Reasons for Failures in Antibiotic Therapy

Difficulties in Laboratory Handling

Thin, R.N.T.; Simmons, P.D. and Wood, R.C.: Difficulties in diagnosing prostatitis: results of repeated samples of expressed prostatic secretions (EPS)	79
de Rafael, L.; Meseguer, M.A.; Martinez Ferrer, M.; Navio, S. and Sanz, J.: Bacteriological counts and other laboratory findings in male urologic disorders . . .	82
Schiefer, H.G.: Diagnosis of prostatitis: a critical review (Comment)	86

Role of Neisseriae, Chlamydiae and Mycoplasmas

Krempf-Lamprecht, L.; Vogt, H.-J.: Neisseriae in postgonorrhoeic urethro-prostatitis . . .	88
Hartmann, A.A.: Male urethral carrier of possible etiological agents in prostatitis and their therapy	90
Grant, J. and Blacklock, N.J.: The association of Chlamydia trachomatis with epididymitis	93
Chandiok, P. and Blacklock, N.J.: Relapse/Re-Infection in prostatitis. The role of cross infection via the sexual consort	96
Darewicz, J.; Winięcki, L. and Malczyk, E.: Results of tetracycline treatment of prostatitis due to Chlamydia trachomatis	100
Pust, R.; Schäfer, R.; Stumpf, Ch.; Leitenberger, A.; Engstfeld, J.E. and Meier-Ewert, H.: Urethritis posterior. Diagnostic problems, possibilities of treatment and some etiological aspects	102
Meseguer, M.A.; de Rafael, L.; Martinez Ferrer, M.; Allona, A.; Baquero, F. and Sanz, J.: Ureaplasma urealyticum counts and other laboratory findings in male urologic disorders	110
Schiefer, H.G.: Role of neisseriae, chlamydiae, and mycoplasmas in prostatitis: current aspects (Comment)	114

Immunological Parameters

Shortliffe, L.M.D.: Characterization of prostatic mucosal immunity to enterobacterial infections	118
Hargreave, T.B.; James, K.; Chisholm, G.D.; El Demiry, M.; Szymaniec, S.; Harvey, J. and Ritchie, A.W.S.: Mechanisms of immunity within the prostate and male genital tract	123
Riedasch, G. and Möhring, K.: Is immuno-therapy beneficial in chronic bacterial prostatitis?	127
Brunner, H.: Host response in prostatitis: practical aspects (Comment)	132

Therapeutic Efforts in Idiopathic Prostatitis

Experimental Data

Aumüller, G.; Seitz, J.; Müntzing, J. and Chandler, J.: Possible pathogenetic mechanisms in the development of idiopathic prostatitis in rat lateral prostate	137
Müntzing, J. and Lundgren, R.: Experimental rat prostatitis and its treatment	141

Clinical Trials

<i>Thin, R.N.T.</i> : Treatment of non-bacterial prostatitis	145
<i>Ziegler, H.</i> : Prostatitis and sexual disorders: experiences in a long time treatment with a phytotherapeutic combination therapy	149
<i>Frick, J. and Aulitzky, W.</i> : Evaluation of hormonal and seminal parameters in patients with congestion of the prostate treated with extract <i>radicis urticae</i> (ERU)	151
<i>Ebeling, L.</i> : Therapeutic results of defined pollen-extract in patients with chronic prostatitis or BPH accompanied by chronic prostatitis	154

Psychosomatic Aspects

<i>Günther, E.A.</i> : Psychosomatic aspects of prostatitis	161
<i>Brähler, E.; Brunner, A.; Girshausen, Ch. and Weidner, W.</i> : Psychosomatic and somatopsychological aspects of chronic prostatitis: results of an empirical study and its therapeutic consequences	165
<i>Bauer, H.W.</i> : Therapy of idiopathic prostatitis (Comment)	168

Anatomic, Urodynamic and Other Reasons for Therapy Failures in Prostatitis and their Treatment

<i>Blacklock, N.J.</i> : Anatomic, urodynamic and other reasons for therapy failures in prostatitis	173
<i>Wiegand, S. and Weidner, W.</i> : Per rectal ultrasonography of the prostate in the diagnosis of chronic prostatitis and prostatodynia	177
<i>Naber, K.G.; Bartosik-Wich, B. and Schumacher, H.</i> : Perioperative chemoprophylaxis during transurethral resection (TUR) of the prostate and post TUR prostatitis	181
<i>Helpap, B. and Vogel, J.</i> : Morphological pattern of TUR-prostatitis	186
<i>Meares, E.M., Jr.</i> : Chronic bacterial prostatitis: role of transurethral prostatectomy (TURP) in therapy	193
<i>Weidner, W.</i> : TURP in cases with chronic prostatitis – pro and contra (Comment)	198

New Aspects in Therapy of Prostatodynia

<i>Blacklock, N.J.</i> : Urodynamic and psychometric observations and their implication in the management of prostatodynia	201
<i>Meares, E.M., Jr.</i> : Prostatodynia: clinical findings and rationale for treatment	207
<i>Muhrer, K.H. and Weidner, W.</i> : Proctological aspects of »pelvic disorders« in patients with prostatodynia	213
<i>Weidner, W.</i> : Therapy of functional urinary voiding disturbances in prostatodynia-practical results of the conference (Comment)	218

Fertility Disorders in Prostatitis disease and their Improvement with Therapy

<i>Comhaire, F.; Pieters, O.; Debrock, M.; Vermeulen, L.; Rowe, P. and Farley, T.</i> : Importance of male accessory gland infection in fertility disorders	223
<i>Hargreave, T.B.; Young, H.; Wood, I.W.; Harvey, J.; El-Dimiry, M.; James, K. and Chisholm, G.D.</i> : The role of <i>Ureaplasma urealyticum</i> in male infertility	230

<i>Hook, B.; Schieferstein, G. and Schubring, G.:</i> Investigation of mycoplasma cultures from semen samples of more than 1000 andrologic patients	236
<i>Nikkanen, V.:</i> Genital chlamydial infection and male infertility	241
<i>Riedel, H.-H.:</i> The influence of mycoplasma and E.coli on fertilization and the pre-implantation development of mouse oocytes in vitro	245
<i>Krause, W.:</i> Does prostatitis influence male fertility? (Comment)	251
