

# Table of Contents

<b>Symbols and Abbreviations</b> . . . . .	<b>XIII</b>
<b>1 Introduction</b> . . . . .	<b>1</b>
1.1 About the Aims and Methods of Cross Fractionation . . . . .	1
1.2 Classical Cross-Fractionation . . . . .	7
1.3 Cross Fractionation Including Size Exclusion Chromatography . . . . .	10
1.3.1 SEC Analysis of Fractions Obtained by Precipitation or Extraction . . . . .	10
1.3.2 Preparative Thin-Layer Chromatography and SEC Analysis of the Fractions . . . . .	10
1.3.3 Preparative SEC and TLC Analysis of the Fractions . . . . .	10
1.4 Cross Fractionation by Coupled SEC Techniques . . . . .	11
1.5 Elution Under Critical Conditions . . . . .	12
1.6 References . . . . .	13
<b>2 Chemical Heterogeneity of Copolymers</b> . . . . .	<b>14</b>
2.1 Sequence Distribution . . . . .	15
2.2 Instantaneous Heterogeneity . . . . .	17
2.3 Modification of the Stockmayer Distribution . . . . .	19
2.3.1 Generalization of the Marginal Composition Distribution . . . . .	19
2.3.2 Generalization of Stockmayer's Distribution for Copolymers from Monomers of Different Molecular Weight . . . . .	20
2.4 Conversion Heterogeneity . . . . .	21
2.4.1 Integration of the Mayo-Lewis Equation . . . . .	21
2.4.2 Distribution of Chemical Composition due to Conversion . . . . .	22
2.4.3 Concluding Remarks . . . . .	23
2.5 References . . . . .	24

<b>3</b>	<b>Size Exclusion Liquid Chromatography of Copolymers. . . . .</b>	<b>25</b>
3.1	Universal Calibration . . . . .	25
3.2	Secondary Exclusion and Adsorption Effects . . . . .	32
3.3	Detector Response. . . . .	34
3.4	Fractionation by Hydrodynamic Volume . . . . .	35
3.4.1	Intrinsic Viscosity Varying Linearly with Copolymer Composition . . . . .	35
3.4.2	Nonlinear Composition Dependence of Intrinsic Viscosity without Extreme Values . . . . .	38
3.4.3	Nonlinear Composition Dependence with Extreme Values . . . . .	38
3.4.4	Concluding Remarks . . . . .	39
3.5	References. . . . .	42
 <b>4</b>	 <b>Special Features of Polymer HPLC. . . . .</b>	 <b>45</b>
4.1	Diffusion Coefficients of Macromolecules in Solution . . . . .	45
4.2	Stokes Radii and Hydrodynamic Dimensions of Macromolecules. . . . .	46
4.3	Retention by Multiple Attachment . . . . .	49
4.4	Conformation of Synthetic Polymers . . . . .	50
4.5	Solubility of Polymers. . . . .	51
4.6	Gradient Elution of Polymers . . . . .	52
4.7	Gradient Elution of Polymers on Small Pore Packings . . . . .	53
4.8	The Martin Equation . . . . .	53
4.9	Effect of Block Structure on Retention. . . . .	54
4.10	References. . . . .	55
 <b>5</b>	 <b>Solubility and Adsorption Effects in Polymer HPLC . . . . .</b>	 <b>56</b>
5.1	Dependence of Retention Time on Sample Size. . . . .	56
5.2	Comparison Between Solubility and Elution Characteristics . . . . .	58
5.2.1	Retention According to Molecular Weight . . . . .	60
5.2.2	Retention According to Copolymer Composition . . . . .	62
5.3	Correspondence Between Column Polarity and Gradient Orientation . . . . .	63
5.4	Effect of Temperature . . . . .	65

5.5	High-Performance Precipitation Liquid Chromatography . . .	67
5.6	Normal-Phase Gradient Elution with Separate Adjustment of Polarity and Solvent Strength . . . . .	68
5.7	References. . . . .	74
<b>6</b>	<b>Effect of Mobile and Stationary Phase in Polymer HPLC. . . .</b>	<b>75</b>
6.1	Elution in the Critical Region . . . . .	75
6.2	The Role of the Stationary Phase. . . . .	77
6.3	Normal and Reversed Phase HPLC of Polymers. . . . .	83
6.4	References. . . . .	86
<b>7</b>	<b>Detection in Gradient High-Performance Liquid Chromatography . . . . .</b>	<b>87</b>
7.1	Selective Detectors. . . . .	87
7.1.1	UV/Visible Photometers and Spectrophotometers . . . . .	87
7.1.2	Infrared Photometers . . . . .	88
7.1.3	Amperometric Detectors . . . . .	88
7.1.4	Reaction Detectors . . . . .	88
7.2	Detection Subsequent to Eluent Vaporization . . . . .	89
7.2.1	Transport Detectors. . . . .	89
7.2.2	Evaporative Light-Scattering Detectors . . . . .	90
7.3	References. . . . .	97
<b>8</b>	<b>Quantitative Evaluation and Calibration . . . . .</b>	<b>99</b>
8.1	Features of a Proper Run in Polymer HPLC . . . . .	99
8.2	Quantitative Evaluation . . . . .	99
8.3	Incomplete Retention and Elution . . . . .	101
8.4	Signal Enhancement by Turbidity. . . . .	103
8.5	Calibration of Polymer Gradient HPLC. . . . .	105
8.5.1	Influence of Copolymer Composition and Molecular Weight on Elution Time . . . . .	106
8.5.2	A General Remark. . . . .	108
8.5.3	Influence of Copolymer Composition on Detector Response . .	109
8.6	References. . . . .	112

<b>9</b>	<b>Separation of Copolymers by Composition through Gradient High-Performance Liquid Chromatography . . . . .</b>	<b>113</b>
9.1	Statistical Copolymers from Styrene and Acrylonitrile. . . . .	113
9.2	Statistical Copolymers from Styrene and Methyl Acrylate . . .	114
9.3	Copolymers from Styrene and Methyl Methacrylate. . . . .	116
9.3.1	Statistical Copolymers . . . . .	116
9.3.2	Block Copolymers. . . . .	121
9.4	Statistical Copolymers from Styrene and Ethyl Acrylate . . . .	121
9.5	Statistical Copolymers from Styrene and Ethyl Methacrylate .	121
9.6	Copolymers from Styrene and <i>t</i> -Butyl Methacrylate . . . . .	123
9.6.1	Statistical Copolymers . . . . .	123
9.6.2	Block Copolymers. . . . .	125
9.7	Alkyl Methacrylates and Acrylates with Different Side Groups. . . . .	128
9.8	Copolymers from Methyl Methacrylate and Methyl Acrylate .	130
9.9	Copolymers from Styrene and 2-Methoxyethyl Methacrylate. .	132
9.10	Copolymers of Styrene and Butadiene . . . . .	134
9.11	Copolymers of Decyl Methacrylate and Methyl Methacrylate .	135
9.11.1	Statistical Copolymers . . . . .	135
9.11.2	Block Copolymers. . . . .	136
9.12	Graft Copolymers of Methyl Methacrylate onto Copoly (Ethylene/Propylene/Diene Monomer) (EPDM) . . . .	138
9.13	Epoxy Composite Formulations, Phenol-Formaldehyde Prepolymers, Macromonomers, and Telechelic Prepolymers . .	140
9.14	Ethylene/ $\alpha$ -Olefin Copolymers. . . . .	143
9.15	Copolymers of Styrene and Acrylic Acid. . . . .	145
9.16	Separation of PMMA Isomers. . . . .	145
9.17	References. . . . .	145
<b>10</b>	<b>Chromatographic Cross-Fractionation. . . . .</b>	<b>148</b>
10.1	Scope of this Chapter . . . . .	148
10.2	Comparison of Calculated and Measured Curves of Chemical Composition Distribution. . . . .	149
10.3	Chromatographic Cross-Fractionation of Model Mixtures . . .	151
10.3.1	Model Mixtures of <i>stat</i> -Copoly(Styrene/Acrylonitrile) . . . . .	152

10.3.2	Model Mixtures of <i>stat</i> -Copoly(Styrene/2-Methoxyethyl Methacrylate) Samples. . . . .	153
10.4	Chromatographic Cross-Fractionation of Real Copolymers . . . . .	153
10.4.1	Investigation of <i>stat</i> -Copoly(Styrene/Acrylonitrile) . . . . .	153
10.4.1.1	Calibration . . . . .	153
10.4.1.2	Investigation of a Commercial S/AN Sample . . . . .	154
10.4.1.3	Reliability . . . . .	155
10.4.2	Chromatographic Cross-Fractionation of a <i>stat</i> -Copoly(Styrene/Methyl Methacrylate) Sample in two Independent Ways . . . . .	156
10.4.2.1	Calibration . . . . .	157
10.4.2.2	CCF of S/MMA through Gradient HPLC Prefractionation and SEC . . . . .	157
10.4.2.3	CCF by SEC Prefractionation and Subsequent Gradient HPLC . . . . .	159
10.4.3	Investigation of <i>stat</i> -Copoly(Styrene/2-Methoxyethyl Methacrylate) Samples of Different Degree of Conversion . . . . .	160
10.4.3.1	Calibration . . . . .	160
10.4.3.2	Chromatographic Cross-Fractionation of S/MEMA Copolymers J and K . . . . .	163
10.4.3.3	Reliability of S/MEMA Cross Fractionation . . . . .	166
10.5	Cross Fractionation by Temperature-Rising Elution Fractionation and SEC Analysis of the Fractions . . . . .	168
10.6	Chromatographic Cross-Fractionation of Graft Copolymers of Methyl Methacrylate onto Copoly(Ethylene/Propylene/Diene Monomer) (EPDM Rubber) . . . . .	172
10.7	Chromatographic Cross-Fractionation of Styrene/Vinyl Acetate Block Copolymers . . . . .	173
10.8	References. . . . .	173
<b>11</b>	<b>Experimental Problems . . . . .</b>	<b>175</b>
11.1	THF as a Mobile Phase . . . . .	175
11.2	Sample Solvent. . . . .	176
11.3	Ghost Peaks . . . . .	177
11.4	Sample Load and Column Blocking. . . . .	177
11.5	Hazards Caused by Incompatible Sample Polymers . . . . .	178
11.6	Column Flushing . . . . .	179
11.7	Effect of Column Length . . . . .	180
11.8	Peak Splitting . . . . .	180

11.9	Column Conditioning by Sample Injection . . . . .	180
11.10	Guidelines for Selecting Suitable Phase Systems for Copolymer HPLC. . . . .	181
11.11	References. . . . .	182
12	Glossary of Terms . . . . .	183
Author Index . . . . .		197
Subject Index . . . . .		203
