

Contents

1	Axonal Regeneration in the Peripheral Nervous System	1
1.1	Anatomical Basics	1
1.1.1	Peripheral Nerve Histology	11
1.2	Clinical Basics	14
1.2.1	Classification and Diagnosis of Nerve Injuries	15
1.3	Cellular and Molecular Basics	20
1.3.1	The Neuronal Response to Axonal Injury	21
1.3.2	The Importance of Glia for Axonal Regeneration	33
1.3.3	Peripheral Nerve Regeneration in Old Age	37
1.3.4	Successful Regeneration Requires Axonal Degeneration	39
1.3.5	Growth Factors and Cytokines Promote Regeneration	40
1.3.6	Three Problems: Growth Inhibition, Branching, and Unspecificity	44
1.3.7	Intrinsic Neuronal Mechanisms of Axonal Regeneration	48
1.3.8	Preferred Regeneration of Target Tissues by Functionally Appropriate Axons	58
1.3.9	Growth Factors are Differentially Expressed	61
1.4	Neuroplasticity in the CNS After Peripheral Nerve Lesion	62
1.4.1	Cortical Plasticity as a Cause of Chronic Pain	64

1.4.2	Mediators of Axotomy-Induced Neuroplasticity in the CNS	68
1.5	Treatment of Peripheral Nerve Injury	69
1.5.1	Surgical Care of Injured Peripheral Nerves	70
1.5.2	Nerve Bridging (Conduits)	71
1.5.3	Neurotrophic Factors	73
1.5.4	Pharmaceuticals	75
1.5.5	Transplantation of Glia and Stem Cells	79
1.5.6	Stimulation of Injured Nerves and Denervated Muscles	81
1.5.7	Aids and Bioprostheses	83
1.5.8	Modern Rehabilitation Methods	86
1.5.9	Treatment of Neuropathic Pain	87
	Further Reading	88
2	Axonal Regeneration in the Central Nervous System	95
2.1	Anatomical Basics	95
2.1.1	Microscopic Anatomy of the Spinal Cord	96
2.2	Clinical Basics	99
2.2.1	Classification and Symptoms of Spinal Cord Injury	100
2.3	Cellular and Molecular Basics	104
2.3.1	Histopathology of Spinal Cord Injury	105
2.3.2	Differences between Peripheral and Central Axon Regeneration	108
2.3.3	The Neural Response to Axotomy in the CNS	110
2.3.4	Transcription Factors and Epigenetic Regulators in the Injured CNS	112
2.3.5	Limitation of Axonal CNS Regeneration in Aging	113
2.3.6	Extrinsic Inhibitors of Axonal Regeneration in the CNS	114
2.3.7	Mechanisms of Action of Extracellular Growth Inhibitors	116
2.3.8	Causes of Axonal Regeneration Blockade in the CNS	117
2.3.9	Neuroplastic Changes Occur Throughout Life	120
2.4	Therapy of the Spinal Cord Lesion	121
2.4.1	Approach in the Acute and Chronic Phase of a Spinal Cord Injury	122
2.4.2	Neurotrophic Factors	126
2.4.3	Neuroprotective Drugs	131
2.4.4	Interference with Inhibitors of Axonal Regeneration	132

	Contents	xi
2.4.5	Exogenous Matrix and Biopolymers	135
2.4.6	Cellular Transplants and Stem Cells	137
2.4.7	Electrical and Non-Electrical Stimulation (Neuromodulation)	144
2.4.8	Bioprotheses	145
	Further Reading	151
3	Axonal Regeneration in the Nervous System—Quo Vadis?	157
3.1	Conceptual Problems	158
3.2	The Experimental Models for Investigating Axonal Regeneration	159
3.3	Ethics and Significance of Animal Experiments	163
3.4	The Problem of Transferring Animal Experiments to Humans	165
	Further Reading	170
	Glossary	171
