

CONTENTS

Short Presentations

A New Beta-Point Algorithm for Large Time-Invariant and Time-Variant Reliability Problems 1
T. Abdo, R. Rackwitz

Rigid-Ideal Plastic System Reliability 13
Torben Arnbjerg-Nielsen, Ove Ditlevsen

Optimal Allocation of Available Resources to Improve the Reliability of Building Systems . 23
Giuliano Augusti, Antonio Borri, Emanuela Speranzini

Life Expectancy Assessment of Structural Systems 33
Bilal M. Ayyub, Gregory J. White, Thomas F. Bell-Wright

Parameter Sensitivity of Failure Probabilities 43
Karl Breitung

Expectation Ratio Versus Probability 53
F. Vasco Costa

Application of Probabilistic Structural Modelling to Elastoplastic and Transient Analysis . 63
T. A. Cruse, H. R. Millwater, S. V. Harren, J. B. Dias

Reliability-Based Shape Optimization Using Stochastic Finite Element Methods 75
Ib Enevoldsen, J. D. Sørensen, G. Sigurdsson

Calibration of Seismic Reliability Models 89
Luis Esteve

Computational Experience with Vector Optimization Techniques for Structural Systems . . 99
Dan M. Frangopol, Marek Klisinski

Management of Structural System Reliability 113
Gongkang Fu, Liu Yingwei, Fred Moses

Reliability Analysis of Existing Structures for Earthquake Loads 129
Hitoshi Furuta, Masata Sugito, Shin-ya Yamamoto, Naruhito Shiraishi

Sensitivity Analysis of Structures by Virtual Distortion Method 139
J. T. Gierlinski, J. Holnicki-Szulc, J. D. Sørensen

Reliability of Daniels Systems with Local Load Sharing Subject to Random Time Dependent Inputs 147
Mircea Grigoriu

Reliability Analysis of Elasto-Plastic Dynamic Problems 161
Toshiaki Hisada, Hirohisa Noguchi, Osamu Murayama, Armen Der Kiureghian

Identification of Autoregressive Process Model by the Extended Kalman Filter 173
Masaru Hoshiya, Osamu Maruyama

The Effect of a Non-Linear Wave Force Model on the Reliability of a Jack-Up Platform . . .	185
<i>J. Juncher Jensen, Henrik O. Madsen, P. Terndrup Pedersen</i>	
Optimum Cable Tension Adjustment Using Fuzzy Regression Analysis	197
<i>Masakatsu Kaneyoshi, Hiroshi Tanaka, Masahiro Kamei, Hitoshi Furuta</i>	
Bayesian Analysis of Model Uncertainty in Structural Reliability	211
<i>Armen Der Kiureghian</i>	
Size Effect of Random Field Elements on Finite-Element Reliability Methods	223
<i>Pei-Ling Liu</i>	
Reliability-Based Optimization Using SFEM	241
<i>Sankaran Mahadevan, Achintya Haldar</i>	
Classification and Analysis of Uncertainty in Structural Systems	251
<i>William Manners</i>	
Directional Simulation for Time-Dependent Reliability Problems	261
<i>Robert E. Melchers</i>	
Some Studies on Automatic Generation of Structural Failure Modes	273
<i>Yoshisada Murotsu, Shaowen Shao, Ser Tong Quek</i>	
Sensitivity Analysis for Composite Steel Girder Bridges	287
<i>Andrzej S. Nowak, Sami W. Tabsh</i>	
Long-Term Reliability of a Jackup-Platform Foundation	303
<i>Knut O. Ronold</i>	
Constant Versus Time Dependent Seismic Design Coefficients	315
<i>Emilio Rosenblueth, José Manuel Jara</i>	
Reliability of Structural Systems with Regard to Permanent Displacements	329
<i>J. D. Sørensen, P. Thoft-Christensen</i>	
Reliability of Current Steel Building Designs for Seismic Loads	339
<i>Y. K. Wen, D. A. Foutch, D. Eliopoulos, C.-Y. Yu</i>	
Jackup Structures: Nonlinear Forces and Dynamic Response	349
<i>Steven R. Winterstein, Robert Løseth</i>	
Stochastic Programs for Identifying Significant Collapse Modes in Structural Systems . . .	359
<i>James J. Zimmermann, Ross B. Corotis, J. Hugh Ellis</i>	
Lectures	
Critical Configurations of Systems Subjected to Wide-Band Excitation	369
<i>Takeru Igusa</i>	
On Reliability-Based Optimal Design of Structures	387
<i>P. Thoft-Christensen</i>	
Index of authors	403
Subject index	405
