1	LNG and Its Thermodynamics	1
1.1	LNG	1
1.1.1	What Is LNG?	1
1.1.2	Biogas: Bio-LNG	3
1.1.3	Origin of Natural Gas	5
1.2	Importance of LNG	5
1.3	Pipeline Gas and Its Significance	9
	References	11
2	The Most Important Thermodynamic Processes in the Production, Transport and Storage of LNG	13
2.1	Adiabatic Cooling	13
2.2	Mixed Condensation	17
2.3	Relaxation Energy, The Joule-Thomson Effect	19
2.4	Compression Energy	21
2.5	The Critical Point	22
2.6	Thermodynamic Equilibrium	23
2.7	The Isobar Below the Critical Point	25
2.8	Liquefaction of LNG	26
	References	28
3	LNG: From the Source to the End Customer	31
3.1	Liquefaction at Source and Transport to Hub	31
3.2	LNG Transport to the End Customer	36
3.2.1	The LNG Road Tanker	37
3.3	LNG Fuelling at the End Customer's Premises	40
3.4	Closed and Open Hose System	41
3.4.1	The Open Hose System	42
3.4.2	The Closed Hose System	43
3.5	Refuelling from Above	45
3.6	Refuelling from Below	47

3.7	Refuelling While Maintaining Process Pressure.	48
	References.	49
4	Operational Management	51
4.1	Continuous Management	51
4.2	Discontinuous Operation Management.	52
5	LNG Applications	55
5.1	LNG Supply Facilities	58
5.1.1	Operating Principle Module 1	59
5.1.2	Operating Principle Module 2	60
5.1.3	Operating Principle Module 3	62
5.1.4	Functional Principle of Grid Feed-In/Grid Stabilisation	64
5.1.5	Mobile Emergency Care.	66
5.2	Possibilities of Gas Compression	66
5.2.1	Gas Compression with Compressor, Cryo-Pump and Liqui-Flow Process	67
5.2.2	Gas Compression with Cryogenic High-Pressure Piston Pump	73
5.2.3	Gas Compression with the Liqui-Flow Process	81
5.3	CNG Filling Stations.	85
5.3.1	Natural Gas Filling Stations with Compressor.	85
5.3.2	Natural Gas Filling Station with Cryogenic Pump	86
5.3.3	Natural Gas Filling Stations with Liqui-Flow Process.	87
5.4	Satellite Natural Gas Filling Station	90
5.4.1	Filling of Natural Gas Cylinders, Natural Gas Bundles and Natural Gas Trailers.	93
5.4.2	Energy Requirements of the Satellite Natural Gas Fuelling Station	94
5.5	Significance of the Holding Pressure Head in the Liqui-Flow Process and for High-Pressure Piston Pumps	95
	References.	96
6	The Thermodynamic Consideration of the Vacuum Insulated Cryogenic Tank	97
6.1	General Information on the Thermodynamic Function of a Tank	97
6.1.1	The Thermodynamic Function of the Pump Tank	102
6.1.2	The Thermodynamic Function of the Refrigeration Tank	105
6.1.3	The Thermodynamic Function of the Cold Gasifier	106
6.2	The Design Description of the Vacuum Insulated Tank	107
6.2.1	General	107
6.2.2	Tank Designs	110
6.2.3	Significance of the Tank Pressure	113
