1	Introduction	1
1.1	Notations, Definitions and Prerequisites	3
2	Fiber-Optic Systems: Components, Topologies and Impairments	5
2.1	Fiber as a Transmission Medium	6
2.1.1	Linear Fiber Impairments	7
2.1.2	Nonlinear Fiber Impairments	10
2.2	Elementary Blocks of a Digital Fiber-Optic Communication System .	12
2.2.1	Digital/Analog Conversion	12
2.2.2	Electrical/Optical Conversion	14
2.2.3	Optical Amplifier	18
2.2.4	Optical Filters	19
2.2.5	Optical/Electrical Conversion	20
2.2.6	Analog/Digital Conversion	20
2.3	Transmission Topologies	21
2.3.1	Transmission Link	21
2.3.2	Transmission with Coherent Detection	23
2.3.3	Transmission with Direct Detection	29
2.4	Summary	36
3	Figures of Merit and Signal Flow	39
3.1	Signal to Noise Ratio	39
3.2	Optical Signal to Noise Ratio	40
3.2.1	Relation to System Structure and Properties	41
3.3	Optical Carrier to Signal Power Ratio	42
3.3.1	Carrier Transmission Power Penalty	42
3.3.2	Relation Between OCSR and SSBI	43

3.4	Bit Error Ratio	44
3.4.1	Relation Between BER and SNR	45
3.5	Error Vector Magnitude	46
3.6	Required SNR/OSNR	47
3.7	Signal Flow Through a Fiber-Optic System	48
3.7.1	Signal Flow for Coherent Detection	50
3.7.2	Signal Flow for Direct Detection	53
3.8	Reference Curves for System Performance	55
3.9	Summary	57
4	Compensation Within a Fiber-Optic Communication System	59
4.1	Transmitter-Side, Receiver-Side, and In-Line Compensation	60
4.1.1	In-Line Compensation	61
4.2	Advantages-Disadvantages Analysis	62
4.3	Typical DSP Structure	64
5	Post-Compensation Techniques	67
5.1	First-Stage Equalization: Electronic Dispersion Compensation	68
5.2	First-Stage Equalization: Digital Back-Propagation	69
5.2.1	DBP Theoretical Background	71
5.2.2	Future Link Design with DBP	73
5.2.3	DBP Performance for Imperfect Link Knowledge	78
5.3	Second-Stage Equalization	85
5.3.1	Properties of a Channel with Linear ISI and AWGN	87
5.3.2	Feed-Forward Equalization	88
5.3.3	Decision-Feedback Equalization	97
5.3.4	Noise Analysis	101
5.3.5	Error-Propagation Effect	104
5.4	Volterra as a Second-Stage Equalizer	121
5.4.1	Volterra Theory	121
5.4.2	Realization of a Time-Domain Volterra Equalizer	124
5.5	Summary	126
6	Enhanced Detection Techniques	127
6.1	Conventional Symbol Detection	127

6.2	Shape Properties of Received Signal Constellations	129
6.3	Clustering-Based Detection	132
6.3.1	K-Means Algorithm	134
6.3.2	Expectation Maximization	137
6.3.3	Comparison of the Algorithms	140
6.4	CBD vs. Digital Compensation: Case Study	142
6.4.1	Simulation Setup	143
6.4.2	Results Without Complexity Restrictions	144
6.4.3	Computational Complexity Comparison	146
6.4.4	Results With Comparable Complexity	150
6.5	Summary	152
7	Pre-Compensation with Emphasis on Tomlinson-Harashima Precoding	153
7.1	THP Principles	156
7.1.1	What is THP?	156
7.1.2	Properties of the Transmitted and the Received Sequence . . .	159
7.1.3	Implications of THP in a Fiber-Optic Communication System	163
7.1.4	Implementation Requirements	166
7.2	THP Performance for Transmission with Coherent Detection	168
7.2.1	System Setup	168
7.2.2	Signal Visualization for 100 km Nonlinear Transmission . . .	170
7.2.3	Monte-Carlo Simulations for 500 km Nonlinear Transmission	172
7.3	THP Performance for Transmission with Direct Detection	177
7.3.1	OCSR Optimization in a Power-Fading Scenario	178
7.3.2	Experimental Setup	180
7.3.3	Generation of Optimization Maps for the MZM Setting	183
7.3.4	Analyzing the Equalizer Coefficients	184
7.3.5	Experimental Results for Single-Carrier Transmission	186
7.3.6	Experimental Results for WDM Transmission	190
7.3.7	Visualization of the Error-Propagation Effect	192
7.4	Summary	194
8	Conclusions and Outlook	195

A	Properties of a Limited Linear MZM	199
A.1	Calculation of the OCSR in a Scenario with Direct Detection	199
B	Power Ratio Between the Data-Carrying Signal and the SSBI	203
C	Properties of the ASE Noise after Coherent Detection	205
D	Signal Analysis After Direct Detection	209
E	All-Pole Filter Zero-Forcing Linear Equalization	211
F	Instability of the All-Pole Filter Equalizer	213
	Symbols	215
	Acronyms	222
	Bibliography	227
	Publications By the Author	247
	List of LNT Publications	251
