Introduction — V

Notations and abbreviations — XVII

1	Periodically stationary multi-seasonal increments of stochastic sequences — 1
1.1	Stochastic sequences with periodically stationary generalized multiple increments — 1
1.1.1	Generalized multiple increment sequence — 1
1.1.2	Definition and spectral representation of periodically stationary GM increments — 3
1.1.3	Moving average representation of vector stationary GM increment — 8
1.2	Stochastic sequences with fractional multiple increments — 10
2	Extrapolation of sequences with periodically stationary increments — 15
2.1	Hilbert space projection method of extrapolation — 15
2.1.1	Extrapolation of multidimensional stationary GM increment — 15
2.1.2	Estimates of the functional $A_N \vec{\xi}$ and the value $\xi_p(N)$ — 22
2.1.3	Extrapolation of sequences with periodically stationary GM increment — 27
2.1.4	Extrapolation of sequences with FM increments — 28
2.1.5	Examples of forecasting for some special models — 29
2.2	Minimax (robust) method of extrapolation — 35
2.2.1	Least favorable spectral density and minimax-robust spectral characteristic — 35
2.2.2	Least favorable spectral densities in classes \mathcal{D}_0 — 38
2.2.3	Least favorable spectral densities in classes \mathcal{D}_V^U — 40
2.2.4	Least favorable spectral densities in classes \mathcal{D}_ε — 42
2.2.5	Least favorable spectral densities in classes $\mathcal{D}_{1\delta}$ — 44
3	Extrapolation of sequences with periodically stationary increments observed with noise — 48
3.1	Hilbert space projection method of extrapolation — 48
3.1.1	Extrapolation of multidimensional sequences with stationary GM increments — 48
3.1.2	Extrapolation of sequences with FM increments — 59
3.1.3	Extrapolation based on factorizations of spectral densities — 59
3.1.4	Extrapolation of stochastic sequences with periodically stationary increment — 66
3.1.5	Extrapolation of cointegrated vector stochastic sequences — 68
3.2	Minimax (robust) method of extrapolation — 72

- 3.2.1 Least favorable spectral densities and minimax-robust spectral characteristic — **72**
- 3.2.2 Least favorable spectral densities in classes $\mathcal{D}_0 \times \mathcal{D}_V^U$ — **77**
- 3.2.3 Least favorable spectral densities in classes $\mathcal{D}_0 \times \mathcal{D}_V^U$ for cointegrated vector sequences — **81**
- 3.2.4 Least favorable spectral densities in classes $\mathcal{D}_\varepsilon \times \mathcal{D}_{1\delta}$ — **83**
- 3.2.5 Least favorable densities for cointegrated sequences in classes $\mathcal{D}_\varepsilon \times \mathcal{D}_{1\delta}$ — **88**

4 Interpolation of sequences with periodically stationary increments observed with or without noise — 92

- 4.1 Hilbert space projection method of interpolation — **93**
 - 4.1.1 Interpolation of multidimensional stochastic sequences with stationary GM increment based on observations with stationary vector-valued noise — **93**
 - 4.1.2 Interpolation of multidimensional stationary GM increments from observations without noise — **100**
 - 4.1.3 Interpolation of sequences with FM increments — **103**
 - 4.1.4 Interpolation of stochastic sequences with periodically stationary GM increment with and without periodically stationary noise — **104**
- 4.2 Minimax (robust) method of interpolation — **105**
 - 4.2.1 Least favorable spectral densities and minimax-robust spectral characteristic — **105**
 - 4.2.2 Least favorable spectral densities in classes $\mathcal{D}_0 \times \mathcal{D}_\varepsilon$ — **109**
 - 4.2.3 Least favorable spectral densities in classes \mathcal{D}_0 — **112**
 - 4.2.4 Least favorable spectral densities in classes $\mathcal{D}_{1\delta} \times \mathcal{D}_V^U$ — **113**
 - 4.2.5 Least favorable spectral densities in classes $\mathcal{D}_{1\delta}$ — **116**

5 Filtering of sequences with periodically stationary increments — 120

- 5.1 Hilbert space projection method of filtering — **120**
 - 5.1.1 Filtering of multidimensional stochastic sequences with stationary GM increment — **120**
 - 5.1.2 Filtering of sequences with FM increments — **127**
 - 5.1.3 Filtering based on factorizations of the spectral densities — **127**
 - 5.1.4 Filtering of stochastic sequences with periodically stationary GM increment — **133**
- 5.2 Minimax (robust) method of filtering — **136**
 - 5.2.1 Least favorable spectral densities and minimax-robust spectral characteristic — **136**
 - 5.2.2 Least favorable spectral densities in classes $\mathcal{D}_0 \times \mathcal{D}_V^U$ — **140**
 - 5.2.3 Least favorable spectral densities in classes $\mathcal{D}_0 \times \mathcal{D}_{1\delta}$ — **143**
 - 5.2.4 Semi-uncertain filtering problem in classes \mathcal{D}_ε with known noise sequence density — **145**

6	Continuous time stochastic processes with periodically correlated increments — 150
6.1	Periodically correlated processes and generated vector stationary sequences — 150
6.2	Stochastic processes with periodically correlated d th increments — 152
6.2.1	Definition and spectral representation of generated stationary increment — 152
6.2.2	Moving average representation of generated stationary increment — 155
7	Extrapolation of processes with periodically correlated increments — 157
7.1	Generated stationary increment sequence representation of the functional $A\xi$ — 157
7.2	Extrapolation problem: the greatest value of the MSE — 161
7.3	Hilbert space projection method of extrapolation — 163
7.4	Minimax (robust) method of extrapolation — 168
7.4.1	Least favorable spectral density and minimax-robust spectral characteristic — 168
7.4.2	Least favorable spectral density in classes \mathcal{D}_0 — 170
7.4.3	Least favorable spectral density in classes $\mathcal{D}_{1\delta}$ — 171
8	Extrapolation of processes with periodically correlated increments observed with noise — 175
8.1	Hilbert space projection method of extrapolation — 175
8.1.1	Extrapolation based on Fourier transformations of spectral densities — 175
8.1.2	Extrapolation based on factorizations of spectral densities — 187
8.2	Minimax (robust) method of extrapolation — 190
8.2.1	Least favorable spectral densities and minimax-robust spectral characteristic — 190
8.2.2	Least favorable spectral densities in classes $\mathcal{D}_0 \times \mathcal{D}_{1\delta}$ — 194
8.2.3	Least favorable spectral densities in classes $\mathcal{D}_\epsilon \times \mathcal{D}_V^U$ — 199
9	Interpolation of processes with periodically correlated increments observed with or without noise — 204
9.1	Hilbert space projection method of interpolation — 204
9.1.1	Interpolation of stochastic processes with periodically stationary d th increments observed with periodically stationary noise — 204
9.1.2	Interpolation of stochastic processes with periodically stationary d th increments observed without noise — 213
9.2	Minimax-robust method of interpolation — 215
9.2.1	Least favorable spectral densities and minimax-robust spectral characteristic — 215
9.2.2	Least favorable spectral densities in classes $\mathcal{D}_0 \times \mathcal{D}_V^U$ — 219

- 9.2.3 Example of the least favorable spectral density in the class \mathcal{D}_0^- — 222
- 9.2.4 Least favorable spectral density in the class \mathcal{D}_V^U — 224

10 Filtering of processes with periodically correlated increments — 227

- 10.1 Hilbert space projection method of filtering — 227
- 10.2 Minimax (robust) method of filtering — 234
 - 10.2.1 Least favorable spectral densities and minimax-robust spectral characteristic — 234
 - 10.2.2 Least favorable spectral densities in classes $\mathcal{D}_0 \times \mathcal{D}_V^U$ — 236
 - 10.2.3 Least favorable spectral densities in classes $\mathcal{D}_{1\delta} \times \mathcal{D}_\varepsilon$ — 240

11 Filtering problem when signal and noise have periodically correlated increments — 245

- 11.1 Hilbert space projection method of filtering — 245
 - 11.1.1 Filtering based on Fourier transformations of spectral densities — 245
 - 11.1.2 Filtering based on factorizations of the spectral densities — 253
- 11.2 Minimax filtering based on observations with periodically stationary increment noise — 261
 - 11.2.1 Least favorable spectral densities and minimax-robust spectral characteristic — 261
 - 11.2.2 Least favorable spectral densities in classes $\mathcal{D}_0 \times \mathcal{D}_\varepsilon$ — 265
 - 11.2.3 Semi-uncertain filtering problem in classes \mathcal{D}_0 — 268

Problems — 271

A Some models of non-stationary time series — 279

Bibliography — 281
