

Contents

1. Introduction	
By R.C. Whitten and P. Hamill (With 1 Figure)	1
1.1 General Discussion	1
1.1.1 Historical	1
1.1.2 Particle Measurements	1
1.1.3 Measurements of Precursor Gases	4
1.1.4 Laboratory Measurements	5
1.1.5 Models of the Aerosol Layer	6
1.2 Influence on Climate	6
1.3 Microphysical Processes	7
1.3.1 Nucleation	7
1.3.2 Condensation and Evaporation	9
1.3.3 Coagulation	10
1.3.4 Sedimentation	11
1.3.5 Transport	12
References	13
2. Observations	
By E.C.Y. Inn, N.H. Farlow, P.B. Russell, M.P. McCormick, and W.P. Chu (With 27 Figures)	15
2.1 Measurements of Precursor Gases in the Stratosphere	15
2.1.1 In Situ Mass Spectrometer Method	15
2.1.2 In Situ Filter Collection	16
2.1.3 In Situ Cryogenic Collection	17
2.1.4 Remote Sensing Methods	21
2.1.5 Summary of Stratospheric Observations of Sulfur Gases	21
2.2 Aircraft and Balloon Measurement of Aerosol Properties	23
2.2.1 Aerosol Constituents	23
2.2.2 Aerosol Properties	23
2.2.3 Detection Methods	24
2.2.4 Analytical Techniques	25
2.2.5 Statistical Treatments	26
2.2.6 Aitken Nuclei	27

2.2.7	Larger Acid Droplets	27
2.2.8	Granular Inclusions	30
2.2.9	Cosmic Dust	30
2.2.10	Volcanic Ash	31
2.2.11	Variations	31
2.2.12	Discussion	33
2.3	Lidar Measurements	34
2.3.1	The Lidar Technique	35
2.3.2	Survey of Results	37
2.3.3	Comparisons of Lidar and Other Results	43
2.3.4	Additional Applications	46
2.4	Satellite Observations	47
2.4.1	Present Spacecraft Experiments	49
2.4.2	Orbital Considerations	52
2.4.3	Results Obtained with SAM II	54
2.4.4	Results Obtained with SAGE	60
2.4.5	Ground-Truth Comparisons	62
2.4.6	Applications	64
References		64
3.	The Chemical Kinetics of Aerosol Formation	
	By R.G. Keesee and A.W. Castleman, Jr. (With 3 Figures)	69
3.1	Chemical Origin	69
3.2	Nucleation	74
3.3	Nucleation Mechanisms in the Stratosphere	78
3.3.1	Binary Nucleation	79
3.3.2	Ternary Nucleation	80
3.3.3	Binary Heterogeneous Nucleation	80
3.3.4	Heteromolecular Nucleation	81
3.4	Growth and Heterogeneous Reactions	84
3.5	Conclusions	90
References		90
4.	Models of Stratospheric Aerosols and Dust	
	By R.P. Turco (With 16 Figures)	93
4.1	Overview	93
4.2	The Generalized Aerosol Continuity Equation	95
4.3	Aerosol Models	100
4.3.1	The Simulated Distributions of Aerosol Precursor Gases ...	102
4.3.2	Aerosol Nucleation Models	105
4.3.3	Calculated Properties of the Aerosols	106

4.4 Models of Upper Atmospheric Dust	111
4.5 Anthropogenic Perturbations of the Aerosols	113
4.6 Conclusions	117
References	117
 5. Stratospheric Aerosols and Climate	
By O.B. Toon and J.B. Pollack (With 15 Figures)	121
5.1 Background	121
5.2 Statistical Relations Between Volcanic Explosions and Climatic Changes	123
5.2.1 Changes Observed After Single Eruptions	123
5.2.2 Changes Observed During Epochs of Volcanic Activity	127
5.3 Theoretical Relationships Between Volcanic Explosions and Climate	133
5.3.1 Radiative Properties of the Aerosols	133
5.3.2 Sensitivity Studies of the Effects of Aerosols on Climate	140
5.3.3 Theoretical Studies of the Effect of Volcanoes on Climate	143
5.4 Studies of Anthropogenic Alterations of the Stratospheric Aerosol Layer	144
5.5 Summary	145
References	146
