

CONTENTS

1. Keynote Paper

Database Role in Information Systems: The Evolution of Database Technology and its Impact on Enterprise Information Systems

Donald J. Haderle

1

2. Demands on Database Systems in the 90s

Future Database Technology: Driving Forces and Directions

Peter C. Lockemann, Alfons Kemper, Guido Moerkotte

15

Management of Multimedia Complex Objects in the '90s

Michel E. Adiba

34

Database Language Standards: Past, Present, and Future

Phil Shaw

55

3. User Aspects

Language Technology for Post-Relational Data Systems

Joachim W. Schmidt, Florian Matthes

81

Human Factors of Database Systems

Rainer Gimnich, Klaus Kunkel, Thomas Strothotte

115

4. Database System and Architecture Concepts for Novel Applications

Evolution of Data Models

Hans-Jörg Schek, Marc H. Scholl

135

Object-Oriented Database Systems: Concepts and Perspectives

Rainer Unland, Gunter Schlageter

154

Deductive Database Rule Languages: Analysis and Case Study

Georges Gardarin, Jerry Kiernan

198

Extensibility in the Starburst Experimental Database System

Bruce Lindsay, Laura Haas

217

Logical Foundation of Data Replication

Stefan Jablonski, Hartmut Wedekind

249

5. System and Implementation Aspects**Trends in Distributed and Cooperative Database Management***Klaus Küspert, Erhard Rahm***263****Performance and Reliability Issues in Future DBMSs***Andreas Reuter***294****The Impact of Hardware on Database Systems***Patricia G. Selinger***316**
