1	General introduction	1
1.1	Starter cultures and probiotics.....	1
1.2	Drying processes for the preservation of lactic acid bacteria	3
1.3	Microwave drying techniques	5
1.4	Microwave foam drying	12
1.5	Inactivation mechanism of microorganisms during drying and storage	16
1.6	Protection mechanisms during drying and storage	20
1.7	Protectants for enhancing drying and storage stability of bacterial cultures.....	24
2	Objective and outline	27
3	Results	29
3.1	Microwave vacuum drying of lactic acid bacteria: Influence of process parameters on survival and acidification activity	29
3.2	Temperature-controlled microwave-vacuum drying of lactic acid bacteria: Impact of drying conditions on process and product characteristics.....	47
3.3	Microwave freeze drying of lactic acid bacteria: Influence of process parameters on drying behavior and viability.....	63
3.4	Impact of protectants on drying kinetics and viability of microwave freeze-dried <i>Lactobacillus paracasei</i> ssp. <i>paracasei</i> F19	83
3.5	Protective effect of sugars on storage stability of microwave freeze-dried and freeze-dried <i>Lactobacillus paracasei</i> F19	103
3.6	Structural basis of the impact of microwave application on survival and shelf life of <i>Lactobacillus paracasei</i>	117
3.7	Structure-function-process relationship for microwave vacuum drying of lactic acid bacteria in aerated matrices.....	133
3.8	Structure-function-process relationship for microwave vacuum drying of lactic acid bacterid in aerated matrices.....	157
4	Overall discussion	177
4.1	Microwave vacuum drying	177
4.2	Microwave freeze drying.....	179
4.3	Microwave foam drying	189
5	Overall conclusion and perspectives	193
6	Summary / Zusammenfassung.....	195
