

TABLE OF CONTENTS

Chapter 1	Introduction	1
Chapter 2	Towards Image Processing - Development of a Strategy for a Radiology Department	3
	H. Dombrowski, E. List	
	1 Motivation	3
	2 Implementation Strategy	4
	3 Medical Research	4
Chapter 3	Developments and Current Trends in RIS and PACS	7
	C.F.C. Greinacher, M. Ihringer, W. Offenmüller	
Chapter 4	Interfaces between Systems - An Important Step in System Design	13
	K. Retter	
	1 Introduction	13
	2 Interfacing versus Integrating	14
	3 Importance of Interfaces	16
	4 Quality of Interfaces	17
	5 Types of Interfaces, Reference Models	17
Chapter 5	Standardizing Interfaces in Radiology - The ACR-NEMA Standard	19
	F.W. Prior	
	1 The ACR-NEMA Standard	19
	2 The Standard Product Interconnect (SPI)	20
	3 Applicability of ACR-NEMA to the RIS-PACS Interface	21

Chapter 6	The Marburg Model	25
	A.J. Herbst, K. Retter	
1	Introduction	25
2	Other Approaches to RIS-PACS Interface Specification	27
3	Description of the Model	28
4	Methodology to Construct the Model	29
5	Tools for Model Construction	32
6	Methodology to Derive the Interface	33
7	Experiences in Using the Methodology	35
8	Limitations of and Future Developments in the Methodology	35
 Chapter 7	 A Detailed RIS-PACS Interface Specification - Based on the Marburg Model	 39
	C.F.C. Greinacher, A.J. Herbst, M. Ihringer, E. List, W. Offenmüller, F.W. Prior, K. Retter, O. Rienhoff	
1	The Model	39
	The Functional View (View One)	39
	The Control View (View Two)	58
	The Data View (View Three)	64
	Linking the Views	73
	Discussion	73
2	The Interface	74
	Assumptions	74
	Function and Action Ownership	75
	Control Points	81
	Interface Specification	81
	Discussion	88
 Chapter 8	 Future Perspectives and Research Needs	 89
	O. Rienhoff
