

Contents

1. Introduction. By T. Tamir	1
1.1 Overview	1
1.2 Organization of the Book	3
References	5
2. Theory of Optical Waveguides. By H. Kogelnik (With 32 Figures)	7
2.1 Ray Optics of the Slab Waveguide	9
2.1.1 Refraction and Reflection	9
2.1.2 Guided Modes	12
2.1.3 The Goos-Hänchen Shift	17
2.1.4 Effective Guide Thickness	18
2.2 Fundamentals of the Electromagnetic Theory of Dielectric Waveguides	20
2.2.1 Maxwell's Equations	20
2.2.2 Modes of the Waveguide	22
2.2.3 The Wave Equations for Planar Guides	23
2.2.4 Mode Properties Following from Symmetry	24
2.2.5 Orthogonality of the Modes	25
2.2.6 Mode Expansion and Normalization	27
2.2.7 The Variation Theorem for Dielectric Waveguides ...	30
2.2.8 Power Flow and Stored Energy in a Dielectric Waveguide	31
2.2.9 Variational Properties of the Propagation Constant ..	33
2.3 Modes of the Planar Slab Guide	35
2.3.1 TE Modes	37
2.3.2 TM Modes	40
2.3.3 Multilayer Slab Guides	43
2.4 Planar Guides with Graded-Index Profiles	51
2.4.1 The Parabolic Profile (Harmonic Oscillator)	51
2.4.2 The "1/cosh ² " Profile	52
2.4.3 The Exponential Profile	54
2.4.4 Index Profiles with Strong Asymmetry	56
2.4.5 The WKB Method	57
2.5 Channel Waveguides	58
2.5.1 Channel Guide Geometries	58

2.5.2	The Vector Wave Equation	59
2.5.3	Numerical Analysis	61
2.5.4	Separation of Variables	62
2.5.5	The Method of Field Shadows	63
2.5.6	The Vector Perturbation Theorem	67
2.5.7	The Effective-Index Method	69
2.6	Coupled-Mode Formalism and Periodic Waveguides	74
2.6.1	Excitation of Waveguide Modes	74
2.6.2	Waveguide Deformations	76
2.6.3	Coupled-Wave Solutions	78
2.6.4	Periodic Waveguides	81
2.6.5	TE-to-TM Mode Conversion	85
	References	87
3.	Waveguide Transitions and Junctions	
	By W.K. Burns and A.F. Milton (With 43 Figures)	89
3.1	Waveguide Modes and Coupled-Mode Theory	90
3.1.1	Normal Modes of Coupled Waveguides	90
3.1.2	Coupled-Mode Theory Representation	92
3.2	Fast and Slow Transitions	95
3.2.1	Local Normal Modes	96
3.2.2	Adiabatic Transition	97
3.2.3	Abrupt Transition	97
3.2.4	Tapered Velocity Coupler	98
3.2.5	3 dB Coupler	100
3.2.6	Directional Coupler	101
3.3	Mode Coupling Between Local Normal Modes	102
3.3.1	Coupled-Amplitude Equations	103
3.3.2	Differential Form of Coupled-Amplitude Equations ..	105
3.3.3	Coupled-Mode Theory Representation of C_{ij}	107
3.4	Two-Arm Branches	109
3.4.1	Step Approximation for a Waveguide Branch	110
3.4.2	Analytic Solution for Shaped Branches	115
3.4.3	Experimental Results	121
3.4.4	Superposition of Solutions	123
3.5	Waveguide Horns	125
3.5.1	Mode-Conversion Coefficient c_{ij} for Channel Waveguides	126
3.5.2	Approximation for $\Delta\beta_{ij}$	128
3.5.3	Approximation for C_{ij}	129
3.5.4	Parabolic Solution	132
3.6	Branches with Three Arms	136
3.6.1	Normal Modes of Three Coupled Waveguides	136
3.6.2	3×2 Waveguide Coupler	140

3.7 Conclusion	143
References	144
4. Titanium-Diffused Lithium Niobate Waveguide Devices	
By R.C. Alferness (With 39 Figures).....	145
4.1 Waveguide Fabrication	145
4.1.1 Titanium Diffused Waveguides	146
4.1.2 Proton Exchange LiNbO ₃ Waveguides	149
4.1.3 Post-Waveguide Processing	150
4.2 Basic Device Considerations	153
4.2.1 Electro-Optic Effect	153
4.2.2 Phase Modulator	155
4.2.3 Insertion Loss	167
4.2.4 Voltage/Loss Tradeoffs: Waveguide Tailoring	172
4.3 Switch/Modulator	174
4.3.1 Directional Coupler	174
4.3.2 Balanced-Bridge Interferometer	180
4.3.3 Intersecting-Waveguide Switch	181
4.4 On/Off Modulators	182
4.4.1 Y-Branch Interferometer	182
4.4.2 Voltage and Bandwidth Consideration for Switch/ Modulators	183
4.5 Polarization Devices	185
4.5.1 TE ↔ TM Conversion	185
4.5.2 Polarization Controller	186
4.5.3 Polarization-Selective Devices	190
4.6 Wavelength Filters	191
4.6.1 Interferometric Filters	192
4.6.2 Coupled-Mode Filters	193
4.7 Polarization-Insensitive Devices	198
4.8 Some Ti:LiNbO ₃ Integrated-Optic Circuits	201
4.8.1 Coherent Lightwave Receiver	201
4.8.2 Optical Switch Arrays	202
4.9 Applications	203
4.9.1 External Modulators	203
4.9.2 High-Speed Analog to Digital Conversion	205
4.9.3 Fiber Gyroscope Chip	206
References	206
5. Mode-Controlled Semiconductor Lasers	
By I.P.Kaminow and R.S. Tucker. (With 55 Figures).....	211
5.1 Organization of the Chapter	211
5.1.1 Notation	212
5.2 Laser Basics	212

5.2.1	Epitaxial Materials and Heterostructure	212
5.2.2	Waveguide Propagation, Amplification and Oscillation	216
5.2.3	Laser Gain	224
5.2.4	Spontaneous Emission	227
5.2.5	Photon Rate Equation	231
5.2.6	Spectral Hole Burning	231
5.2.7	Carrier Injection in a Heterojunction	232
5.2.8	Modal Rate Equations	234
5.2.9	Longitudinal Variation of Photon Density	237
5.2.10	Steady-State Solution of Rate Equations	240
5.2.11	Measurement of Modal Reflectivity and Laser Gain	243
5.3	Structures for Transverse-Mode Control	246
5.3.1	Stripe Geometry Laser, Blocking Layer	246
5.3.2	Buried Heterostructure Lasers	248
5.3.3	Ridge Waveguide Lasers	252
5.4	Longitudinal Mode Control	254
5.4.1	Three- and Four-Mirror Resonators	255
5.4.2	Distributed Bragg Gratings	257
5.4.3	Semiconductor DFB Lasers	260
5.4.4	DBR and Phase-Slip DFB Lasers	263
5.5	Linewidth	266
5.5.1	Linewidth of Fabry-Perot Laser	267
5.5.2	Linewidth Reduction Using Extended Cavities	270
5.6	High-Speed Modulation	272
5.6.1	Modulation Response	273
5.6.2	Origin of Chip Parasitics	274
5.6.3	Evaluation of Parasitics	275
5.6.4	Dependence of Parasitics on Device Structure	277
5.6.5	The Intrinsic Laser – Small-Signal Intensity Modulation Response	278
5.6.6	High-Frequency Limitations	282
5.6.7	Design Considerations for Wideband Lasers	283
5.6.8	Large-Signal Modulation – PCM	284
5.6.9	Large-Signal Modulation – Gain Switching	291
5.6.10	Active Mode-Locking	292
5.7	Luminescent Diodes and Laser Amplifiers	294
5.7.1	Edge-Emitting and Superluminescent Diodes	294
5.7.2	Linear Amplification and Amplified Spontaneous Emission in TWAs and ELEDs	298
5.7.3	Fabry-Perot Amplifiers and ELEDs	300
5.7.4	Amplifier Gain Compression	303
5.7.5	Receiver Noise	305
5.8	Tunable and FM Lasers	307
5.8.1	Tunable DBR	307
5.8.2	Tunable DFB	308

Appendix 5A: Glossary of Symbols	310
References	312
6. Semiconductor Integrated Optic Devices	
By F.J. Leonberger and J.P. Donnelly. (With 66 Figures)	317
6.1 Semiconductor Waveguide Theory	318
6.1.1 Methods of Index Change in Semiconductors	318
6.1.2 Slab Waveguides	324
6.1.3 Channel Waveguides	326
6.1.4 Coupling Effects	331
6.1.5 Optical Loss	336
6.1.6 Curvature Loss	339
6.2 Material Technology	342
6.2.1 Liquid Phase Epitaxy (LPE)	343
6.2.2 Vapor Phase Epitaxy (VPE)	345
6.2.3 Metal Organic Chemical Vapor Deposition (MOCVD)	347
6.2.4 Molecular Beam Epitaxy (MBE)	348
6.2.5 Summary	350
6.3 Passive Waveguide Devices – Fabrication and Characterization	350
6.3.1 Channel Waveguides	351
6.3.2 Couplers	356
6.3.3 Bends and Branches	360
6.3.4 Grating Filter	362
6.4 Electro-Optic Guided-Wave Modulators – Theory	362
6.4.1 Electro-Optic Effect in III–V Semiconductors	362
6.4.2 Modulator Design	364
6.4.3 Modulation Frequency Analysis	366
6.4.4 Traveling-Wave Phase Modulators	369
6.4.5 TE-TM Coupling Analysis	370
6.4.6 Infrared Waveguide Modulators – Wavelength Scaling	371
6.4.7 Electro-Absorption Modulation	372
6.4.8 Carrier-Injection Modulator	373
6.4.9 Nonlinear Waveguide Modulator	373
6.5 Electro-Optic Guided-Wave Modulator Characteristics	374
6.5.1 Phase Modulators	374
6.5.2 Directional-Coupler Switches	376
6.5.3 Interferometric Modulators	378
6.5.4 Integrated Waveguides/Optoelectronics/Electronics ..	379
6.5.5 Electro-Absorption Modulators	382
6.5.6 Multiple-Quantum-Well Modulators	384
6.5.7 Nonlinear Waveguide Modulators	385
6.6 Optoelectronic Integrated Circuits (OEIC)	386
6.7 Concluding Remarks	390
References	390

7. Recent Advances	
By T. Tamir (With 1 Figure)	397
7.1 Introduction	397
7.2 Theory of Optical Waveguides	397
7.3 Waveguide Transitions and Junctions	397
7.4 Titanium-Diffused Lithium Niobate Waveguide Devices	399
7.5 Mode-Controlled Semiconductor Lasers	402
7.6 Semiconductor Integrated Optic Devices	403
References	408
Subject Index	415
