CONTENTS

SECTION 1: MATHEMATICAL AND COMPUTATIONAL ASPECTS

Remarks on Numerical Instability of BEM Solution 3
Y. Iso

Analytical Integration of Singular Boundary-Value Kernels Over Flat Triangular Surface Patch 9
M. Analoui, H. Tsuboi, T. Nakata

Macro-Elements for 2D- and 3D-Elasticity with BEM 21
E. Schnack

A Robust Numerical Integration Method for Three-Dimensional Boundary Element Analysis 33
K. Hayami

Reduction Method of Numerical Errors in the Boundary Element Method by Correcting Matrix Components 53
M. Koizumi, M. Onizawa

On the Efficiency of an Analytical Volume Integral Formula for a 3D Poisson Equation using the Boundary Element Method 63
H. Endou, T. Kuwahara, T. Takeda

A Mesh Generation Scheme Based on the Boundary Element Method 75
T. Omori, H. Igarashi, T. Honma

Development of the Automatic Mesh Generator for the 3D Boundary Element Method 87
T. Kuwahara, H. Honma, T. Takeda

Biconjugate Gradient Acceleration for Large BEM Systems of Equations 99
F.C. Araújo, W.J. Mansur, J.E.B. Malaghini

Bibliografische Informationen
http://d-nb.info/910292841

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

BEM with Fundamental Sources Placed on an Imaginary Exterior Boundary 111
Dj. Modjtahedi, M.M. Jamali

Non-Singularity Boundary Element Method 123
X-y. Lei, M-k. Huang

SECTION 2: POTENTIAL AND DIFFUSION PROBLEMS

Boundary Element Solutions to Potential Problems in the Helically Symmetric System 133
H. Igarashi, T. Honma

Numerical Analysis of the Electropotential Distribution on the Surface of Metal Structures Under Cathodic Protection - Application of Semi-Infinite Field BEM 143
M. Iwata, Y. Huang

Applications of the Boundary Element Method in Heat Conduction Problems of Turbine Rotors and Discs 155
S.H. Huang, Z.Y. Ma

Boundary Element Analysis of Unsteady Seepage Flow 169
J.H.A. Prodanoff, L.C. Wrobel, W.J. Mansur

3-Dimensional Boundary Element Analysis of Fracture Flow in a Rock Mass 179
X-X. Qian, Z-F. Zhou

Fractional Step Boundary Element Method for Convective Diffusion Problems 191
M. Sakakihara

Analysis of the Three-Dimensional Time-Dependent Diffusion Equation with a Steady and Constant Drift Term by the Boundary Element Method 201
R. Kawamura, M. Fukuma

Mixed Boundary Element Solutions to Three-Dimensional Convective Diffusion Equations for High Péclet Numbers 217
M. Kuroda, H. Igarashi, Y. Tanaka, T. Honma

Boundary Element Method Applied to Neutron Diffusion Problems of a Thin Layer Sandwiched Between Two Zones 227
M. Itagaki, C.A. Brebbia

A Boundary Element Analysis of Transient Convection-Diffusion Problems 241
D.B. DeFigueiredo, L.C. Wrobel

SECTION 3: STRESS ANALYSIS

Stress Intensity Factor Analysis by Combination of Boundary Element and Finite Element Methods (Application to Axisymmetric Crack Problems) 255
N. Miyazaki, T. Ikeda, T. Munakata

Fracture Calculations using a Crack Tip Hierarchical Shape Function 267
W.S. Hall, T.T. Hibbs

Evaluation of Mixed-Mode Stress Intensity Factors using the Path Independent J-Integral 281
M.H. Aliabadi

Nonlinear Fracture Mechanics by BEM using Green's Functions 293
G. Kuhn, S. Russwurm

Coupling BEM with Line-Spring Model for Dealing with Problems of Surface Cracked Plate 303
Z-J. Zeng, S-H. Dai

The Multiple Reciprocity Method Applied in Elasticity 313
A.C. Neves, C.A. Brebbia

Stress Concentration Analysis on Flat and Round Test Specimens Having Partially Circular Notches under Various Loading Conditions 327
N.A. Noda, H. Nisitani

Structural Analysis by BEM under Uncertain Loading Conditions 343
Y. Tada

Elastic Solutions for Two Tunnels Near Excavations in Anisotropic Materials 355
H. Alehossein, J.P. Carter

Time-Domain Boundary Element Formulation for Linear Viscoelasticity with Body Forces Using Particular Integrals 367
W.J. Sim, B.M. Kwak

New Boundary Element Method Formulation for Thermal Stress Analysis 383
Y. Ochiai, R. Ishida, T. Sekiya

A Direct Boundary Element Method for Transient Thermoelasticity Problems 395
A.G. Mavroudis, J.F.L. Chan

Boundary Element Method Applied to Two-Dimensional Non-Homogeneous Soils 409
F. Lin, L.A. Wood

Analysis of the Soil Geotextile Interaction Using the Boundary Element Method 419
T. Messafer, L.E. Coates

SECTION 4: PLATES AND SHELLS

The Solution of Plate Bending Problems with the Aid of a Boundary Element Algorithm Based on Singular Complex Functions 437
R. Piltner, R.L. Taylor

Boundary Strip Method Analysis for Elastic Bending of Plates 447
T. Horibe

Application of the Combined Boundary Element and Finite Element Method to Slab and Slab-on-Girder Bridges 457
S.F. NG, M.S. Cheung, T. Xu

Applications of the Boundary Element Method to Reissner's and Mindlin's Plate Models 467
T. Westphal Jr., C.S. Barcellos

Boundary Element Solutions for Linear Bending Problems of Elastic Shallow Spherical Shell 479
K. Yokoyama, S. Miyake, N. Tosaka

Finite Deflection of Shallow Shell by BEM without Domain Integration 491
Y. Sawaki, K. Takeuchi, N. Kamiya

Geometrically Nonlinear Bifurcation Analysis of Elastic Arch by the Boundary-Domain Element Method 503
S. Miyake, M. Nonaka, N. Tosaka

SECTION 5: DYNAMICS

Alternative Boundary Element Formulation for Elastodynamics 517
H.B. Coda, W.S. Venturini

A Truncation Scheme for BEM Analysis of Two-Dimensional Transient Wave Propagation Problems 535
W.L. Silva, W.J. Mansur

Time Domain Boundary Integral Equation Method for 3-D Scattering Problems by Inclusions 555
S. Hirose

Three-Dimensional Vibrations of Beam Structures using a Time-Stepping Boundary Element Method 567
E. de Langre, F. Axisa, D. Guilbaud

BEM Application to Phase Shift Analysis 581
M. Kitahara, K. Nakagawa
