

# Contents

Reaction Patterns of Lymph Nodes in the Development and Spread of Cancer With 24 Figures and 4 Tables E. VOLLMER, V. KRIEG, F. SHIMAMOTO, and E. GRUNDMANN .....	1
Patterns of Fibronectin Induction in Lymph Nodes Affected by Metastatic Growth of Adenocarcinomas With 6 Figures N. BECK, D. LORKE, and P. MÖLLER .....	35
Macrophages/Reticulum Cells in Early and Late Phases of Lymphogenous Metastasis With 23 Figures and 4 Tables E. VOLLMER, F. SHIMAMOTO, V. KRIEG, and E. GRUNDMANN .....	49
Primary Immunodeficiency Syndromes and Their Manifestations in Lymph Nodes With 2 Figures and 11 Tables H. COTTIER, R. KRAFT, and F. MEISTER .....	81
Immunological Dysregulation of Lymph Nodes in AIDS Patients With 7 Figures and 5 Tables G. R. F. KRUEGER, D. V. ABLASHI, P. LUSSO, and S. F. JOSEPHS .....	157
Lymph Node Reaction Patterns in Patients with AIDS or AIDS-Related Complex With 26 Figures and 1 Table J. DIEBOLD, J. AUDOUIN, A. LE TOURNEAU, S. PREVOT, and G. SZEKERES .....	189
Subject Index .....	223
Indexed in ISR	

# Reaction Patterns of Lymph Nodes in the Development and Spread of Cancer\*

E. VOLLMER, V. KRIEG, F. SHIMAMOTO, and E. GRUNDMANN

1	Introduction .....	1
2	DMH-Induced Experimental Carcinogenesis in the Rat Intestine .....	2
3	Transplantable Carcinoma HH9-cl 14 of the Rat .....	6
3.1	Regressive Tumors .....	7
3.2	Progressive Tumors .....	8
4	A Quantitative Experimental Assay for Histological Immunostaging .....	11
5	Prognostic Significance of Non-neoplastic Nodal Changes in Human Gastrointestinal Tumors .....	13
5.1	Colorectal Carcinoma .....	15
5.2	Gastric Carcinoma .....	17
6	Proliferation Patterns in Lymph Nodes Draining Carcinomas .....	24
6.1	Animal Model .....	25
6.2	Human Cancer .....	28
7	Conclusions and Outlook .....	30
	References .....	31

**Patterns of Fibronectin Induction in Lymph Nodes  
Affected by Metastatic Growth of Adenocarcinomas**

N. BECK, D. LORKE, and P. MÖLLER

1	Introduction .....	35
2	Material and Methods .....	36
2.1	Tissue Specimens .....	36
2.2	Histological Techniques .....	36
3	Results .....	37
4	Discussion .....	43
5	Conclusions .....	45
	References .....	45

# **Macrophages/Reticulum Cells in Early and Late Phases of Lymphogenous Metastasis \***

E. VOLLMER, F. SHIMAMOTO, V. KRIEG, and E. GRUNDMANN

1	Introduction .....	49
2	Animal Models .....	50
2.1	Macrophages/Reticulum Cells in Regional Lymph Nodes During Experimental DMH Carcinogenesis in the Rat Intestine .....	52
2.2	Macrophages/Reticulum Cells in Regional Lymph Nodes During Regression and Progression of the Transplantable Rat Carcinoma HH9-cl 14 .....	55
3	Macrophages/Reticulum Cells in Lymph Nodes Draining Human Carcinomas .....	60
4	Interaction of Tumor Cells and Macrophages/Reticulum Cells During the First Premetastatic and the Second Overtly Metastatic Phase in Regional Lymph Nodes .....	68
5	Conclusions and Outlook .....	73
	References .....	77

# Primary Immunodeficiency Syndromes and Their Manifestations in Lymph Nodes

H. COTTIER, R. KRAFT, and F. MEISTER

1	Introduction .....	82
1.1	Definitions .....	82
1.2	The Scope of Primary Immunodeficiency Syndromes .....	83
2	Historical Notes .....	85
3	Some Principles of Physiological Immune Functions .....	87
4	General Aspects of Primary Immunodeficiency Syndromes .....	95
4.1	The Present Classification .....	95
4.2	Basic Pathogenetic Considerations .....	95
4.2.1	Genetic Background .....	95
4.2.2	Links Between Genetic Defects and Immunodeficiency .....	100
4.2.3	Primary Immunodeficiency Syndromes in the Absence of Detectable Hereditary Genetic Defects .....	101
4.2.4	Consequences of Defects in the Immune System .....	101
4.3	Clinical Assessment .....	103
4.4	Histopathology .....	106
5	The Normal, Reactive Lymph Node .....	107
6	The Various Types of Classified Immunodeficiency Syndromes and Their Manifestations in Lymph Nodes .....	108
6.1	Combined Immunodeficiencies .....	108
6.1.1	Severe Combined Immunodeficiency .....	108
6.1.2	Adenosine Deaminase Deficiency .....	111
6.1.3	Purine Nucleoside Phosphorylase Deficiency .....	112
6.1.4	MHC Class II and/or Class I Deficiency .....	112
6.1.5	Reticular Dysgenesis (De Vaal and Seynhaeve's Syndrome) .....	113
6.2	Predominantly Antibody Deficiencies .....	113
6.2.1	X-Linked Agammaglobulinemia (Bruton's Syndrome) .....	113
6.2.2	X-Linked Hypogammaglobulinemia with Growth Hormone Deficiency .....	114
6.2.3	Immunoglobulin Deficiency with Increased IgM ("Hyper-IgM Syndrome") .....	115
6.2.4	Ig Heavy Chain Gene Deletions .....	115
6.2.5	Kappa Chain Deficiency .....	116
6.2.6	IgA Deficiency .....	116
6.2.7	Selective Deficiency of IgG Subclasses (with or without IgA Deficiency) .....	117
6.2.8	Common Variable Immunodeficiency .....	118
6.2.9	Transient Hypogammaglobulinemia of Infancy .....	119
6.3	Other Well-Defined Immunodeficiency Syndromes .....	120
6.3.1	Wiskott-Aldrich Syndrome .....	120
6.3.2	Ataxia Telangiectasia (Louis-Bar Syndrome) .....	120
6.3.3	Third and Fourth Pouch/Arch (DiGeorge) Syndrome .....	121
6.4	Overview of Pathogenetic Mechanisms Involved in Classical Primary Immunodeficiency Syndromes .....	122
7	Additional, Unclassified, Mostly Primary Immunodeficiency Syndromes Concerning the Antigen-Specific Part of the Immune Apparatus .....	122
8	Defects of Phagocyte Functions .....	123
9	Defects of the Complement System .....	128

10	The Problem of Selective Ineffective Immune Responsiveness .....	129
11	Animal Models of Primary Immunodeficiency Syndromes .....	130
12	Comments on Therapeutic Possibilities in Primary Immunodeficiency Syndromes .	131
13	Concluding Remarks .....	134
References .....		137

# Immunological Dysregulation of Lymph Nodes in AIDS Patients

G. R. F. KRUEGER \*, D. V. ABLASHI, P. LUSO, and S. F. JOSEPHS

1 Introduction .....	157
2 Lymph Node Morphology Suggesting Immune Dysregulation .....	158
3 Immunophenotyping of Lymphoid Cells in HIV-1 Infection .....	163
4 HIV-1-Cell Interactions .....	167
5 Immune Dysregulation Following HIV-1 Infection .....	172
6 Effects of Other Lymphotropic Viruses .....	174
7 Additional Possible Influences on the Immune System in Persons at Risk .....	177
8 Summary and Conclusions .....	177
References .....	180

# **Lymph Node Reaction Patterns in Patients with AIDS or AIDS-Related Complex**

J. DIEBOLD, J. AUDOUIN, A. LE TOURNEAU, S. PREVOT, and G. SZEKERES

1	Lymph Node Modifications in Patients with Persistent Generalized Lymphadenopathies and/or AIDS-Related Complex .....	189
1.1	Lymphadenopathy with Predominant Lymphoid Follicular Hyperplasia .....	190
1.1.1	The Follicles .....	190
1.1.2	The Deep Cortex .....	193
1.1.3	Plasma Cell Hyperplasia .....	195
1.1.4	Granulomas .....	198
1.1.5	Sinusal Reactions .....	198
1.1.6	Congestive Vessels .....	199
1.2	Lymphadenopathy Resembling Angiofollicular Polyadenopathy .....	199
1.3	Lymphadenopathy Resembling Angioimmunoblastic Lymphadenopathy .....	201
2	Lymph Node Modification in Patients with AIDS .....	203
3	Intermediate Pattern .....	204
4	Classification of the Nodal Lesions and Correlation with the Evolution .....	205
5	Associated Diseases .....	207
5.1	Infectious Diseases .....	208
5.2	Kaposi's Sarcoma .....	208
5.3	Non-Hodgkin's Malignant Lymphomas .....	210
5.4	Hodgkin's Disease .....	211
6	Detection of HIV .....	211
6.1	Electron Microscopic Studies .....	212
6.2	Immunohistochemical Studies .....	213
6.3	In Situ Hybridization .....	215
7	Conclusion .....	215
	References .....	216
