Introduction	13
1. The Topological Fields Theory and the Extended Standard Theory	17
1.1. Introduction	17
1.2. The Topological Fields Theory (TFT)	17
1.2.1. The main characteristics of the German sentence	17
1.2.2. Discussion of the TFT model	20
1.3. EST and German syntax	22
1.3.1. The main characteristics of EST	22
1.3.2. A sentence structure for German and Dutch	31
1.3.3. Discussion of the EST model	37
1.3.4. Different clause types	39
1.4. Comparison of the two models	40
1.5. Overview of chapter 2-6	42
2. The Initial Field in German: Topic and Theme structures	44
2.1. Two types of construction in the IF	44
2.2. Some analyses	46
2.3. Topic structures and deletion in COMP	48
2.4. Theme structures	52
2.5. Expletive <i>es</i>	56
2.6. Summary	64
3. The INFL position: complementizers and verb determination	66
3.1. The mechanism of verb determination	66
3.2. The process of verb determination in finite clauses	69
3.3.1. Finite clauses without complementizers	71
3.3.2. Complementizers in German	75
3.4. Summary and discussion	84

4. Scrambling in the Middle Field and the VP discussion	88
4.1. The VP-discussion	88
4.2. Scrambling	92
4.2.1. Introduction	92
4.2.2. Ergative scrambling	94
4.2.3. VP-internal scrambling	100
4.2.4. Adjunction to INFL	106
4.3. Summary	108
5. Infinitives in German and Dutch	110
5.1. Infinitival complements: the facts	110
5.1.1. Dutch	110
5.1.2. German	112
5.2. Some analyses of infinitival complements	114
5.3. Infinitival complements: an account	116
5.3.1. Premises	116
5.3.2. The rationale for Verb Raising	119
5.3.3. The facts explained	121
5.3.4. θ -marking and participles	124
5.4. Verb Raising formulated	130
5.5. Free infinitivals	132
5.6. Summary	135
6. The Final Field in German: Extraposition, linking conditions and the freezing effect	136
6.1. The constituents found in the Final Field	136
6.2. Dependent clauses in the Final Field	137
6.2.1. Different sorts of clauses and their positions	137
6.2.2. The freezing effect	145
6.3. Other constituents in the Final Field	146
6.3.1. Introduction	146
6.3.2. NPs in the FF: the marked cases	146
6.3.3. PPs in the FF: linking conditions	147
6.3.4. The freezing effect	152
6.4. Summary	154
7. Conclusion	155
7.1. Merits and demerits of the Topological Fields Theory	155
7.2. Merits and demerits of EST	158
7.3. The leading ideas	161
