

Table of Contents

Foundation of Logic Programming

A. Yamamoto Completeness of Extended Unification Based on Basic Narrowing	1
A. Sakurai and H. Motoda Proving Definite Clauses without Explicit Use of Inductions	11

Nonmonotonic Reasoning

H. Yuasa and S. Arikawa Pseudo Extension in Default Reasoning and Belief Revision by Model Inference	27
T. Shintani An Approach to Nonmonotonic Inference Mechanism in Production Production System KORE/IE	38
C. Sakama and A. Okumura Nonmonotonic Parallel Inheritance Network	53

Logic Programming Language/System

H. Tamura and H. Aiso Logic Programmig Debugger Using Control Flow Specification	67
M.Hoshida and M. Tokoro ALEX: The Logic Programming Language with Explicit Control and without Cut-Operators	82
K. Fukunaga and S. Morishita Lattice Programming Methodology	96

Guarded Horn Clauses

J. Tanaka A Simple Programming System Written in GHC and Its Reflective Operations	108
M. Terada Implementation of Full GHC by Communicating Processes	122

Knowledge Base System

H. Sakai Inference Methods and Semantics on Or-type Knowledge Bases	136
M. Takizawa, M. Katsumata and S. Nagahora Access Program to Minimize Redundant Refutations on the Network Database System	156

Computer - Aided Reasoning

T. Minami, H. Sawamura, K. Satoh and K. Tsuchiya EUODHILOS: A General-Purpose Reasoning Assistant System - Concept and Implementation -	172
---	-----

Natural Language Processing

R. Sugimura, K. Akasaka, Y. Kubo and Y. Matsumoto Logic Based Lexical Analyser LAX	188
N. Tamura, T. Kamio and M. Kurosaki Extraction of Characteristic Facts and Abstract Generation	217
S. Kinoshita, H. Sano, T. Ukita, K. Sumita and S. Amano Knowledge Representation and Reasoning for Discourse Understanding	238
