Hexagonal $ZrRuSi$ Structure	29
2.1.4 Primitive Cubic $Pr_3Rh_4Sn_{13}$ and Related Structures	31
a) $Pr_3Rh_4Sn_{13}$ Structure	31
b) Ternary Compounds Related to $Pr_3Rh_4Sn_{13}$ -Type Materials	32
2.1.5 Primitive Tetragonal $Sc_2Fe_3Si_5$ Structure	33
2.1.6 Primitive Tetragonal $Sc_5Co_4Si_{10}$ Structure	35

2.2 Concluding Remarks	36
2A. Appendix: Tables of Crystallographic, Superconducting and Magnetic Data for 14 Classes of Ternary Compounds	38
References	51
3. Critical Fields of Ternary Molybdenum Chalcogenides	
By M. Decroux and Ø. Fischer (With 26 Figures)	57
3.1 Overview of Experimental Results	57
3.2 Summary of Theory	60
3.2.1 Ginzburg-Landau Theory	60
3.2.2 Microscopic Theory	64
a) Isotropic, Weak Coupling Superconductors	64
b) Strong-Coupling and Exchange Effects	68
c) Anisotropy and Multiband Effects	69
3.3 The Role of Impurities	72
3.3.1 Mo_6Se_8	72
3.3.2 PbMo_6S_8	78
3.4 Anisotropy	79
3.4.1 $\text{M}_x\text{Mo}_6\text{X}_8$ Compounds	79
3.4.2 $\text{Tl}_2\text{Mo}_6\text{Se}_6$	81
3.5 The Temperature Dependence of H_{c2} and the Question of the Paramagnetic Limitation	82
3.6 Compounds with Magnetic Ions. The Jaccarino-Peter Effect	87
3.7 Critical Currents and the Problem of Wire Production	93
References	96
4. Superconductivity, Magnetism and Their Mutual Interaction in Ternary Rare Earth Rhodium Borides and Some Ternary Rare Earth Transition Metal Stannides	
By M.B. Maple, H.C. Hamaker, and L.D. Woolf (With 27 Figures)	99
4.1 Background	99
4.2 Ternary RERh_4B_4 Compounds	102
4.2.1 Nonmagnetic Superconducting RERh_4B_4 Compounds: RE = Lu, Y	102
4.2.2 Rate of Depression of T_c in $(\text{Lu}_{1-x}\text{RE}_x)\text{Rh}_4\text{B}_4$	104
4.2.3 Ferromagnetic Nonsuperconducting RERh_4B_4 Compounds: RE = Gd, Tb, Dy, Ho	105
4.2.4 Ferromagnetic Superconducting RERh_4B_4 Compounds: RE = Er	108
4.2.5 Antiferromagnetic Superconducting RERh_4B_4 Compounds: RE = Nd, Sm, Tm	117
4.3 Pseudoternary RERh_4B_4 Compounds	123
4.3.1 $(\text{RE}_{1-x}\text{RE}'_x)\text{Rh}_4\text{B}_4$ Compounds	123
4.3.2 $\text{RE}(\text{M}_x\text{Rh}_{1-x})_4\text{B}_4$ Compounds	130

4.4 Ternary REM_xSn_y Compounds	133
4.5 Summary	135
References	137
5. Superconductivity and Magnetism in $(\text{RE})\text{Mo}_6\text{X}_8$ Type Compounds	
By M. Ishikawa, Ø. Fischer, and J. Müller (With 17 Figures)	143
5.1 Ternaries	144
5.1.1 Re-Entrant Superconductors	144
5.1.2 Antiferromagnetic Superconductors	147
5.1.3 Other Ternaries with Ce, Eu, Tm and Yb	151
5.2 Pseudoternaries	153
5.3 Analysis of Upper Critical Field Curves	155
5.4 Overview of Exchange Interactions in $(\text{RE})\text{Mo}_6\text{X}_8$ Compounds	160
5.5 Summary	163
References	163
6. Electronic Structure and Superconductivity/Magnetism in Ternary Compounds	
By A.J. Freeman and T. Jarlborg (With 11 Figures)	167
6.1 Theoretical Approach	169
6.1.1 Local Density and Local Spin-Density Formalism	169
6.1.2 Linearized Muffin-Tin Orbital Method	171
6.2 Chevrel Phase Compounds	173
6.2.1 Energy Band Calculations	173
6.2.2 Results for the Paramagnetic States	175
a) Band Structure, Density of States and Resulting Properties	175
b) Intra-Cluster Versus Inter-Cluster Effects and Superconductivity	181
c) Charge Transfer and Magnetic Isolation	181
d) Magnetic Response of Conduction Electrons: Stoner Factor	183
e) Superconductivity: Calculation of Electron-Phonon Coupling Parameter λ	184
6.2.3 Results for Ferromagnetic Structures	186
a) Spin-Polarized Band Structure and Magnetization	186
b) Increase of H_{c2} with Doping of Magnetic Impurities: Jaccarino-Peter Mechanism	188
c) Hyperfine Fields	188
6.3 Ternary Rhodium Borides	190
6.3.1 Energy Band Calculations	190
6.3.2 Energy Band Results	191
6.3.3 Magnetic Ordering	193
6.3.4 Superconductivity	194

6.3.5	Effect of Local Moments on T_C	195
6.3.6	Re-Entrant Magnetism in ErRh_4B_4	196
6.3.7	Mixed State of Magnetism and Superconductivity in ErRh_4B_4	197
References		199
7.	NMR and Mössbauer Studies in Ternary Superconductors . By F.Y. Fradin, B.D. Dunlap, G.K. Shenoy, and C.W. Kimball (With 11 Figures)	201
7.1	Mössbauer Effect Studies of Local Vibrational Modes	202
7.2	Conduction Electron-Local Moment Interactions in Paramagnetic Ternary Compounds	207
7.2.1	Chevrel Phases	207
7.2.2	Rhodium Borides	212
7.3	Local Moments in Magnetically Ordered Rare-Earth Compounds	216
7.3.1	Hyperfine Fields and Magnetic Moments	216
7.3.2	Rare-Earth Rhodium Borides	218
7.3.3	Ternary Silicides	221
7.3.4	Ternary Stannides and Chevrel Phase Compounds	222
7.4	Crystal Chemistry and Charge Transfer	223
7.5	Conclusions	226

9.1	Influence of Spin Scattering on Superconductivity	251
9.1.1	Electron-Spin Susceptibility	251
a)	No Spin-Orbit and Exchange Scattering	253
b)	Finite Spin-Orbit and Exchange Scattering	254
9.1.2	Paramagnetic Phase	255
a)	Static Approximation	257

b) Dynamic Correlations	258
9.1.3 Magnetically-Ordered Systems	260
a) Uniform Exchange Field	260
b) Antiferromagnetic Order	263
9.2 Magnetic Structures in Superconductors Resulting From Exchange Interactions	270
9.2.1 Anderson-Suhl Cryptoferromagnetism	271
9.2.2 Ginzburg-Landau Regime	271
9.2.3 Phase Diagram for Cryptoferromagnetic Spin Structures	275
9.3 The Magnetic State in the Presence of Electromagnetic Coupling ...	277
9.3.1 Ginzburg-Landau Functional	277
9.3.2 Survey of Solutions of the Ginzburg-Landau Equations	279
9.3.3 Inhomogeneous Phases	281
a) Blount-Varma Theory	282
b) Vortex States	283
c) Influence of Fluctuations	285
9.4 Alternative Forms of Pairing States	289
9.4.1 Ground States with Finite Pairing Momentum	289
9.4.2 P-Wave Pairing	290
