

Gerd BARON	1
On point sets with differences of distances not less than the minimum distance	
Martin BLÜMLINGER	6
Sample path properties of diffusion processes on compact manifolds	
Thomas BURG, Michael DRMOTA, and Robert F. TICHY	20
Some new results in summability theory	
Michael DRMOTA	31
On irregularities of distribution on the hyperbolic plane	
Michael DRMOTA, Robert F. TICHY, and Reinhard WINKLER	43
Completely uniformly distributed sequences of matrices	
Peter GRABNER	58
On digit expansions with respect to second order linear recurring sequences	
Edmund HLAWKA	65
Näherungsformeln zur Berechnung von mehrfachen Integralen mit Anwendungen auf die Berechnung von Potentialen, Induktionskoeffizienten und Lösungen von Gleichungssystemen	
Peter KIRSCHENHOFER	112
On the variance of the sum of digit function	
Peter KIRSCHENHOFER and Helmut PRODINGER	117
On the analysis of probabilistic counting	
Christian KRATTENTHALER	121
A determinant evaluation and some enumeration results for plane partitions	
Gerhard LARCHER	132
An inequality with applications in diophantine approximation	
Wolfgang MÜLLER and Werner G. NOWAK	139
Lattice points in planar domains: Applications of Huxley's <i>Discrete Hardy-Littlewood Method</i>	
Harald NIEDERREITER	165
Pseudorandom numbers generated from shift register sequences	
Werner G. NOWAK	178
Divisors in arithmetic progressions in imaginary quadratic number fields	

Helmut PRODINGER	193
Further results on a problem of Knödel concerning the analysis of bin- packing	
Johannes SCHOISSENGEIER	199
An asymptotic expansion for $\sum_{n \leq N} \{n\alpha + \beta\}$	
Gerhard TURNWALD	206
A note on the Ramanujan - Nagell equation	
Reinhard WINKLER	208
Strong Weyl property in uniform distribution
