

Contents

1. Brief Review of the Development of Laser Crystal Physics	1
2. Spectral and Laser Characteristics of Activated Crystals	12
2.1 Basic Concepts of the Theory of the Absorption and Emission of Light	12
2.2 Spectroscopic Characteristics of Activated Crystals	17
2.3 Homogeneous and Inhomogeneous Line Broadening	23
3. Operating Schemes and Types of Lasers Based on Activated Crystals	27
3.1 Excitation Threshold for Stationary Single-Mode Emission	27
3.2 Operating Schemes of Crystal Lasers with One Metastable State	29
3.3 Phonon-Terminated Crystal Lasers	34
3.4 Sensitized-Crystal Lasers	45
3.5 Cascade Operating Schemes for Crystal Lasers	49
3.6 Self-Saturating Laser Transitions	52
3.7 Infrared-Pumped Visible Crystal Lasers	55
3.8 Crystal Lasers with Self-Doubling Frequency	57
3.9 Lasers with Combined Active Media	66
3.10 Tunable Crystal Lasers with Dispersive Cavities	80
3.11 Temperature-Tunable Crystal Lasers	85
3.12 High-Temperature Induced Transitions of Nd^{3+} Ions in Crystals	97
3.13 Continuous-Wave Crystal Lasers	99
3.14 Q-Switched Solid-State Lasers	101
3.15 Nonmagnetic Pyrotechnically Pumped Crystal Lasers	104
3.16 Crystal Lasers with Laser or LED Excitations	105
3.17 Single-Crystal Film and Fiber-Crystal Lasers	109
3.18 Multibeam Crystal Lasers	111
4. Stark Level Structure and Optical Transition Intensities of Activator Ions in Laser Crystals	114
4.1 Basic Concepts of Crystal-Field Theory	114
4.2 Stark Levels of Activator Ions in Laser Crystals (Experimental Data)	121
4.3 Transition Intensities of Ln^{3+} Ions in Laser Crystals	148
4.3.1 Electric Dipole Transitions; Judd-Ofelt Approximation	149
4.3.2 Magnetic-Dipole Transitions	160

4.4 Spectroscopic-Quality Parameter of Laser Condensed Media Doped with Nd^{3+} Ions	162
5. Summary of the Properties of Activated Laser Crystals	166
6. Luminescence and Stimulated-Emission Properties of Laser Crystals in the $\text{Y}_2\text{O}_3\text{—Al}_2\text{O}_3$ System	319
6.1 Luminescence Properties of $\text{Y}_3\text{Al}_5\text{O}_{12}\text{—Nd}^{3+}$ Crystals	322
6.2 Spectral-Emission Properties of $\text{Y}_3\text{Al}_5\text{O}_{12}\text{—Nd}^{3+}$ Crystals	333
6.3 Luminescence Properties of $\text{YAlO}_3\text{—Nd}^{3+}$ Crystals	346
6.4 Spectral-Emission Properties of $\text{YAlO}_3\text{—Nd}^{3+}$ Crystals	354
7. Self-Activated Laser Crystals	361
7.1 Concentration Quenching of Luminescence in Laser Crystals with High Nd^{3+} Ion Content	361
7.2 Erbium and Holmium High-Concentration and Self-Activated Laser Crystals	373
8. Stimulated-Emission Wavelengths of Lasers Based on Activated Crystals	380
9. Laser-Crystal Physics	398
