F.J. Brandenburg Nice drawings of graphs are computationally hard	1
A. Mahling, J. Herczeg, M. Herczeg and H.-D. Böcker Beyond visualization: Knowing and understanding	16
Th. Fehrle, Th. Strothotte and M. Szardenings Generating pictorial presentations for advice-giving dialog systems	27
W.-F. Riekert What does knowledge look like: Presenting knowledge structures in a ZOO of objects	37
C. Möbus and O. Schröder Representing semantic knowledge with 2-dimensional rules in the domain of functional programming	47
J. Polak and S.P. Guest A graphical representation of the Prolog programmers's knowledge	82
M. Schneider FAST - a stepper in an object-oriented programming environment	105
M. Schneider-Hufschmidt Integrating visual aids into an object-oriented programming environment	123
A. Anghern, M. Arnoldi, H.-J. Lüthi and D. Ackermann A context-oriented approach for decision support	137
A.M. Pejtersen and L.P. Goodstein Beyond the desk top metaphor: Information retrieval with an icon-based interface	149
K. Kunkel and Th. Strothotte Visualization and direct manipulation in user interfaces: Are we overdoing it ?	183

G.C. van der Veer and R. Wijk Teaching a spreadsheet application - Visual-spatial metaphors in relation to spatial ability, and the effect on mental models	194
J. Preece Some HCI issues concerned with displaying quantitative information graphically	209
R. Gimnich Implementing direct manipulation query languages using an adequate data model	227
M.D. Harrison and A.J. Dix Modelling the relationship between state and display in interactive systems	241
A. Viereck A software engineering environment for developing human-computer interfaces	250
M. Lansky Intrinsic geometry in LOGO - Distance of linear segments	264
