6. Magnetic Clouds	
By <i>L. F. E. Burlaga</i> (With 13 Figures)	1
6.1 Introduction	1
6.2 Definition and Properties of Magnetic Clouds	1
6.3 Origin and Composition of Magnetic Clouds	4
6.4 Model of the Local Structure of Magnetic Clouds	5
6.5 Large-Scale Structure of Magnetic Clouds	8
6.6 Motion and Stability of Magnetic Clouds	11
6.7 Nonthermal Particles and Magnetic Clouds	12
6.8 Effects of Magnetic Clouds on Geomagnetic Activity	14
6.9 Effects of Magnetic Clouds on Galactic Cosmic Rays	16
6.10 Magnetic Clouds and Compound Streams	18
6.11 Questions Concerning Magnetic Clouds	19
References	19
7. Interplanetary Slow Shocks	
By <i>A. K. Richter</i> (With 9 Figures)	23
7.1 Introduction	23
7.2 Generation of Interplanetary Slow Shocks	24
7.2.1 Steepening of Slow-Mode Waves	24
7.2.2 Magnetic Field Line Merging	28
7.2.3 Interaction of Interplanetary Discontinuities	28
7.2.4 Summary	29
7.3 Solar Wind Constraints on the Development and Evolution of Interplanetary Slow Shocks	29
7.3.1 Constraints on the Development	29
7.3.2 Constraints on the Evolution and Propagation	32
7.3.3 Summary	34
7.4 Constraints on the Unique Identification of Interplanetary Slow Shocks from Space Observations	34
7.4.1 The Classical Way	34
7.4.2 Additional Conditions	35
7.4.3 Implications of Checking Against Tangential Discontinuities	36
7.4.4 Examples	38
7.4.5 Summary	41

7.5	Summary	42
	References	43
8.	Kinetic Physics of the Solar Wind Plasma	
	By <i>E. Marsch</i> (With 34 Figures)	45
8.1	Introduction	45
8.1.1	General Remarks	45
8.1.2	The Importance of Kinetic Physics	46
8.1.3	Outline of the Article and Previous Reviews	47
8.2	Particle Velocity Distributions	48
8.2.1	Introduction	48
8.2.2	Ion Velocity Distributions	49
8.2.3	Electron Velocity Distributions	55
8.3	Coulomb Collisions and Nonclassical Transport	60
8.3.1	General Remarks	60
8.3.2	Observations on the Role of Coulomb Collisions ...	61
8.3.3	Kinetic Modeling of the Effects of Coulomb Collisions	63
8.3.4	Towards a Nonclassical Collisional Transport Theory	66
8.4	Wave-Particle Interactions and Anomalous Transport	67
8.4.1	General Remarks	67
8.4.2	Electrostatic Waves and Plasma Instability	68
8.4.3	Electromagnetic Waves and Plasma Instability	72
8.4.4	Electron Heat Flux Regulation	74
8.4.5	Regulation of the Ion Temperature Anisotropy and Heat Flux	77
8.4.6	Regulation of the Electromagnetic Ion-Beam Instability	83
8.4.7	Some Nonlinear Aspects of Wave-Particle Interactions	85
8.5	Nonequilibrium Thermodynamics	87
8.5.1	Introduction	87
8.5.2	Differences Between Ion Parameters	88
8.5.3	The Equation of State and Nonequilibrium Thermodynamics	91
8.5.4	Radial Gradients of Heat Fluxes	94
8.5.5	Radial Gradients of Ion and Electron Temperatures ..	97
8.6	Dissipation of MHD Turbulence and Particle Heating	102
8.6.1	Kinetic Damping of MHD Waves	102
8.6.2	Damping of Alfvénic Turbulence by a Nonlinear Cascade	104
8.6.3	Particle Heating by Wave Dissipation	105
8.7	Energy, Momentum, and Mass Input into the Solar Wind ...	107
8.7.1	Coronal Boundary Conditions	107
8.7.2	A Brief Account of Coronal Structures and Associated Interplanetary Phenomena	109
8.7.3	Interplanetary and Coronal Energy Fluxes and Solar Wind Constants of Motion	111

8.7.4	Physics of the Thermal Potential	119
8.8	Conclusions	121
	References	122
9.	Waves and Instabilities	
	By <i>D. A. Gurnett</i> (With 15 Figures)	135
9.1	Introduction	135
9.2	Electrostatic Waves	139
9.2.1	Electron Plasma Oscillations	139
9.2.2	Ion Acoustic Waves	143
9.3	Electromagnetic Waves	148
9.3.1	MHD Waves and Ion Cyclotron Waves	148
9.3.2	Whistler-Mode Waves	150
9.4	Conclusion	154
	References	155
10.	MHD Turbulence in the Solar Wind	
	By <i>E. Marsch</i> (With 29 Figures)	159
10.1	Introduction	159
10.1.1	General and Historical Remarks	159
10.1.2	The Importance of MHD Turbulence for Space Plasma Physics	160
10.1.3	Outline and Scope of the Article and Its Relation to Previous Reviews	161
10.2	Structures and Fluctuations in the Inner Heliosphere	163
10.2.1	Large-Scale Solar Wind Structures	163
10.2.2	Mesoscale Structures and Fluctuations	165
10.3	MHD Theory and Turbulence Diagnostics	170
10.3.1	Basic Equations	170
10.3.2	Alfvén Waves and Magnetosonic Waves	172
10.3.3	Analysis of Random MHD Fields	175
10.3.4	Integral Invariants of Incompressible MHD	177
10.3.5	Turbulence Spectra	178
10.3.6	Analysis Techniques in the Time Domain	181
10.4	Nature and Morphology of MHD Fluctuations	182
10.4.1	Power Spectra in Terms of Elsässer Variables	182
10.4.2	Stream-Structure Dependence of Alfvénic Fluctuations	187
10.4.3	Compressive Fluctuations	191
10.5	Origin and Evolution of Solar Wind MHD Turbulence	194
10.5.1	Sources of Interplanetary Fluctuations	194
10.5.2	Radial Evolution of Alfvénicity	196
10.5.3	Radial Evolution of Spectra	200
10.5.4	Self-similarity and Origin of Turbulence	207
10.5.5	Evidence for the Dissipation of Turbulence	212

10.6	Theoretical Concepts of Turbulence Generation and Evolution	216
10.6.1	Numerical Simulations as a Guide to Interpreting Observations	216
10.6.2	Models of Turbulence for Inhomogeneous Media	220
10.6.3	Nonlinearities and Cascading	225
10.6.4	Compressibility and Pseudosound	228
10.7	Summary and Conclusions	231
10.7.1	Left-Out Topics	231
10.7.2	Observational Summary	232
10.7.3	Conclusions and Recommendations	232
	References	234
11.	Energetic Particles in the Inner Solar System	
	By <i>H. Kunow, G. Wibberenz, G. Green, R. Müller-Mellin,</i> <i>and M.-B. Kallenrode</i> (With 52 Figures)	243
11.1	Introduction	243
11.2	Modulation of Galactic Cosmic Radiation	248
11.2.1	Model Concepts	249
11.2.2	Observations	252
11.3	Interplanetary Propagation of Solar Energetic Particles	257
11.3.1	Transport Models	258
11.3.2	Magnetic Field Properties and Pitch-Angle Scattering	264
11.3.3	Observations of the Mean Free Path	268
11.3.4	The μ -dependence of the Scattering Coefficient	273
11.3.5	Summary, Open Questions, and Suggestions for Further Studies	279
11.4	Coronal Propagation	280
11.4.1	Brief Overview of Early Observations	281
11.4.2	Models	282
11.4.3	Recent Observations	288
11.4.4	Discussion	294
11.5	Particle Acceleration in Solar Flares	295
11.5.1	Acceleration Mechanisms	297
11.5.2	Selected Observations	299
11.5.3	^3He -Rich Solar Particle Events	303
11.6	Particle Acceleration in Corotating Interplanetary Regions	317
11.6.1	Features of Corotating Events and Their Relation to the Solar Wind	318
11.6.2	Corotating Events Throughout the Solar System and Solar Cycle Dependence	325
11.6.3	Models of Corotating Event Generation and Transport	328
