Acknowledgement — VII

Chapter 1

Units and measurements — 1

- 1.1 Introduction — 1
- 1.2 Basic arithmetic operations — 1
- 1.3 Hierarchy of operations — 2
- 1.4 Classification of unit system — 3
 - 1.4.1 Metric system of units — 3
 - 1.4.2 Classification of metric system of units — 4
- 1.5 Definition of base units — 5
- 1.6 Interconversion of units — 8
- 1.7 Significant figures — 9
- 1.8 Rules for performing arithmetic operations — 10
 - 1.8.1 Addition and subtraction — 10
 - 1.8.2 Multiplication and division — 11
 - 1.8.3 Mixed mathematical operations — 12
- 1.9 Rounding off significant figures — 13
- 1.10 Problems for practice — 14

Chapter 2

Uncertainties and errors — 17

- 2.1 Introduction — 17
- 2.2 Absolute and relative uncertainty — 20
- 2.3 Propagation of uncertainty — 21
- 2.4 Rounding off uncertainties — 28
- 2.5 Classification of errors — 28
- 2.6 Problems for practice — 29

Chapter 3

Some mathematical functions — 31

- 3.1 Introduction — 31
- 3.2 Classification of functions — 31
 - 3.2.1 Linear function — 31
 - 3.2.2 Exponential — 32
 - 3.2.3 Logarithmic function — 34
 - 3.2.4 Polynomials — 36
 - 3.2.5 Power function — 37
 - 3.2.6 Circle — 37
 - 3.2.7 Rational number — 38

3.2.8	Partial fractions —	39
3.2.9	Trigonometric functions —	39
3.2.9.1	Inverse trigonometric functions —	42
3.2.9.2	Hyperbolic trigonometric functions —	42
3.2.10	Taylor's series —	42
3.2.10.1	Maclaurin series —	43
3.2.11	Coordinate systems —	43
3.2.12	Number system —	45
3.3	Problems for practice —	48

Chapter 4

Descriptive statistics — 49

4.1	Introduction —	49
4.2	Mean —	50
4.2.1	Arithmetic mean —	51
4.2.2	Weighted mean —	51
4.2.3	Geometric mean —	51
4.2.4	Harmonic mean —	52
4.3	Median —	52
4.4	Mode —	53
4.5	Standard deviation —	53
4.6	Variance —	54
4.7	Coefficient of variation —	54
4.8	Data analysis —	57
4.8.1	Q-test —	57
4.8.2	Confidence limit —	59
4.8.3	t-Test —	59
4.8.4	F-test —	62
4.9	Distribution of errors —	65
4.9.1	Gaussian distribution —	65
4.9.2	Binomial distribution —	66
4.9.3	Poisson's distribution —	67
4.10	Statistical tools using spreadsheets —	67
4.11	Problems for practice —	70

Chapter 5

Numerical curve fitting — 71

5.1	Introduction —	71
5.2	Correlation —	71
5.2.1	Pearson correlation coefficient —	72
5.2.2	Spearman's rank correlation coefficient —	72
5.3	Regression —	73

5.4	Interpolation versus curve fitting —	74
5.5	Least square curve fitting —	74
5.5.1	Linear regression —	76
5.5.2	Multivariate linear regression —	85
5.5.3	Polynomial regression —	87
5.6	Regression and correlation in EXCEL —	90
5.7	Exercises for practice —	94

Chapter 6

Numerical integration — 97

6.1	Introduction —	97
6.2	Newton–Cotes formula —	98
6.2.1	Riemann sum —	98
6.2.2	Trapezoidal rule —	100
6.2.2.1	Error of trapezoidal rule —	105
6.2.3	Simpson's 1/3rd rule —	106
6.2.3.1	Composite integral Simpson's rule —	108
6.2.4	Simpson's 3/8 rule —	109
6.2.5	Boole's rule —	110
6.3	Exercises for practice —	115

Chapter 7

Differential equations — 117

7.1	Introduction —	117
7.2	Euler's method —	118
7.3	Runge–Kutta method —	121
7.3.1	RK 2 or predictor–corrector method —	121
7.3.2	RK3 —	124
7.3.3	RK4 —	124
7.4	Problems for practice —	129

Chapter 8

Numerical differentiation — 131

8.1	Introduction —	131
8.2	Derivatives using Newton's forward interpolation polynomial —	134
8.3	Derivatives using Newton's backward interpolating polynomial —	137
8.4	Derivatives using Stirling interpolating polynomial —	139
8.5	Newton's divided difference polynomial —	142
8.6	Lagrange's polynomial —	144
8.7	Richardson's extrapolation —	147
8.8	Problems for practice —	149

Chapter 9

Numerical root-finding methods — 151

- 9.1 Introduction — **151**
- 9.2 Newton–Raphson method — **151**
- 9.3 Iteration method — **156**
- 9.4 Binary bisection method — **162**
- 9.5 Secant method — **165**
- 9.6 Regula-Falsi method — **169**
- 9.7 Problems for practice — **174**

Chapter 10

Differentials and integrals — 175

- 10.1 Introduction — **175**
- 10.2 Partial derivatives — **175**
 - 10.2.1 Reciprocal identity — **176**
 - 10.2.2 Second partial derivative — **177**
 - 10.2.3 Mixed second partial derivative — **177**
 - 10.2.4 Euler’s reciprocity relationship — **177**
 - 10.2.5 Cyclic rule — **178**
- 10.3 Stationary points — **179**
- 10.4 Total differentials — **181**
 - 10.4.1 Exact and inexact integrals — **182**
- 10.5 Line integrals — **184**
 - 10.5.1 Multiple integral — **186**
 - 10.5.2 Double integrals as volumes — **187**
 - 10.5.3 Line integral of exact and inexact differentials — **189**
 - 10.5.4 Line integrals in thermodynamics — **191**
- 10.6 Problems for practice — **192**

Appendix A — 193

Appendix B: Answers to the problems for practice — 197

Index — 199
