

## CONTENTS

|                                                                             |     |
|-----------------------------------------------------------------------------|-----|
| <b>M. Forger</b>                                                            |     |
| Supersymmetric Sigma Models and Kähler Manifolds .....                      | 1   |
| <b>J. Wess</b>                                                              |     |
| Nonlinear Realizations, Kähler Manifolds and<br>the Virasoro Manifold ..... | 47  |
| <b>M. Batchelor</b>                                                         |     |
| In Search of the Graded Manifold of Maps Between<br>Graded Manifolds .....  | 62  |
| <b>A. Rogers</b>                                                            |     |
| Path Integration in Superspace .....                                        | 114 |
| <b>P. Bryant</b>                                                            |     |
| Supermanifolds, Supersymmetry and Berezin Integration .....                 | 150 |
| <b>P.D. Jarvis</b>                                                          |     |
| Berezin Integration and Dimensional Reduction .....                         | 168 |
| <b>D.G. Caldi</b>                                                           |     |
| Aspects of String Theory .....                                              | 175 |
| <b>N. Sanchez</b>                                                           |     |
| Field and String Quantization in Curved Space-Times .....                   | 217 |
| <b>List of Participants</b> .....                                           | 249 |
