Abstract	I
Acknowledgments	III
1 Introduction	1
1.1 Contributions and Publications	2
1.2 Outline	3
1.3 Notation	5
1.4 Port-Hamiltonian Systems	7
2 Port-Hamiltonian Formulation	11
2.1 Model Library – Compressible Non-Isothermal Euler Equations	11
2.2 Port-Hamiltonian Formulation	14
2.3 Ports and Stokes-Dirac Structure	18
2.4 Weak Formulation and Incorporation of Boundary Conditions	28
2.4.1 Change of State Variables	28
2.4.2 Structure-Preserving Incorporation of Boundary Conditions	29
2.4.3 Weak Formulation	31
3 Structure-Preserving Approximation	37
3.1 Spatial Discretization with EGFEM	37
3.1.1 Galerkin Approximation	37
3.1.2 Coordinate Representation	39
3.1.3 Reformulation in Tensor Calculus	43
3.2 Snapshot-Based Model Order Reduction	55
3.2.1 Computation of Projection Matrices	56
3.2.2 Reduced Order Model	58
3.3 Complexity Reduction	61
3.3.1 Complexity Reduction with Non-Structure-Preserving DEIM	61
3.3.2 Complexity Reduction via Empirical Quadrature	64
	V

4 Numerical Results on a Single Pipe	73
4.1 Model Comparison	74
4.1.1 Comparison of E_{pH} , $E_{pH,dc}$ and $E_{pH,d}$	74
4.1.2 Study for E_{pH} for Different Values of k_ω	76
4.2 Model Order and Complexity Reduction	78
4.2.1 Influence of Compatibility Conditions on Model Order Reduction	79
4.2.2 Influence of the Parity of r_p on the Reduced Order Model	81
4.2.3 Reducibility of a Single Pipe System	82
5 Application to Networks	87
5.1 Network Toplogy and Function Spaces	87
5.2 Coupling Conditions and the Port-Hamiltonian Framework	89
5.3 Port-Hamiltonian Network Model	92
5.3.1 Weak Formulation on Network	92
5.3.2 Coordinate Formulation on Network	95
5.4 Modification of Approximation Approach	98
5.5 Numerical Results for Gas Networks	100
5.5.1 Comparison of Flow with and without Coupling	100
5.5.2 A_ε versus A_ω	102
5.5.3 Reducibility of a Network System	107
6 Conclusion	113
A Time Integration with Implicit Euler	117
B Further Port-Hamiltonian Flow Models	123
B.1 GENERIC-based Non-Isothermal Flow	123
B.2 Incompressible Flow	125
B.3 Further Port-Hamiltonian Formulations of the Compressible Euler Equations	128
C Differentiation Index of the Differential-Algebraic Network System	133
Bibliography	137
Academic Curriculum Vitae	147
