

CONTENTS

Preface	1
Contents	3
1. Methods in Paleogeothermics BUNTEBARTH/STEGENA	5
2. Temperature history of the earth's surface in relation to heat flow SHACKLETON	41
3. Isotope geothermometers HOEFS	45
4. Relations between coalification and paleogeothermics in Variscan and Alpidic foredeeps of western Europe TEICHMÖLLER/TEICHMÖLLER	53
5. The correlation of vitrinite reflectance with maximum temperature in humic organic matter BARKER/PAWLEWICZ	79
6. A comparison of two vitrinite reflectance methods for estimating paleotemperature gradients BUNTEBARTH/MIDDLETON	95
7. Methods for paleotemperature estimating using vitrinite reflectance data: a critical evaluation VETŐ/DÖVÉNY	105
8. A reaction kinetic approach to the temperature-time history of sedimentary basins SAJGÓ/LEFLER	119
9. Limits of application of the reaction kinetic method in paleo- geothermics LEFLER/SAJGÓ	153
10. Geothermal effect of magmatism and its contribution to the maturation of organic matter in sedimentary basins HORVÁTH/DÖVÉNY/LACZÓ	173
11. Paleotemperatures in the Central Alps - an attempt of interpretation WERNER	185
12. Geothermal studies in oil field districts of north China WANG/WANG/YAN/LU	195
References	205
Subject Index	229
