Opening Comments	1
G. Schettler	
Fluid Dynamic Approaches to Atherosclerosis	3
W.E. Stehbens	
A Fluid-Dynamicist's and a Physiologist's Look at Arterial Flow and Arteriosclerosis	9
A. Naumann and H. Schmid-Schönbein	
The Case for Fluid Dynamics as a Localizing Factor in Atherogenesis	26
R.M. Nerem and M.J. Levesque	
Flow and Atherogenesis in the Human Carotid Bifurcation	38
D.P. Giddens, C.K. Zarins, S. Glagov, B.K. Bharadvaj, and D.N. Ku	
Pulsating Flow in Distensible Models of Vascular Branches	46
D. Liesch, S. Moravec, and R. Zimmer	
Coronary Artery Geometry and Its Fluid Mechanical Implications	51
R.M. Nerem and W.A. Seed	
Flow Patterns in Model and Natural Branching Vessels	60
T. Karino, M. Motomiya, and H.L. Goldsmith	
Geometric Effects on the Hemodynamic Environment of the Arterial Wall: A Basis for Geometric Risk Factors?	71
M.H. Friedman, O.J. Deters, F.F. Mark, C.B. Barger, and G.M. Hutchins	
The Drainage of Transmural Flow and the Consequences of Its Insufficiency	79
H. Jellinek	
Fluid Mechanical Factors in Macromolecular Transport by the Arterial Wall	87
S. Chien	
The Role of Hydrodynamic Factors in Platelet Activation and Thrombotic Events: The Effects of Shear Stress of Short Duration	91
L.J. Wurziinger, R. Opitz, P. Blasberg, H. Eschweiler, and H. Schmid-Schönbein	
Microrheology of Thrombocyte Deposition: Effect of Stimulation, Flow Direction, and Red Cells	103
P. Blasberg, L.J. Wurziinger, and H. Schmid-Schönbein	

The Localization of Transient Subendothelial Water-Filled Blisters in the in Situ Rabbit Aorta as a Result of Reduction in Pressure P.L. Blackshear, Jr., G.L. Blackshear, M.K. Newell, S.J. Kayser, and P.F. Emerson	116
Influence of Convection and Vasoactive Agents on the Mass Transport Properties of the Arterial Wall C.G. Caro, M.J. Lever, A. Baldwin, and A. Tedgui	129
Haemodynamic Influences on Platelets in Haemostasis and Thrombosis G.V.R. Born	135
Effects of Antihypertensive Drugs and Blood Velocity J.D. Spence	141
General Properties of Endothelial Cells N. Freudenberg	145
The Endothelium as a Mediating Factor in Transport Across the Arterial Wall S. Weinbaum, G. Tzeghai, P. Ganatos, and R. Pfeffer	159
Morphology and Fluid-Dynamics of Endothelial Cells at the Site of Vascular Bifurcation H. Buss	168
Location and Morphology of Hypertensive Lesions in Coronary Arteries of Dogs S. Meairs, E. Weihe, U. Mittmann, and W.G. Forssmann	173
Response of Vascular Endothelium to Unsteady Fluid Shear Stress in Vitro C.F. Dewey, Jr., M.A. Gimbrone, Jr., S.R. Bussolari, G.E. White, and P.F. Davies	182
Injury at the Vascular Surface S.M. Schwartz, M.A. Reidy, and G.K. Hansson	188
Cellular Participation in Atherogenesis: Selected Facets of Endothelium, Smooth Muscle, and the Peripheral Blood Monocyte C.J. Schwartz, E.A. Sprague, S.R. Fowler, and J.L. Kelley	200
Evidence that High Flow Velocity and Endothelial Disruption Are Not the Principal Factors in Experimental Plaque Localization S. Glagov, C.K. Zarins, K.E. Taylor, R.A. Bomberger, and D.P. Giddens	208
Localization of Early Atherosclerotic Lesions in Carotid and Coronary Bifurcations in Humans - A Bifurcation of the High Shear Stress Hypothesis A.D. Svinland and L. Walløe	212
Quantitative Arterial Wall Morphology J.F. Cornhill	216
Subject Index	227
