

# Contents

1	<b>Patterns of Secretion and Metabolism of the Gonadotrophic Hormones (H.G. Burger and V.W.K. Lee)</b>	1
1.1	Assay Methods . . . . .	1
1.1.1	Human FSH, LH and Prolactin . . . . .	1
1.1.2	Animal Gonadotrophins . . . . .	2
1.2	Patterns of LH and FSH Secretion in Normal Men . . . . .	3
1.3	Metabolic Clearance and Gonadotrophin Secretion Rates in Normal Men . . . . .	6
1.3.1	MCR and Production Rate of LH . . . . .	6
1.3.2	MCR and Production Rate of FSH . . . . .	9
1.3.3	Initial Clearance of Gonadotrophin Subunits . . . . .	11
1.3.4	Effect of Renal Disease on MCR . . . . .	11
1.4	Summary . . . . .	11
2	<b>Control of FSH and LH Secretion (D.M. de Kretser, H.G. Burger and W.J. Bremner)</b>	12
2.1	Sites of Production of FSH and LH . . . . .	12
2.2	Hypothalamic Influences on FSH and LH Secretion . . . . .	13
2.3	Influence of Testicular Feedback . . . . .	23
2.3.1	Feedback Control of LH . . . . .	23
2.3.2	Feedback Control of FSH . . . . .	25
2.4	Assays for Inhibin . . . . .	28
2.4.1	Modified Steelman-Pohley Bioassay . . . . .	28
2.4.2	Bioassays Using Castrate Rams . . . . .	29
2.4.3	Bioassays In Vivo Using Rodents . . . . .	30
2.4.4	In Vitro Bioassays for Inhibin . . . . .	31
2.5	Assay Specificity . . . . .	32
2.6	Sources of Inhibin . . . . .	34
2.7	Evidence for Inhibin from Immunisation Studies . . . . .	40
2.8	Characteristics and Mode of Action of Inhibin . . . . .	41
2.9	Physiological Implications of Inhibin . . . . .	42
2.10	Summary . . . . .	43
3	<b>Pituitary Testicular Axis During Pubertal Development (V.W.K. Lee and H.G. Burger)</b>	44
3.1	Studies in Men . . . . .	44

3.1.1	Changes During Fetal Life . . . . .	44
3.1.2	Changes in the Newborn . . . . .	45
3.1.3	Changes During Childhood and Adolescence . . . . .	45
3.1.4	Pituitary Responses to LHRH . . . . .	48
3.2	Studies in Rats . . . . .	53
3.2.1	Changes in LH, FSH and Testosterone Concentrations with Age . . . . .	53
3.2.2	Relationship Between Age and Hormonal Levels . . . . .	56
3.2.3	Changes in Testicular Histology with Age . . . . .	56
3.2.4	Significance of Hormonal Changes in the Developing Rat . . . . .	57
3.3	Studies in Rams . . . . .	60
3.3.1	Changes in FSH, LH, Prolactin and Testosterone Concentrations with Age . . . . .	61
3.3.2	LH, FSH and Testosterone Responses to LHRH with Age . . . . .	63
3.3.3	Changes in Testicular Histology with Age . . . . .	65
3.3.4	Significance of Hormonal Changes . . . . .	66
3.4	Overall Comments . . . . .	69
4	<b>Changes in the Pituitary-Testicular Axis with Age</b> (H.W.G. Baker and B. Hudson) . . . . .	71
4.1	Introduction . . . . .	71
4.2	Methods . . . . .	72
4.2.1	Testing the Pituitary-Testicular Axis . . . . .	72
4.2.2	Selection of Subjects . . . . .	73
4.2.3	Statistical Methods . . . . .	73
4.3	Summary of Results . . . . .	73
4.3.1	Virility, Testicular Size and Histology . . . . .	74
4.3.2	Gonadotrophin and Sex Hormone Levels . . . . .	74
4.3.3	Metabolic Clearance and Production Rates of Sex Steroids . . . . .	76
4.3.4	Dynamic Tests of Gonadotrophin and Testosterone Secretion . . . . .	76
4.4	Significance of Senescent Testicular Degeneration . . . . .	79
4.4.1	Mechanism of Hormone Changes with Age . . . . .	80
4.4.2	Further Studies . . . . .	80
4.4.3	Aetiology of Testicular Damage . . . . .	81
4.5	Clinical Relevance . . . . .	81
4.6	Summary . . . . .	82
5	<b>Spermatogenesis and the Sertoli Cell</b> (K.A. Rich and D.M. de Kretser) . . . . .	84
5.1	Spermatogenesis . . . . .	84
5.1.1	The Spermatogenic Cycle . . . . .	84
5.1.2	Kinetics of the Spermatogenic Process . . . . .	85
5.1.3	Duration of Spermatogenesis . . . . .	87
5.1.4	Requirements for Quantitation of Spermatogenesis . . . . .	88
5.2	The Sertoli Cell . . . . .	88
		89

5.2.1	Morphological Characteristics . . . . .	89
5.2.2	Nucleus . . . . .	90
5.2.3	Cytoplasm . . . . .	91
5.2.4	Inter-Sertoli Cell Junctions . . . . .	93
5.2.5	Sertoli Cell Maturation . . . . .	95
5.2.6	Secretory Products . . . . .	96
5.2.6.1	Seminiferous Tubule Fluid . . . . .	96
5.2.6.2	Androgen-Binding Protein . . . . .	97
5.2.6.3	Inhibin . . . . .	99
5.2.6.4	Plasminogen Activator . . . . .	99
5.2.6.5	Other Secretory Products . . . . .	99
5.2.7	Steroidogenic Activity . . . . .	100
5.2.8	Hormonal Regulation of Sertoli Cell Function . . . . .	101
5.2.9	Actions of FSH on the Sertoli Cell . . . . .	102
5.2.10	Effects of Androgen on the Sertoli Cell . . . . .	103
5.2.11	Biochemical Changes Associated with Sertoli Cell Maturation	104
6	<b>Leydig Cell Function (Y. Hodgson and B. Hudson)</b> . . . . .	107
6.1	Introduction . . . . .	107
6.2	Morphology of the Leydig Cell . . . . .	108
6.3	Steroid Biosynthesis and Secretion . . . . .	115
6.4	Regulation of Leydig Cell Function . . . . .	118
6.5	Hormonal Regulation of LH Receptors . . . . .	121
6.5.1	LHRH and Leydig Cell Function . . . . .	125
6.6	Leydig Cells and Spermatogenesis . . . . .	126
6.7	Androgens in Blood . . . . .	127
6.8	Abnormalities of Leydig Cell Function . . . . .	128
6.8.1	Congenital Disorders . . . . .	128
6.8.2	Acquired Disorders . . . . .	130
6.8.2.1	Cirrhosis of the Liver . . . . .	131
6.8.2.2	Chronic Renal Failure . . . . .	131
6.8.2.3	Age . . . . .	131
6.8.3	Testicular Disorders . . . . .	132
7	<b>The Effect of Testicular Damage on Sertoli and Leydig Cell Function (D.M. de Kretser and J.B. Kerr)</b> . . . . .	133
7.1	Introduction . . . . .	133
7.2	Spermatogenic Damage and the Control of FSH Secretion . . . . .	133
7.3	Sertoli Cell Function and Testicular Damage . . . . .	135
7.4	Luteinising Hormone, Testosterone and Spermatogenic Damage . . . . .	142
7.5	Leydig Cell Structure and Spermatogenic Damage . . . . .	147
7.6	Leydig Cell Function and Testicular Damage . . . . .	150
	<b>References</b> . . . . .	155
	<b>Subject Index</b> . . . . .	185
