<b>1. Introduction</b>	
By Hartmut Zabel and Stuart A. Solin .....	1
References .....	4
<b>2. Electronic Band Structure of Graphite Intercalation Compounds</b>	
By Natalie A. W. Holzwarth (With 25 Figures) .....	7
2.1 Methods for Band Structure Calculations .....	7
2.2 Graphite .....	11
2.2.1 General Features .....	11
2.2.2 Electronic Band Structure .....	14
2.3 Electronic Band Structures	
of Low-Stage Graphite Intercalation Compounds.....	21
2.3.1 General Features .....	21
2.3.2 Lithium Graphite Intercalation Compounds.....	28
2.3.3 Alkali and Alkaline Earth-Metal Graphite	
Intercalation Compounds .....	33
2.3.4 Ternary Graphite Intercalation Compounds.....	38
2.4 Electronic Band Structure of High-Stage	
Graphite Intercalation Compounds .....	41
2.4.1 General Features .....	41
2.4.2 First-Principles Calculations .....	43
2.4.3 Parametrized Models .....	45
2.5 Summary and Conclusions.....	46
References .....	48
<b>3. Electron Spectroscopy of Graphite Intercalation Compounds</b>	
By Robert Schlögl (With 29 Figures) .....	53
3.1 Essential Concepts.....	54
3.1.1 Pure Graphite as a Host for Intercalation.....	54
3.1.2 The Charge Transfer Problem .....	59
3.1.3 Concepts of Charge Transfer .....	60
3.2 The Situation in the Literature .....	63
3.2.1 Charge Transfer in Theories of $KC_8$ .....	63
3.2.2 The Charge Transfer Problem in Spectroscopic Experiments .....	65
(a) Soft X-Ray Emission Spectroscopy (SXS) .....	65
(b) Photoelectron Spectroscopy.....	67

(c) Valence Band Spectroscopy .....	67
(d) Angle-Resolved UPS .....	69
(e) Core-Level Spectroscopy .....	69
3.3 Principal Results for the Electronic Structure .....	72
3.3.1 The Typical Photoelectron Spectrum .....	72
3.3.2 Fermi-Level Shift – UPS Results .....	76
3.3.3 Lineshape of Core-Level Spectra .....	83
3.3.4 Shifts in Core-Level Spectra of GICs .....	86
3.4 Photoemission from Acceptor GICs .....	89
3.4.1 Experimental Details .....	89
3.4.2 Surface Halogenation .....	91
3.4.3 Valence-Band Information .....	96
3.5 Summary and Conclusions .....	101
References .....	102
<b>4. Effects of Charge Transfer on the Optical Properties of Graphite Intercalation Compounds</b>	
By Peter C. Eklund and Gary L. Doll (With 40 Figures) .....	105
4.1 Experimental Considerations .....	106
4.1.1 Optical Measurement of Air-Sensitive Compounds .....	106
4.1.2 Optical Reflectance Spectroscopy .....	108
4.1.3 Raman Spectroscopy .....	109
4.2 Deducing Charge Transfer from Optical Studies .....	109
4.2.1 The Relationship Between the Optical Reflectance, Dielectric Function, and Electronic Band Structure of GICs .....	109
4.2.2 Electronic Band Structure Models .....	113
(a) The <i>K</i> -Point Tight-Binding Model of Blinowski and Rigaux .....	113
(b) LCAO Model of Holzwarth .....	114
(c) Tight-Binding Model of Saito and Kamimura .....	116
4.2.3 Charge Transfer and Graphitic Intralayer Phonon Frequencies .....	118
4.3 Experimental Results and Discussion .....	121
4.3.1 Donor-Type GICs .....	121
(a) Potassium GICs .....	121
(b) Potassium-Hydrogen GICs .....	128
(c) Potassium-NH <sub>3</sub> and Potassium-THF GICs .....	135
(d) Cesium-Bismuth and Potassium-Mercury GICs .....	140
4.3.2 Acceptor-Type GICs .....	144
(a) Sulfuric Acid GICs .....	145
(b) Metal-Chloride GICs .....	150
(c) Fluorine and Metal-Fluoride GICs .....	153
4.4 Summary and Conclusion .....	157
References .....	159

**5. Superconductivity of Graphite Intercalation Compounds**

By Sei-ichi Tanuma (With 25 Figures).....	163
5.1 Superconductivity of $C_8M$ ( $M = K, Rb, Cs$ ).....	163
5.2 Superconductivity of Binary Intercalants .....	172
5.2.1 Superconductivity of Potassium Hydride GICs, $C_{4n}KH$ .....	172
5.2.2 Superconductivity of GICs of Alkali-Metal Amalgams, $C_{4n}MHg$ ..	175
5.2.3 Superconductivity of Alkali-Metal Thallide and Bismuthide GICs ..	181
5.2.4 Pressure Dependence of the Anisotropy of Superconductivity.....	184
5.3 Theoretical Aspects of the Origin of Superconductivity in GICs .....	188
References .....	193

**6. Transport Properties of Metal Chloride Acceptor Graphite Intercalation Compounds**

By Jean-Paul Issi (With 19 Figures) .....	195
6.1 The In-Plane Electrical Resistivity .....	197
6.1.1 General Considerations .....	197
6.1.2 Ideal Electrical Resistivity .....	200
6.1.3 Residual Electrical Resistivity.....	204
6.1.4 Two-Dimensional Localization and Interaction Effects.....	206
6.1.5 Electrical Conductivity and Charge Transfer.....	211
6.2 The In-Plane Thermal Conductivity .....	212
6.2.1 Electronic Thermal Conductivity .....	214
6.2.2 Lattice Thermal Conductivity .....	216
6.2.3 Separation of the Electronic and Lattice Contributions.....	218
6.2.4 The Extra Contribution due to the Intercalate .....	219
6.3 The In-Plane Thermoelectric Power .....	220
6.3.1 Experimental Results .....	221
6.3.2 Mechanisms for Thermoelectric Power Generation in Solids.....	224
(a) Diffusion Thermoelectric Power.....	226
(b) Phonon-Drag Thermoelectric Power .....	227
6.3.3 Discussion of the GIC Results.....	228
6.4 $c$ Axis Transport and Anisotropy.....	231
6.4.1 $c$ Axis Electrical Resistivity .....	231
6.4.2 $c$ Axis Thermal Conductivity and Thermoelectric Power .....	232
6.4.3 Anisotropy and Dimensionality.....	234
6.5 Transport in Magnetic GICs.....	235
6.5.1 Electrical Resistivity.....	236
6.5.2 Thermal Conductivity .....	237
6.5.3 Thermoelectric Power .....	238
6.6 Concluding Remarks .....	240
References .....	242

**7. Magnetic Intercalation Compounds of Graphite**

By Gene Dresselhaus, James T. Nicholls  
and Mildred S. Dresselhaus (With 32 Figures) ..... 247

7.1 Background.....	247
7.1.1 Theoretical Considerations.....	250
7.1.2 Magnetism in Layered Compounds .....	251
(a) Comparison of Magnetic Superlattices.....	252
(b) Magnetic Intercalation into Various Hosts .....	256
7.1.3 Structure of Magnetic Graphite Intercalation Compounds .....	257
(a) Structure of Acceptor Compounds .....	257
(b) Structure of Donor Compounds .....	262
7.2 Origin of Magnetic Interactions.....	264
7.2.1 Magnetic Hamiltonians for Acceptor Compounds.....	264
(a) Magnetic Hamiltonian for $\text{NiCl}_2$ GICs.....	268
(b) Magnetic Hamiltonian for $\text{CoCl}_2$ GICs .....	270
(c) Magnetic Hamiltonian for $\text{MnCl}_2$ GICs.....	273
7.2.2 Magnetic Hamiltonian for Donor Compounds .....	274
7.2.3 The 2D-XY Model: Theoretical Considerations .....	277
7.3 Experimental Techniques for Studying GICs .....	282
7.3.1 Magnetic Susceptibility .....	283
7.3.2 Magnetization .....	286
7.3.3 Heat Capacity .....	288
7.3.4 Neutron Scattering .....	289
7.3.5 Electrical Resistivity and Magnetoresistance.....	291
7.3.6 Thermal Transport .....	293
7.3.7 Electron-Spin Resonance .....	294
7.3.8 Nuclear Magnetic Resonance .....	296
7.3.9 Mössbauer Spectroscopy.....	296
7.3.10 Other Techniques .....	297
7.4 Overview of Magnetic GICs.....	298
7.4.1 Overview of Acceptors .....	298
(a) $\text{NiCl}_2$ GICs .....	299
(b) $\text{CoCl}_2$ GICs.....	304
(c) $\text{MnCl}_2$ GICs .....	315
(d) $\text{FeCl}_3$ GICs .....	317
(e) $\text{FeCl}_2$ GICs .....	320
(f) $\text{CuCl}_2$ GICs .....	321
(g) $\text{CrCl}_3$ GICs .....	322
(h) $\text{MoCl}_5$ GICs .....	323
(i) Fluoride Compounds .....	325
(j) Bromide Compounds .....	326
(k) Bi-Intercalation Compounds.....	326
(l) Magnetic Alloys and Dilution Compounds.....	328

7.4.2 Overview of Donors .....	330
(a) The Magnetic Donor $C_6Eu$ .....	330
(b) Other Donors .....	337
7.5 Summary .....	337
References .....	338
<b>8. Intercalation of Graphite Fibers</b>	
By Mildred S. Dresselhaus and Morinobu Endo (With 45 Figures).....	347
8.1 Precursor Graphite Fibers.....	348
8.2 Intercalation.....	355
8.3 Structure and Staging .....	362
8.4 Raman Characterization .....	367
8.5 Transport Properties .....	371
8.5.1 Electrical Conductivity .....	372
8.5.2 Stability Issues.....	379
8.5.3 Magnetoresistance.....	381
8.5.4 Weak Localization Effects.....	385
8.5.5 Thermal Transport Properties .....	389
8.5.6 Thermopower .....	391
8.6 Mechanical Properties .....	394
8.7 Thermal Expansion.....	399
8.8 Applications of Intercalated Carbon Fibers.....	400
8.9. Summary and Conclusions .....	406
References .....	407
