

Table of Contents

List of Figures..... XI

List of TablesXIII

Abbreviations and Acronyms XVII

Variable and Parameter DefinitionsXIX

1 Introduction 1

1.1 Background and Objectives 1

1.2 Methodical Considerations 3

1.3 Current State of Research 7

1.4 Outline of the Thesis 12

2 Attributes of Tropical Agriculture 15

2.1 Agro-ecological Fundamentals 16

2.1.1 Climate..... 16

2.1.1.1 Temperature 16

2.1.1.2 Solar Radiation and Day Length..... 17

2.1.1.3 Rainfall..... 18

2.1.2 Soils 20

2.2 Farming Systems and the Intensity of Production 20

2.3 Technological Progress in Agriculture..... 23

2.3.1	Definition and Representation	24
2.3.2	Classifications.....	28
2.3.2.1	Disembodied or Embodied	29
2.3.2.2	Unbiased or Biased	29
2.3.2.3	Exogenous or Endogenous	33
2.3.3	Dependence on the Farming System	36
3	Deforestation in the Tropics.....	41
3.1	General Considerations	42
3.1.1	Definitions	42
3.1.2	Data Availability.....	45
3.1.3	Extent.....	47
3.2	Drivers of Deforestation.....	51
3.2.1	Sources.....	51
3.2.2	Immediate Causes.....	53
3.2.2.1	Physical Characteristics of the Environment.....	53
3.2.2.2	Accessibility.....	54
3.2.2.3	Agricultural Output Prices	55
3.2.2.4	Agricultural Input Prices.....	55
3.2.2.5	Off-farm Wages and Employment Opportunities	56
3.2.2.6	Property Regime and Tenure Security.....	56
3.2.3	Underlying Causes.....	56
3.2.3.1	Foreign Debt and Government Policies.....	57
3.2.3.2	Macroeconomic Trends	58
3.2.3.3	Demographic Pressure	59

4	The Effects of Agricultural Technological Change on Forest Cover	61
4.1	Effects on the Farm Level	62
4.1.1	Assumptions	62
4.1.1.1	The von Thünen Approach	62
4.1.1.2	Preferences and Market Integration	65
4.1.2	The Subsistence Case	67
4.1.3	The Perfect Market Case	70
4.1.4	The Constrained Household Case	72
4.1.5	Comparing the Models	76
4.1.6	Different Farming Systems at the Household Level	78
4.2	General Equilibrium Effects.....	85
4.2.1	Migration	86
4.2.2	Endogenous Prices.....	89
4.3	The Time Dimension of the Technology-Forest Link	93
4.3.1	Basic Concept of the Forest Transition	94
4.3.1.1	First Stage: Low Deforestation.....	96
4.3.1.2	Second Stage: High Deforestation.....	97
4.3.1.3	Third and Fourth Stage: Slow-down of Deforestation and Afforestation and/or Reforestation	98
4.3.2	The Role of Agricultural Technological Change	99
4.4	Preliminary Conclusions	103
5	The Case of Ecuador.....	105
5.1	General Background.....	106

5.1.1	Structure of the Agricultural Sector	107
5.1.2	Agricultural Productivity and Input Use	109
5.1.3	Vegetation History.....	113
5.1.4	Current Forest Cover	116
5.2	The Technology-Forest Link in the South	120
5.2.1	Background to the Study Area	121
5.2.2	Main Agents	123
5.2.2.1	Mestizos	124
5.2.2.2	Saraguros	124
5.2.2.3	Shuar	125
5.2.3	Numerical Simulation.....	126
5.2.3.1	Choice of Model	126
5.2.3.2	Preliminaries	128
5.2.3.3	Results.....	130
5.2.3.4	Sensitivity to Model Specifications	136
5.2.4	The Role of General Equilibrium Effects.....	138
5.2.5	Policy Implications	140
5.3	Is There a Forest Transition for Ecuador?.....	141
6	Concluding Remarks	147
6.1	Synthesis of the Main Results	147
6.2	Limitations of the Study and Future Perspectives.....	150
7	References	153
