

TABLE OF CONTENTS

PREFACE

PART I OVERVIEW

Hans-Hellmut Nagel	
Overview on Image Sequence Analysis	2
J.K. Aggarwal and W.N. Martin	
Dynamic Scene Analysis	40

PART II IMAGE SEQUENCE CODING

J.D. Robbins and A.N. Netravali	
Recursive Motion Compensation: A Review	75
C. Cafforio and F. Rocca	
The Differential Method for Image Motion Estimation	104
Francis Kretz	
Edges in Visual Scenes and Sequences: Application to Filtering, Sampling and Adaptive DPCM Coding	125
Shaker Sabri	
Movement-Compensated Interframe Prediction for NTSC Color TV Signals	156
H.G. Musmann	
Coding of Colour TV Signals with 34 MBit/s Transmission Rate	200
Hans C. Bergmann	
Analysis of Different Displacement Estimation Algorithms for Digital Television Signals	215
Richard A. Jones and Carl D. Bowling	
An Adaptive Gradient Approach to Displacement Estimation	235
Z. Houkes	
Motion Parameter Estimation in TV-Pictures	249
R. Lenz and A. Gerhard	
Image Sequence Coding Using Scene Analysis and Spatio-Temporal Interpolation	264
Siegfried Beyer	
Two Motion Adaptive Interframe Coding Techniques for Air to Ground Video Signals	275
C. Labit and A. Benveniste	
Motion Estimation in a Sequence of Television Pictures	292

P. Robert and C. Labit Comparative Study Between Intra- and Inter- Frame Prediction Schemes	307
J.F. Abramatic, Ph. Letellier, and M. Nadler A Narrow-Band Video Communication System for the Transmission of Sign Language Over Ordinary Telephone Lines	314
Giovanni Zarone Classification and Block Coding of the Frame Difference Signal	337
A.W. Lohmann and Ch. Thum Histograms of Image Sequence Spectra	350
 <u>PART III SCENE ANALYSIS AND INDUSTRIAL APPLICATIONS</u>	
B.L. Yen and T.S. Huang Determining 3-D Motion and Structure of a Rigid Body Using Straight Line Correspondences	365
Thomas D. Williams and Frank Glazer Comparison of Feature Operators for use in Matching Image Pairs	395
Peter Spoer Displacement Estimation for Objects on Moving Background	424
Ulrich Boes Linear Filtering in Image Sequences	437
H. Westphal Photometric Stereo For Moving Objects	448
L.S. Dreschler and H.-H. Nagel On the Selection of Critical Points and Local Curvature Extrema of Region Boundaries for Interframe Matching	457
Claus -E. Liedtke Image Segmentation Considering Properties of the Human Visual System	471
W. Geuen A Fast Edge Detection Algorithm Matching Visual Contour Perception	483
K.H. Bers, M. Bohner, and P. Fritsche Image Sequence Analysis for Target Tracking	493
W.E. Snyder and S.A. Rajala Track Acquisition of Sub-Pixel Targets	502
Volker Graefe A Pre-Processor for the Real-Time Interpretation of Dynamic Scenes	519

H.G. Meissner and E.D. Dickmanns Control of an Unstable Plant by Computer Vision	532
S. Grinaker Real-time Processing of Rasterscan Images	549
D. Cano and M. Bénard 3-D Kalman Filtering of Image Sequences	563
P. Bouthemy and A. Benveniste Atmospheric Disturbances Tracking in Satellite Images	580
Guenter Warnecke Aspects of Dynamic Scene Analysis in Meteorology	594
 <u>PART IV BIOMEDICAL APPLICATIONS</u>	
K.H. Höhne and M. Böhm Processing and Analysis of Radiographic Image Sequences	602
C. Gaudeau, G. Routier, D. Dzeidzina, and C. Longevialle Image Sequence Processing and Pattern Recognition of Biomedical Pictures	624
Martin D. Levine, Peter B. Noble, and Youssry M. Youssef A Rule-Based System for Characterizing Blood Cell Motion	663
H. Oswald Three Dimensional Imaging from Computed Tomograms	710
H. Bunke, G. Sagerer, and H. Niemann Model Based Analysis of Scintigraphic Image Sequences of the Human Heart	725
Subject Index	741
