

Table of Contents

Motivation	17
1 State of the Art	21
1.1 Fundamentals of Adsorption	21
1.2 Adsorption in Porous Solids	23
1.2.1 Classification of Porosity and Porous Materials	23
1.2.2 Historical Development of Porous Materials	25
1.2.3 Metal-Organic Frameworks	25
1.2.4 Adsorption and Desorption Isotherms	29
1.2.5 Adsorption Potential and Pore-Size Distribution of Porous Materials	32
1.2.6 Specific Surface Area and Pore Volume	33
1.2.7 Hysteresis and Capillary Condensation	35
1.2.8 Release of Gas from Porous Materials	36
1.3 Structural Transitions in Porous Solids	38
1.3.1 Adsorption Induced Deformation of Porous Solids	38
1.3.2 Pressure-Induced Deformation of Porous Solids	40
1.3.3 Temperature-Induced Deformation of Porous Solids	42
1.4 Stimuli-Responsive Soft porous Crystals	43
1.5 Physisorption Isotherms of Flexible Adsorbents	45
1.6 Negative Adsorption Gradient	48
1.7 Application of Flexible Metal-Organic Frameworks	50
2 Methods	53
2.1 Gas Adsorption Experiments	53
2.2 Determination of Adsorption Enthalpy	56
2.3 Structural Analysis by Crystallographic Methods	58
2.4 Structural Analysis by Spectroscopic Methods	60
2.5 <i>In situ</i> Experiments upon Gas Loading and Variable Temperature	60
2.6 Computational Methods	62
3 Results and Discussion	63
3.1 Negative Gas Adsorption in DUT-49	63
3.1.1 Discovery and Rationalisation of Negative Gas Adsorption in DUT-49	63
3.1.2 Definition of Negative Gas Adsorption	77
3.1.3 Analysis of Negative Gas Adsorption by In Situ ¹²⁹ Xe NMR spectroscopy	78
3.1.4 Computational analysis on structural contraction in DUT-49	83
3.2 Manipulation of Negative Gas Adsorption in DUT-49	88
3.2.1 Activation- and Crystal Size-Dependence of Negative Gas Adsorption	88

3.2.2	Introduction and Effect of Structural Defects in DUT-49	97
3.2.3	Analysis of Nitrogen Adsorption at Different Temperature and Crystal Size Distributions.....	113
3.2.4	The Impact of Adsorption Temperature on NGA	126
3.2.5	Variation of Adsorptive	139
3.2.6	Collective Analysis of Temperature- and Guest-depending NGA in DUT-49..	154
3.2.7	Collective Analysis of NGA-Influencing Parameters.....	157
3.3	Rational Design of Materials with Negative Gas Adsorption Transitions.....	161
3.3.1	Which Structural Transitions Lead to Negative Gas Adsorption?.....	161
3.3.2	How to Design Novel Materials with Enhanced Negative Gas Adsorption Transitions?	166
3.4	Variation of Ligand Length and Pore Size Distribution	170
3.4.1	Modelling of Ligands/Frameworks and Computational Analysis	170
3.4.2	Synthesis and Characterization of Ligands and Metal-Organic Frameworks.....	176
3.4.3	Analysis of Mechanical Properties by Mercury Intrusion	183
3.4.4	Analysis of Adsorption Behavior.....	188
3.4.5	Analysis of Adsorption Energetics	194
3.4.6	Analysis of Structural Transitions in DUT-50 and DUT-151int	200
3.5	Investigations on the Adsorption Mechanism of Methane	211
3.6	Interpenetrated DUT-151-Analogue	220
3.7	Variation of Ligand Stiffness.....	224
3.7.1	Computational Analysis of DUT-49-Analogues with Different Ligand Stiffness 224	
3.7.2	Synthesis and Analysis of Organic Ligands and Metal-Organic Frameworks ..	225
3.7.3	Analysis of Mechanical Properties	228
3.7.4	Analysis of Adsorption Behavior.....	229
3.7.5	Analysis of Adsorption Energetics	235
3.7.6	Structural Analysis of the Influence of Ligand Stiffness on NGA in DUT-49- Analogue MOFs.....	238
3.8	Softening of the Ligand Backbone in DUT-49-Analogues	243
3.9	Acetylene-Derived Ligands for Improved Buckling and NGA	249
3.9.1	Synthesis of Acetylene-Derived Ligands and MOF	250
3.9.2	Analysis of Adsorption Behavior of DUT-160.....	253
3.9.3	Analysis of Structural Transitions in DUT-160.....	258
3.10	Heterocycle-Derived Ligands for Improved Buckling and NGA.....	261
3.10.1	Synthesis and Characterization of Thiophene-Derived Ligands and MOFs.....	263
3.10.2	Analysis of Adsorption Behavior of Thiophene-Derived MOFs.....	267
3.10.3	Analysis of Structural Transitions in DUT-171 and DUT-173	272
3.10.4	Pyrimidine-Based Ligands.....	274
3.11	Multivariant Metal-Organic Frameworks for Negative Gas Adsorption.....	275
4	Summary and Outlook	281

4.1	Global Comparison and Trends of NGA in DUT-49-Analogue MOFs	281
4.2	Application of Negative Gas Adsorption.....	292
4.3	How to Discover Novel NGA Materials.....	301
5	Experimental Section.....	305
5.1	Instruments and Characterization Techniques	305
5.1.1	Gas Adsorption Experiments	305
5.1.2	Single Crystal X-Ray Diffraction	306
5.1.3	X-Ray Diffraction	306
5.1.4	In situ Powder X-Ray Diffraction.....	307
5.1.5	In situ Neutron Powder Diffraction	307
5.1.6	In situ Calorimetry in Parallel to Adsorption of n-Butane.....	308
5.1.7	NMR Spectroscopy.....	310
5.1.8	Mass Spectrometry.....	311
5.1.9	Diffuse Reflectance Infrared Fourier Transform Spectroscopy.....	311
5.1.10	UV/Vis Spectroscopy.....	312
5.1.11	Thermogravimetric Analysis	312
5.1.12	Elemental Analysis	312
5.1.13	Mercury Intrusion	312
5.1.14	Scanning Electron Microscopy.....	313
5.1.15	Structural Modelling	313
5.1.16	Simulation of Pore Size Distribution and Textural Properties.....	314
5.1.17	Computational Analysis of Ligands, MOFs and Adsorption Isotherms.....	315
5.2	List of Chemicals and Gases.....	316
5.3	Synthesis and Characterization of Organic Ligands.....	318
5.3.1	Synthesis of ¹³ C-labelled H ₄ bdc.....	318
5.3.2	Synthesis of 9H-Carbazole Building Blocks	319
5.3.3	General Synthesis Procedure for Coupling Reactions	321
5.3.4	Variation of Ligand Length	323
5.3.5	Variation of Functional groups in Ligand Backbone.....	329
5.3.6	Aliphatic Analogues of H ₄ (L ₂).....	334
5.3.7	Thiophene-Derived Linker.....	335
5.3.8	Pyrimidine-Derived Building Block (47)	339
5.4	Synthesis and Characterization of Metal-Organic Framework.....	340
5.4.1	Synthesis of Single Crystals.....	340
5.4.2	Supercritical Activation of MOF Powders	340
5.4.3	Synthesis of DUT-49 with Variation in Mean Crystal Size	341
5.4.4	Synthesis of DUT-49 with Tailored Defects	361
5.4.5	Synthesis of Mixed-Ligand DUT-49	363
5.4.6	Synthesis of DUT-49 and Analogous MOF Materials	364
5.4.7	In situ EXAFS Analysis of DUT-49 in Parallel to Gas Adsorption	377

5.4.8	In situ PXRD Analysis of MOF powders in Parallel to Gas Adsorption.....	380
5.4.9	In situ Neutron Powder Diffraction in Parallel to Methane Adsorption	430
5.4.10	In situ DRIFT Spectroscopy	450
5.4.11	In situ UV/Vis Spectroscopy	460
5.5	Crystallographic Data	462
5.5.1	Single Crystal Diffraction	462
5.5.2	Rietveld Refinement	468
5.5.3	Summary of Computational Models and Experimental Structures	475
6	References	477
7	Appendix	491
	List of Abbreviations.....	491
	List of Symbols	493
