

DNA-Encoded Libraries

	Preface	V
	Abstracts	IX
	Table of Contents	XXXIII
	Foreword: DNA-Encoded Chemical Libraries: Past, Present, and Future	
	D. Neri	1
1	Introduction	
	J. Scheuermann and Y. Li	5
2	DNA-Compatible Organic Reactions	7
2.1	Amide-Bond-Forming Reactions	
	Y. Li, X. Fang, and Y. Wang	7
2.2	Metal-Promoted DEL-Compatible C—C Bond Forming Reactions	
	F. Migliorini, S. Puglioli, D. Neri, S. Cazzamalli, and N. Favalli	97
2.3	Metal-Free DEL-Compatible C—C Bond Forming Reactions	
	Z. Wang and A. L. Satz	137
2.4	On-DNA C—X (X = N, O, P, S, Se) Bond Forming Reactions	
	W. Hou, G. Yang, and H. Xu	151
2.5	On-DNA C—H Transformations	
	X. Wang and X. Lu	215
2.6	On-DNA Photoredox-Catalyzed Reactions	
	A. Granados and G. A. Molander	269
2.7	On-DNA Cyclization Reactions	
	G. Liu and J. Feng	325
2.8	DNA-Encoded Isocyanide Multicomponent Reactions	
	S. Willems and A. Brunschweiler	351
2.9	On-DNA Functional-Group Transformations	
	N. Simmons, P. Chheda, and D. Schuman	363
2.10	Reversible Immobilization of DNA for Chemical Modification	
	R. M. Franzini	419
2.11	Covalent Attachment on a Solid Support	
	R. M. Franzini	423

Table of Contents

Foreword: DNA-Encoded Chemical Libraries: Past, Present, and Future
D. Neri

	Foreword: DNA-Encoded Chemical Libraries: Past, Present, and Future ...	1
1	Introduction J. Scheuermann and Y. Li	
1	Introduction	5
2	DNA-Compatible Organic Reactions	
2.1	Amide-Bond-Forming Reactions Y. Li, X. Fang, and Y. Wang	
2.1	Amide-Bond-Forming Reactions	7
2.1.1	Amidation with Carboxylic Acids	8
2.1.1.1	Coupling Using Carbodiimides	8
2.1.1.1.1	Coupling Using EDC/s-NHS	9
2.1.1.1.2	Coupling Using EDCI/s-NHS	14
2.1.1.1.3	Coupling Using EDC/HOAt/ <i>N,N</i> -Diisopropylethylamine	17
2.1.1.1.4	Coupling Using EDC/HOBt	18
2.1.1.1.5	Coupling Using EDC/NHS	19
2.1.1.1.6	Coupling Using DCC/NHS	20
2.1.1.1.7	Coupling Using DIC/NHS	22
2.1.1.1.8	Coupling Using DIC/HOAt	22
2.1.1.2	Coupling Using Guanidinium and Uronium Salts	24
2.1.1.2.1	Coupling Using HATU/ <i>N,N</i> -Diisopropylethylamine	24
2.1.1.2.2	Coupling Using HATU/HOAt/ <i>N,N</i> -Diisopropylethylamine	49
2.1.1.3	Coupling Using Triazine Reagents	53
2.1.1.4	Coupling Using Organophosphorus Reagents	68
2.1.2	Amidation with Amines	69
2.1.2.1	Coupling Using DMTMM	70
2.1.2.2	Coupling Using DIC/HOAt	78
2.1.3	Amidation with Active Esters	81
2.1.4	Amidation with Acyl Chlorides	87
2.1.5	Amidation with Anhydrides	88
2.1.6	Oxidative Amidation	88

2.12	Micelle-Mediated Synthesis J. S. Graham, H. A. Stanway-Gordon, and M. J. Waring	427
3	DEL Encoding and Setup Strategies	443
3.1	DNA-Templated Synthesis G. Zhang, Q. Nie, and J. Sun	443
3.2	DNA-Recorded Synthesis	461
3.2.1	Single-Pharmacophore Libraries	461
3.2.1.1	Encoding Using Double-Stranded DNA: A Headpiece-Based DNA Ligation Strategy Y. Zhou, Y. Huang, L. Xu, and F. Xiong	461
3.2.1.2	Encoding Using Single-Stranded DNA (Iterative Splint-Ligation Procedures) T. Georgiev, S. Cazzamalli, D. Neri, and G. Bassi	489
3.2.1.3	Chemical Ligation/Encoding A. D. Keefe and A. Litovchick	503
3.2.2	Dual-Pharmacophore Libraries	519
3.2.2.1	Encoded Self-Assembling (Dynamic) Chemical Libraries L. Prati, L. Lucaroni, S. Cazzamalli, D. Neri, and S. Oehler	519
3.2.2.2	Peptide Nucleic Acid (PNA) Encoded Libraries L. Farrera-Soler, B. R. Vummidi, S. Barluenga, and N. Winssinger	543
3.2.2.3	DNA-Encoded Dynamic Combinatorial Chemical Libraries F. V. Reddavid, S. Heiden, M. Cui, W. Lin, M. Thompson, and Y. Zhang	549
3.2.3	Special Libraries	561
3.2.3.1	Macrocyclic DELs D. Gillingham and B. Sauter	561
3.2.3.2	Natural-Product-Enriched DELs H. Xu, P. Ma, and G. Yang	575
4	Library Selection Procedures	581
4.1	Selections by Affinity Capture on Solid Support A. Gloger and J. Scheuermann	581
4.2	DEL Selection Using DNA-Programmed Affinity Labelling (DPAL) Y. Huang and X. Li	593

4.3	Selections of DNA-Encoded Libraries to Protein Targets on Living Cells B. Cai and C. J. Krusemark	599
4.4	Selections of DNA-Encoded Libraries to Protein Targets within Living Cells B. Cai and C. J. Krusemark	607
5	Evaluation/Cheminformatic Methods	613
5.1	Informatic Tools, Processing, and Evaluation of DEL Selection Data W. Cui	613
5.2	On-DNA Resynthesis and Affinity Selection Mass Spectrometry (ASMS) W. Su, B. Xia, and T. L. Foley	621
	Author Index	629
	Abbreviations	655

Foreword: DNA-Encoded Chemical Libraries: Past, Present, and Future ... 1

1	Introduction J. Scheuermann and Y. Li	
1	Introduction	5
2	DNA-Compatible Organic Reactions	
2.1	Amide-Bond-Forming Reactions Y. Li, X. Fang, and Y. Wang	
2.1	Amide-Bond-Forming Reactions	7
2.1.1	Amidation with Carboxylic Acids	8
2.1.1.1	Coupling Using Carbodiimides	8
2.1.1.1.1	Coupling Using EDC/s-NHS	9
2.1.1.1.2	Coupling Using EDCI/s-NHS	14
2.1.1.1.3	Coupling Using EDC/HOAt/N,N-Diisopropylethylamine	17
2.1.1.1.4	Coupling Using EDC/HOBt	18
2.1.1.1.5	Coupling Using EDC/NHS	19
2.1.1.1.6	Coupling Using DCC/NHS	20
2.1.1.1.7	Coupling Using DIC/NHS	22
2.1.1.1.8	Coupling Using DIC/HOAt	22
2.1.1.2	Coupling Using Guanidinium and Uronium Salts	24
2.1.1.2.1	Coupling Using HATU/N,N-Diisopropylethylamine	24
2.1.1.2.2	Coupling Using HATU/HOAt/N,N-Diisopropylethylamine	49
2.1.1.3	Coupling Using Triazine Reagents	53
2.1.1.4	Coupling Using Organophosphorus Reagents	68
2.1.2	Amidation with Amines	69
2.1.2.1	Coupling Using DMTMM	70
2.1.2.2	Coupling Using DIC/HOAt	78
2.1.3	Amidation with Active Esters	81
2.1.4	Amidation with Acyl Chlorides	87
2.1.5	Amidation with Anhydrides	88
2.1.6	Oxidative Amidation	88

2.2	Metal-Promoted DEL-Compatible C—C Bond Forming Reactions F. Migliorini, S. Puglioli, D. Neri, S. Cazzamalli, and N. Favalli	
2.2	Metal-Promoted DEL-Compatible C—C Bond Forming Reactions	97
2.2.1	Experimental Procedures	100
2.2.1.1	Suzuki–Miyaura Cross-Coupling Reactions	100
2.2.1.1.1	Suzuki Cross Coupling of Oligonucleotide Iodobenzoic Acid and (Iodophenyl)acetic Acid Derivatives	100
2.2.1.1.2	Suzuki Cross Coupling of Oligonucleotide Bromobenzoic Acid Derivatives ...	105
2.2.1.1.3	Suzuki Cross Coupling of Oligonucleotide Bromopyridine Derivatives	106
2.2.1.1.4	Suzuki Cross Coupling of Oligonucleotide Fluorosulfonate Derivatives	108
2.2.1.1.5	Suzuki Cross Coupling of Oligonucleotide Chlorobenzoic Acid Derivatives ...	111
2.2.1.1.6	Suzuki Cross Coupling of Oligonucleotide Heteroaromatic Halide Derivatives	114
2.2.1.2	Sonogashira Cross-Coupling Reactions	118
2.2.1.2.1	Sonogashira Cross Coupling of Oligonucleotide 4-Iodophenylalanine Derivatives	118
2.2.1.2.2	Sonogashira Cross Coupling of Oligonucleotide 3-(4-Iodophenyl)propanoic Acid Derivatives	120
2.2.1.2.3	Sonogashira Cross Coupling of Oligonucleotide Fluorosulfonate Derivatives ·	123
2.2.1.3	Heck Cross-Coupling Reactions	126
2.2.1.3.1	Heck Cross Coupling of On-DNA 4-Vinylbenzamides and Acrylamides with Aryl Iodides and Bromides	126
2.2.1.3.2	Heck Cross Coupling of On-DNA 4-Vinylbenzamides and Acrylamides with Arylboronic Acid Derivatives	128
2.2.1.3.3	“Reverse” Heck Cross Coupling of an On-DNA Aryl Iodide with Styrenes	131
2.2.1.3.4	DNA-Templated Heck Cross Coupling in the Presence of a Water-Soluble Precatalyst	132
2.2.1.4	On-DNA Giese Reactions	133
2.2.1.4.1	Decarboxylative Giese Reaction of DNA-Conjugated Michael Acceptors with Redox-Active Esters	133
2.2.2	Summary and Outlook	135
2.3	Metal-Free DEL-Compatible C—C Bond Forming Reactions Z. Wang and A. L. Satz	
2.3	Metal-Free DEL-Compatible C—C Bond Forming Reactions	137
2.3.1	Experimental Procedures	137
2.3.1.1	Aldol Reactions	137
2.3.1.2	Variants of the Aldol Condensation	140
2.3.1.3	Indole C3-Alkylation Reactions	142

2.3.1.4	Michael Additions	143
2.3.1.5	Bestmann-Modified Seyferth–Gilbert Homologation	146
2.3.1.6	Wittig Reactions	147
2.3.2	Summary and Outlook	149
2.4	On-DNA C–X (X = N, O, P, S, Se) Bond Forming Reactions W. Hou, G. Yang, and H. Xu	
2.4	On-DNA C–X (X = N, O, P, S, Se) Bond Forming Reactions	151
2.4.1	Experimental Procedures	156
2.4.1.1	General Procedures	156
2.4.1.2	C–N Bond Formation	158
2.4.1.2.1	Metal-Promoted Cross-Coupling Reactions	158
2.4.1.2.2	Nucleophilic Aromatic Substitution Reactions	169
2.4.1.2.3	Aminolysis of Epoxides or Aziridines	172
2.4.1.2.4	Palladium-Mediated Hydroamination	176
2.4.1.2.5	Reductive Amination of Aldehydes and Ketones	180
2.4.1.2.6	Nucleophilic Substitution Reactions	182
2.4.1.2.7	Dehydrative Coupling of Indole-Activated Alcohols and Amines	183
2.4.1.3	C–O Bond Formation	185
2.4.1.3.1	Nucleophilic Aromatic Substitution Reactions	185
2.4.1.3.2	Nucleophilic Ring Opening of Aziridines	186
2.4.1.3.3	Enzymatic Glycosylation	187
2.4.1.4	C–S Bond Formation	188
2.4.1.4.1	Metal-Promoted Cross-Coupling Reactions	188
2.4.1.4.2	Oxidative Coupling of Electron-Rich Arenes and Thiols	191
2.4.1.4.3	Nucleophilic Aromatic Substitution of DNA-Conjugated Arylammonium Salts with Thiols	194
2.4.1.4.4	RASS-Enabled On-DNA Nucleophilic Substitution	195
2.4.1.4.5	Dehydrative Coupling of Indole-Activated Alcohols and Thiols	196
2.4.1.4.6	On-DNA RASS-Enabled Sulfoxide and Sulfone Formation	198
2.4.1.5	C–Se Bond Formation	201
2.4.1.5.1	Direct Oxidative and RASS-Enabled Radical Selanylations	201
2.4.1.5.2	Tris(perfluorophenyl)borane-Promoted C–H Selanylation	204
2.4.1.5.3	Rhodium-Promoted C–H Selanylation	207
2.4.1.6	C–P Bond Formation	211
2.4.1.6.1	Palladium-Catalyzed Phosphorylation of Aryl Fluorosulfonates	211
2.4.1.6.2	RASS-Enabled C–P Bond Formation	212

2.4.1.6.3	Cross-Dehydrogenative-Coupling-Based Phosphorylation of 1,2,3,4-Tertahydroisoquinolines	213
2.4.2	Summary and Outlook	213
2.5	On-DNA C—H Transformations X. Wang and X. Lu	
2.5	On-DNA C—H Transformations	215
2.5.1	Experimental Procedures	216
2.5.1.1	Transition-Metal-Mediated C—H Functionalization	216
2.5.1.1.1	Ruthenium-Promoted C—H Activation Reactions	216
2.5.1.1.2	Rhodium-Promoted C—H Activation Reactions	217
2.5.1.1.3	Iridium-Promoted C—H Activation Reactions	221
2.5.1.1.4	Palladium-Promoted C—H Activation Reactions	224
2.5.1.1.5	Copper-Promoted C—H Activation Reactions	238
2.5.1.2	Photocatalyst-Mediated C—H Functionalization	243
2.5.1.3	Biocatalyst-Mediated C—H Functionalization	260
2.5.2	Summary and Outlook	267
2.6	On-DNA Photoredox-Catalyzed Reactions A. Granados and G. A. Molander	
2.6	On-DNA Photoredox-Catalyzed Reactions	269
2.6.1	Experimental Procedures	274
2.6.1.1	Decarboxylative Alkylation of On-DNA Alkenes with α -Amino Acids	274
2.6.1.2	Defluorinative Alkylation of On-DNA (Trifluoromethyl)alkenes Using Silicates, Dihydropyridines, and Amino Acids	276
2.6.1.3	Defluorinative Aminomethylation of On-DNA (Trifluoromethyl)alkenes with (Aminomethyl)silanes	280
2.6.1.4	Cycloaddition of On-DNA Styrenes with Cinnamate Esters	281
2.6.1.5	Decarboxylative Coupling of On-DNA Aldehydes with Amino Acids	283
2.6.1.6	Alkylation of On-DNA Alkenes Using <i>N</i> -tert-Butoxycarbonyl-Protected Saturated Heterocycles	286
2.6.1.7	Alkylation of On-DNA Alkenes Using <i>N</i> -Aryl Tertiary Amines	288
2.6.1.8	Decarboxylative Alkylation of On-DNA Quinoxalin-2-ones Using Carboxylic Acids	290
2.6.1.9	Alkylation of On-DNA Aryl Halides Using Alkenes	291
2.6.1.10	Arylation of On-DNA Aryl Halides Using Heterocycles	293
2.6.1.11	Deaminative Alkylation of On-DNA Alkenes with Imines	295

2.6.1.12	Hydroalkylation of On-DNA Alkenes Using Bicyclo[1.1.1]pentane Derivatives	297
2.6.1.13	Alkylation of On-DNA Aryl Halides Using 4-Alkyl-1,4-dihydropyridines, Amino Acids, and Other Radical Precursors	299
2.6.1.14	Alkylation of On-DNA Aryl Halides Using Alkyl Bromides	304
2.6.1.15	Aminomethylation of On-DNA Aryl Halides Using (Aminomethyl)silanes	307
2.6.1.16	Decarboxylative Coupling of On-DNA Aryl Halides Using Aliphatic Carboxylic Acids	308
2.6.1.17	Decarboxylative Hydroalkylation of On-DNA Alkenes Using Redox-Active Esters	310
2.6.1.18	Multicomponent (Trifluoromethyl)alkylation of On-DNA Alkenes	313
2.6.1.19	Sulfonylation of On-DNA Aryl Halides Using Sodium Sulfinates	315
2.6.1.20	Visible-Light-Promoted Selenation of On-DNA Hetarenes Using Diselenides	317
2.6.1.21	Deoxygenative Coupling of On-DNA Cyanopyridines and Alcohol-Derived Benzoates	320
2.6.2	Summary and Outlook	321
2.7	On-DNA Cyclization Reactions G. Liu and J. Feng	
2.7	On-DNA Cyclization Reactions	325
2.7.1	Experimental Procedures	338
2.7.1.1	On-DNA Cyclization To Give Benzimidazoles	338
2.7.1.2	On-DNA Cyclization To Give 2-Substituted Indazolones	344
2.7.2	Summary and Outlook	347
2.8	DNA-Encoded Isocyanide Multicomponent Reactions S. Willems and A. Brunschweiler	
2.8	DNA-Encoded Isocyanide Multicomponent Reactions	351
2.8.1	Experimental Procedures	355
2.8.1.1	Synthesis of CPG–DNA–Aldehyde Conjugates by Amide Coupling	355
2.8.1.2	Ugi Four-Component Reaction	356
2.8.1.3	Gröbke–Blackburn–Bienaymé Reaction	357
2.8.1.4	Ugi–Azide Reaction	359
2.8.1.5	Ugi–Aza–Wittig Reaction	360
2.8.2	Summary and Outlook	361

2.9	On-DNA Functional-Group Transformations N. Simmons, P. Chheda, and D. Schuman	
2.9	On-DNA Functional-Group Transformations	363
2.9.1	Experimental Procedures	365
2.9.1.1	Formation of Amines	365
2.9.1.1.1	Deprotection of 9-Fluorenylmethoxycarbonyl (<i>N</i> -Fmoc) Carbamates to Amines	365
2.9.1.1.2	Deprotection of <i>tert</i> -Butoxycarbonyl (<i>N</i> -Boc) Carbamates to Amines	367
2.9.1.1.3	Deprotection of 2-Nitrobenzenesulfonamides (<i>N</i> -Ns) to Amines	369
2.9.1.1.4	Deprotection of 6-Nitroveratryloxycarbonyl (<i>N</i> -Nvoc) Carbamates to Amines	371
2.9.1.1.5	Deprotection of (Allyloxy)carbonyl (<i>N</i> -Alloc) Carbamates to Amines	371
2.9.1.1.6	Deprotection of Benzyl Carbamates (<i>N</i> -Cbz) to Amines	373
2.9.1.1.7	Deprotection of 4-Methyltrityl (<i>N</i> -Mtt) Protected Amines	375
2.9.1.1.8	Deprotection of Monomethoxytrityl (<i>N</i> -MMT) Protected Amines	375
2.9.1.1.9	Deprotection of Dimethoxytrityl (<i>N</i> -DMT) Protected Amines	376
2.9.1.1.10	Deprotection of <i>N</i> -Allyl-Protected Amines	376
2.9.1.1.11	Deprotection of <i>N</i> -Pent-4-enoyl-Protected Amines	378
2.9.1.1.12	Deprotection of Phthalimides (NPhth) to Amines	378
2.9.1.1.13	Deprotection of 2-(Methylsulfonyl)ethyl Carbamates (<i>N</i> -Msec) to Amines	379
2.9.1.1.14	Deprotection of Trifluoroacetic Amides (<i>N</i> -TFA) to Amines	379
2.9.1.1.15	Conversion of (Het)aryl Halides into (Protected) Amines	380
2.9.1.1.16	Reduction of Nitro Groups to Amines	382
2.9.1.1.17	Reduction of Azides to Amines	387
2.9.1.1.18	Reduction of Nitriles to Amines	389
2.9.1.2	Formation of Hydrazides	391
2.9.1.2.1	Deprotection of <i>N</i> -(<i>tert</i> -Butoxycarbonyl)-Protected Hydrazides	391
2.9.1.3	Formation of Carboxylic Acids	392
2.9.1.3.1	Hydrolysis of Esters to Acids	392
2.9.1.3.2	Hydroxycarbonylation of (Het)aryl Halides to Acids	393
2.9.1.3.3	Pinnick Oxidation of Aldehydes to Acids	396
2.9.1.4	Formation of Aldehydes	396
2.9.1.4.1	Cleavage of Acetals to Aldehydes	397
2.9.1.4.2	Oxidative Cleavage of 1,2-Diols to Aldehydes	397
2.9.1.5	Formation of Ketones	398
2.9.1.6	Formation of Alcohols	398
2.9.1.6.1	Deprotection of <i>tert</i> -Butyldimethylsilyl Ethers to Alcohols in Solid Phase	401
2.9.1.7	Formation of Sulfoxides and Sulfones	402

2.9.1.8	Formation of Thiols	403
2.9.1.9	Formation of Guanidines	404
2.9.1.10	Formation of Isocyanates and Isothiocyanates	406
2.9.1.11	Formation of Hydrazones	406
2.9.1.12	Formation of Halides	407
2.9.1.13	Formation of Alkynes	409
2.9.1.13.1	Deprotection of Triisopropylsilyl (TIPS) Protected Alkynes to Alkynes	409
2.9.1.13.2	Homologation of Aldehydes to Alkynes in Solid Phase	409
2.9.1.14	Formation of Amidoximes	410
2.9.1.14.1	Conversion of Cyanides into Amidoximes in Solution Phase	410
2.9.1.15	Formation of Azides	411
2.9.1.15.1	Diazo Transfer to Amines To Form Azides in Solution Phase	411
2.9.1.16	Formation of Fluorosulfonates	414
2.9.1.16.1	Conversion of Phenols into Aryl Fluorosulfonates	414
2.9.2	Summary and Outlook	415
2.10	Reversible Immobilization of DNA for Chemical Modification R. M. Franzini	
2.10	Reversible Immobilization of DNA for Chemical Modification	419
2.10.1	Experimental Procedures	420
2.10.1.1	Amide-Bond Formation with DNA Immobilized on DEAE Sepharose	420
2.10.1.2	Anhydrous on-DNA Chemistry on Solid Supports: Coupling of SnAP Reagents	420
2.10.2	Summary and Outlook	421
2.11	Covalent Attachment on a Solid Support R. M. Franzini	
2.11	Covalent Attachment on a Solid Support	423
2.11.1	Experimental Procedure	425
2.11.1.1	Coupling of Carboxylic Acids to Amine-Modified DNA on Controlled-Pore Glass Beads	425
2.11.2	Summary and Outlook	425

XL	Table of Contents	
2.12	Micelle-Mediated Synthesis J. S. Graham, H. A. Stanway-Gordon, and M. J. Waring	
2.12	Micelle-Mediated Synthesis	427
2.12.1	Experimental Procedures	429
2.12.1.1	Suzuki–Miyaura Coupling	429
2.12.1.2	Amide-Bond Formation	431
2.12.1.3	Hydrogenolysis/Hydrogenation	436
2.12.1.4	Buchwald–Hartwig Coupling	438
2.12.2	General Reaction Workflow for Heated Micellar-Mediated Reactions	441
2.12.3	Summary and Outlook	442
3	DEL Encoding and Setup Strategies	
3.1	DNA-Templated Synthesis G. Zhang, Q. Nie, and J. Sun	
3.1	DNA-Templated Synthesis	443
3.1.1	Experimental Procedures	445
3.1.1.1	Demonstration of DNA-Templated Macrocyclic Library Synthesis	445
3.1.1.2	Translation of DNA into a Library of 13824 Synthetic Small-Molecule Macrocycles Suitable for In Vitro Selection	450
3.1.1.3	Second-Generation DNA-Templated Macrocyclic Libraries for the Discovery of Bioactive Small Molecules	452
3.1.1.4	DTS Using a Universal Template	457
3.1.2	Summary and Outlook	460
3.2	DNA-Recorded Synthesis	
3.2.1	Single-Pharmacophore Libraries	
3.2.1.1	Encoding Using Double-Stranded DNA: A Headpiece-Based DNA Ligation Strategy Y. Zhou, Y. Huang, L. Xu, and F. Xiong	
3.2.1.1	Encoding Using Double-Stranded DNA: A Headpiece-Based DNA Ligation Strategy	461
3.2.1.1.1	“Split and Pool” Synthesis of Double-Stranded DELs	463

3.2.1.1.2	Experimental Procedures	469
3.2.1.1.2.1	DNAs Used for dsDEL Construction	469
3.2.1.1.2.2	Chemistry of Building-Block Addition for dsDEL Construction	471
3.2.1.1.2.3	Conventional Encoding Methodologies: Enzymatic Ligation	474
3.2.1.1.2.4	Alternative Approaches: Chemical Ligation for Encoding	476
3.2.1.1.2.5	Library Quality Control for dsDELs	478
3.2.1.1.3	Summary and Outlook	482
3.2.1.2	Encoding Using Single-Stranded DNA (Iterative Splint-Ligation Procedures) T. Georgiev, S. Cazzamalli, D. Neri, and G. Bassi	
3.2.1.2	Encoding Using Single-Stranded DNA (Iterative Splint-Ligation Procedures) ..	489
3.2.1.2.1	Experimental Procedures	491
3.2.1.2.2	Summary and Outlook	499
3.2.1.3	Chemical Ligation/Encoding A. D. Keefe and A. Litovchick	
3.2.1.3	Chemical Ligation/Encoding	503
3.2.1.3.1	Experimental Procedures	504
3.2.1.3.1.1	Chemical Ligation with 5'-Iodo and 3'-Phosphorothioate Oligonucleotides ...	504
3.2.1.3.1.2	Chemical Ligation with 5'-Azido and 3'-O-Propargyl or 3'-O-Propargyl-TIPS Oligonucleotides	506
3.2.1.3.1.3	Chemical Ligation with 5'-Monophospho and 3'-Hydroxy or 5'-Hydroxy and 3'-Monophospho Oligonucleotides	508
3.2.1.3.1.4	Chemical Ligation with 3'-Azido and 5'-Dibenzocyclooctyne Oligonucleotides	510
3.2.1.3.1.5	Chemical Ligation with 5'-Thymidine and 3'-Psoralen Oligonucleotides	511
3.2.1.3.1.6	Proof-of-Concept Demonstration Using 5'-Azido/3'-Propargyl-TIPS Oligonucleotide Ligation To Encode a Chemical Library followed by Selection, Re-synthesis, and Discovery of Active Compounds	511
3.2.1.3.2	Summary and Outlook	516

3.2.2	Dual-Pharmacophore Libraries	
3.2.2.1	Encoded Self-Assembling (Dynamic) Chemical Libraries L. Prati, L. Lucaroni, S. Cazzamalli, D. Neri, and S. Oehler	
3.2.2.1	Encoded Self-Assembling (Dynamic) Chemical Libraries	519
3.2.2.1.1	Experimental Procedures	522
3.2.2.1.1.1	Synthesis of ESAC Libraries	522
3.2.2.1.1.2	Synthesis of ESAC 2+1 and ESAC+ Libraries	525
3.2.2.1.1.3	DNA-Encoded Dynamic Libraries	527
3.2.2.1.1.3.1	Synthesis of a DNA-Encoded Dynamic Combinatorial Chemical Library (EDCCL)	527
3.2.2.1.1.3.2	Synthesis of a DNA-Encoded Dynamic Library (DEDL)	529
3.2.2.1.1.4	Purification and Quality-Control Procedures for Library Synthesis	531
3.2.2.1.1.5	Hit Validation	535
3.2.2.1.1.6	Synthesis of a Small-Molecule–Drug Conjugate (AAZ+-ValCit-MMAE)	538
3.2.2.1.2	Summary and Outlook	540
3.2.2.2	Peptide Nucleic Acid (PNA) Encoded Libraries L. Farrera-Soler, B. R. Vummidi, S. Barluenga, and N. Winssinger	
3.2.2.2	Peptide Nucleic Acid (PNA) Encoded Libraries	543
3.2.2.2.1	Experimental Procedures	543
3.2.2.2.1.1	Synthesis of a PNA-Peptide Library	543
3.2.2.2.1.2	Generation of a ^D Suprabody Library	544
3.2.2.2.1.3	Screening Selection	546
3.2.2.2.1.4	Screening Readout	546
3.2.2.2.2	Summary and Outlook	547
3.2.2.3	DNA-Encoded Dynamic Combinatorial Chemical Libraries F. V. Reddavid, S. Heiden, M. Cui, W. Lin, M. Thompson, and Y. Zhang	
3.2.2.3	DNA-Encoded Dynamic Combinatorial Chemical Libraries	549
3.2.2.3.1	First-Generation DNA-Encoded Dynamic Combinatorial Chemical Libraries ..	550
3.2.2.3.2	Second-Generation DNA-Encoded Dynamic Combinatorial Chemical Libraries	552
3.2.2.3.3	Selection Stringency	554

3.2.2.3.3.1	Length Stringency	554
3.2.2.3.3.2	Temperature Stringency	554
3.2.2.3.4	Affinity Maturation	556
3.2.2.3.5	Experimental Procedures	556
3.2.3	Special Libraries	
3.2.3.1	Macrocyclic DELs D. Gillingham and B. Sauter	
3.2.3.1	Macrocyclic DELs	561
3.2.3.1.1	Experimental Procedures	562
3.2.3.1.1.1	Wittig-Based Macrocyclization in DNA-Templated Libraries	562
3.2.3.1.1.2	Ring Closure by Amide Coupling	563
3.2.3.1.1.3	Ring Closure by CuAAC	564
3.2.3.1.1.4	Thiol-Linked Macrocyclizations	568
3.2.3.1.2	Summary and Outlook	573
3.2.3.2	Natural-Product-Enriched DELs H. Xu, P. Ma, and G. Yang	
3.2.3.2	Natural-Product-Enriched DELs	575
3.2.3.2.1	Experimental Procedures	577
3.2.3.2.1.1	Synthesis of Alkyne-Modified Headpiece DNA	577
3.2.3.2.1.2	Attachment of an Azide Linker to Natural Products	577
3.2.3.2.1.3	Conjugation of the DNA Headpiece with the Linker-Labeled Natural Product via CuAAC	578
3.2.3.2.1.4	DNA Ligation To Afford Intact DNA-Coding Tags of <i>n</i> DELs	579
3.2.3.2.2	Summary and Outlook	579

4	Library Selection Procedures	
4.1	Selections by Affinity Capture on Solid Support A. Gloger and J. Scheuermann	
4.1	Selections by Affinity Capture on Solid Support	581
4.1.1	Solid Supports for Immobilization of (Protein) Targets	582
4.1.2	Affinity Tags and Protein Targets	583
4.1.3	Input of DELs for Affinity-Based Selections	585
4.1.4	Experimental Procedures	586
4.2	DEL Selection Using DNA-Programmed Affinity Labelling (DPAL) Y. Huang and X. Li	
4.2	DEL Selection Using DNA-Programmed Affinity Labelling (DPAL)	593
4.2.1	Experimental Procedures	594
4.2.2	Summary and Outlook	598
4.3	Selections of DNA-Encoded Libraries to Protein Targets on Living Cells B. Cai and C. J. Krusemark	
4.3	Selections of DNA-Encoded Libraries to Protein Targets on Living Cells	599
4.3.1	Experimental Procedures	600
4.3.2	Summary and Outlook	604
4.4	Selections of DNA-Encoded Libraries to Protein Targets within Living Cells B. Cai and C. J. Krusemark	
4.4	Selections of DNA-Encoded Libraries to Protein Targets within Living Cells	607
4.4.1	Experimental Procedures	608
4.4.2	Summary and Outlook	611

5	Evaluation/Cheminformatic Methods	
5.1	Informatic Tools, Processing, and Evaluation of DEL Selection Data W. Cui	
5.1	Informatic Tools, Processing, and Evaluation of DEL Selection Data	613
5.1.1	Clustering vs. Virtual Synthons	613
5.1.2	Understanding the Noise in DEL for Better Normalization	615
5.1.3	Data Visualization from Overall Performance to Nominated Hits	617
5.1.4	Summary and Outlook	618
5.2	On-DNA Resynthesis and Affinity Selection Mass Spectrometry (ASMS) W. Su, B. Xia, and T. L. Foley	
5.2	On-DNA Resynthesis and Affinity Selection Mass Spectrometry (ASMS)	621
5.2.1	Experimental Procedures	622
5.2.1.1	On-DNA ASMS	622
5.2.1.2	Cleaved ASMS	623
5.2.2	Summary and Outlook	626
	Author Index	629
	Abbreviations	655
