

Contents

Part I General Remarks

1	Detection, Profiling, and Quantification of miRNA Expression	3
1.1	miRNA Biology	3
1.1.1	Biogenesis of miRNAs	3
1.1.2	Actions of miRNAs	7
1.2	Human Disease-Related Expression Profiles of miRNAs	9
1.2.1	Spatiotemporal Expression Profiles	9
1.2.2	miRNA Transcriptome and Human Physiology	17
1.2.3	miRNA Transcriptome in Diseased States	20
1.3	miRNAs as Biomarkers for Human Disease	37
1.4	Methods for Analyzing miRNAs Expression	38
1.4.1	Ideal Methods for miRNA Detection	39
1.4.2	Classification of Methods for miRNA Detection	39
1.4.3	Brief Introduction to the Currently Available miRNA Detection Methods	40
	References	53

Part II miRNA Microarray Methods

2	Microarray and Its Variants for miRNA Profiling	67
2.1	Introduction	68
2.2	Protocol	70
2.2.1	Materials	70
2.2.2	Instruments	71
2.2.3	Reagents	72
2.2.4	Procedures	73
2.3	Application and Limitation	77
	References	78

Part III Northern Blotting Methods

3 Northern Blotting and Its Variants for Detecting	
Expression and Analyzing Tissue Distribution of miRNAs	83
3.1 Introduction	83
3.2 Protocol	85
3.2.1 Basic Protocols	85
3.2.2 Protocols with Improved Sensitivity	89
3.2.3 Protocols with Improved Specificity and Sensitivity	91
3.2.4 Protocols with Nonisotopic Detection	97
3.3 Application and Limitation	99
References	99

Part IV *In Situ* Hybridization Methods

4 <i>In Situ</i> Hybridization and Its Variants for Detecting	
Expression and Analyzing Cellular Distribution of miRNAs	103
4.1 Introduction	104
4.2 Protocol	106
4.2.1 Basic Protocol	106
4.2.2 LNA-Modified Protocol with Enhanced Sensitivity and Specificity	116
4.2.3 Ultramer Extension Protocol with Reduced Stringency and Expense	122
4.3 Application and Limitation	126
References	127

Part V Real-Time RT-PCR Methods

5 End-Point Stem-Loop Real-Time RT-PCR for miRNA	
Quantification	131
5.1 Introduction	132
5.2 Protocol	134
5.2.1 Materials	134
5.2.2 Instruments	135
5.2.3 Reagents	135
5.2.4 Procedures	135
5.3 Application and Limitation	139
References	139

6	miR-Q RT-PCR for miRNA Quantification	141
6.1	Introduction	141
6.2	Protocol	142
6.2.1	Materials	142
6.2.2	Instruments	142
6.2.3	Reagents	143
6.2.4	Procedures	143
6.3	Application and Limitation	146
	References	146
7	Poly(A)-Tailed Universal Reverse Transcription	147
7.1	Introduction	147
7.2	Protocol	148
7.2.1	Materials	148
7.2.2	Instruments	149
7.2.3	Reagents	149
7.2.4	Procedures	149
7.3	Application and Limitation	151
	References	151
8	Multiplexing RT-PCR for High-Throughput miRNA Profiling	153
8.1	Introduction	154
8.2	Protocol	155
8.2.1	Materials	155
8.2.2	Instruments	155
8.2.3	Reagents	155
8.2.4	Procedures	155
8.3	Application and Limitation	156
	References	157
9	miRNA Amplification Profiling (mRAP)	159
9.1	Introduction	159
9.2	Protocol	160
9.2.1	Materials	160
9.2.2	Instruments	162
9.2.3	Reagents	163
9.2.4	Procedures	164
9.3	Application and Limitation	169
	References	169

Part VI Cloning Methods

10 miRNA Serial Analysis of Gene Expression (miRAGE or SAGE)	173
10.1 Introduction	173
10.2 Protocol	174
10.2.1 Materials	174
10.2.2 Instruments	176
10.2.3 Reagents	176
10.2.4 Procedures	177
10.3 Application and Limitation	187
References	188

Part VII Nanoparticle Methods

11 Electrocatalytic Nanoparticle Tags Technique for High-Sensitivity miRNA Expression Analysis	191
11.1 Introduction	191
11.2 Protocol	194
11.2.1 Materials	194
11.2.2 Instruments	194
11.2.3 Reagents	194
11.2.4 Procedures	195
11.3 Application and Limitation	197
References	197
12 Nanoparticle-Amplified SPR Imaging for High-Sensitivity miRNA Profiling	199
12.1 Introduction	199
12.2 Protocol	201
12.2.1 Materials	201
12.2.2 Instruments	201
12.2.3 Reagents	202
12.2.4 Procedures	202
12.3 Application and Limitation	205
References	206
13 Conducting Polymer Nanowires Technique for High-Sensitivity miRNA Expression Analysis	207
13.1 Introduction	207
13.2 Protocol	209
13.2.1 Materials	209
13.2.2 Instruments	209

13.2.3 Reagents	209
13.2.4 Procedures	211
13.3 Application and Limitation	214
References	215
14 Gold Nanoparticle Probe Method for miRNA	
Quantification	217
14.1 Introduction	217
14.2 Protocol	220
14.2.1 Materials	220
14.2.2 Instruments	220
14.2.3 Reagents	220
14.2.4 Procedures	221
14.3 Application and Limitation	224
References	224
Part VIII Other Methods	
15 Splinted Ligation Method	229
15.1 Introduction	230
15.2 Protocol	230
15.2.1 Materials	230
15.2.2 Instruments	230
15.2.3 Reagents	232
15.2.4 Procedures	233
15.3 Application and Limitation	238
References	239
16 Padlock-Probes and Rolling-Circle Amplification	241
16.1 Introduction	241
16.2 Protocol	243
16.3 Materials	243
16.3.1 Instruments	243
16.3.2 Reagents	243
16.3.3 Procedures	244
16.4 Application and Limitation	246
16.4.1 Applications	246
16.4.2 Limitations	247
References	247
17 Invader Assay	249
17.1 Introduction	249
17.2 Protocol	250
17.2.1 Materials	250

17.2.2 Instruments	250
17.2.3 Reagents	250
17.2.4 Procedures	251
17.3 Application and Limitation	255
References	255
18 Single Molecule Method	257
18.1 Introduction	257
18.2 Protocol	258
18.2.1 Materials	258
18.2.2 Instruments	259
18.2.3 Reagents	259
18.2.4 Procedures	259
18.3 Application and Limitation	263
References	264
19 Enzymatic Method	267
19.1 Introduction	267
19.2 Protocol	269
19.2.1 Materials	269
19.2.2 Instruments	269
19.2.3 Reagents	269
19.2.4 Procedures	270
19.3 Application and Limitation	274
References	274
20 Surface-Enhanced Raman Spectroscopy Method	275
20.1 Introduction	275
20.2 Protocol	277
20.2.1 Materials	277
20.2.2 Instruments	277
20.2.3 Reagents	277
20.2.4 Procedures	278
20.3 Application and Limitation	280
References	280
21 RAKE Assay	281
21.1 Introduction	281
21.2 Protocol	283
21.2.1 Materials	283
21.2.2 Instruments	283
21.2.3 Reagents	283
21.2.4 Procedures	284

21.3 Application and Limitation	287
References	287
22 Bead-Based Flow Cytometric miRNA Expression Profiling	289
22.1 Introduction	289
22.2 Protocol	290
22.2.1 Materials	290
22.2.2 Instruments	290
22.2.3 Reagents	290
22.2.4 Procedures	290
22.3 Application and Limitation	293
References	294
23 Bioluminescence miRNA Detection Method	295
23.1 Introduction	295
23.2 Protocol	296
23.2.1 Materials	296
23.2.2 Instruments	297
23.2.3 Reagents	297
23.2.4 Procedures	298
23.3 Application and Limitation	301
References	302
24 Molecular Beacon Method	303
24.1 Introduction	303
24.2 Protocol	306
24.2.1 Materials	306
24.2.2 Instruments	307
24.2.3 Reagents	307
24.2.4 Procedures	307
24.3 Application and Limitation	310
References	310
25 Ribozyme Method	313
25.1 Introduction	313
25.2 Protocol	315
25.2.1 Materials	315
25.2.2 Instruments	315
25.2.3 Reagents	315
25.2.4 Procedures	316
25.3 Application and Limitation	318
References	319

26	Electrocatalytic Moiety Labeling Technique for High-Sensitivity miRNA Expression Analysis	321
26.1	Introduction	321
26.2	Protocol	322
26.2.1	Materials	322
26.2.2	Instruments	323
26.2.3	Reagents	324
26.2.4	Procedures	324
26.3	Application and Limitation	327
	References	328

Part IX Circulating miRNA Detection Methods

27	Serum and Plasma miRNA Detection	331
27.1	Introduction	331
27.2	Protocol	332
27.2.1	Materials	332
27.2.2	Instruments	333
27.2.3	Reagents	333
27.2.4	Procedures	333
27.3	Application and Limitation	337
	References	337
28	miRNA Detection from Peripheral Blood Microvesicles	339
28.1	Introduction	339
28.2	Protocol	340
28.2.1	Materials	340
28.2.2	Instruments	340
28.2.3	Reagents	341
28.2.4	Procedures	341
28.3	Application and Limitation	343
	References	343
29	Detection of Placental miRNAs in Maternal Plasma	345
29.1	Introduction	345
29.2	Protocol	346
29.2.1	Materials	346
29.2.2	Instruments	346
29.2.3	Reagents	346
29.2.4	Procedures	347
29.3	Application and Limitation	348
	References	349

Part X Single-cell miRNA Detection Methods

30 Quantitative LNA-ELF-FISH Method for miRNA

Detection in Single Mammalian Cell 353

30.1 Introduction 353

30.2 Protocol 354

 30.2.1 Materials 354

 30.2.2 Instruments 354

 30.2.3 Reagents 355

 30.2.4 Procedures 355

30.3 Application and Limitation 358

References 358

31 Single Cell Stem-Looped Real-Time PCR 361

31.1 Introduction 361

31.2 Protocol 363

 31.2.1 Materials 363

 31.2.2 Instruments 363

 31.2.3 Reagents 364

 31.2.4 Procedures 364

31.3 Application and Limitation 367

References 367

32 miRNA Function-Reporter Expression Assay 369

32.1 Introduction 369

32.2 Protocol 370

 32.2.1 Materials 370

 32.2.2 Instruments 371

 32.2.3 Reagents 371

 32.2.4 Procedures 371

32.3 Application and Limitation 373

References 374

Part XI Whole Mount *In Situ* Analysis

33 Whole Mount *In Situ* Hybridization (WM-ISH) for miRNA

Expression Profiling During Vertebrate Development 377

33.1 Introduction 377

33.2 Protocol 379

 33.2.1 Materials 379

 33.2.2 Instruments 379

33.2.3 Reagents	379
33.2.4 Procedures	380
33.3 Application and Limitation	383
References	384
Index	385
